Table of Content

Preface of the IDP

Foreword by Executive Mayor

Foreword by the Municipal Manager

Chapter 1

- 1.1 Introduction
 - 1.1.1 Process followed to formulate the 2020/21 IDP
 - 1.1.2 The IDP process summarised
 - 1.1.3 Status of the IDP
 - 1.1.4 Legislative Framework
 - 1.1.5 Key planning and policy directives

Chapter 2: Our Strategy

- 2.1 Context
- 2.2 Development Strategy
- 2.3 Strategic objectives and priority areas

Chapter 3: Situational analysis

- 3.1 Description of Prince Albert
 - 3.1.2 Climate
 - 3.1.3 Geography
- 3.2 Population
 - 3.2.1 Age distribution
 - 3.2.2 Learner teacher -ratio
 - 3.2.3 Education facilities
- 3.3 Home school education
- 3.4 Health
 - 3.4.1 EMS
 - 3.4.2 HIV
- 3.5 Overview of towns and surrounding farms
- 3.6 Households
- 3.7 Economic contribution
- 3.8 Labour
- 3.9 Shale gas exploration

Chapter 4: Our Past Performance

- 4.1 Highlights of the past year
- 4.2 Water
- 4.3 Waste water provision
- 4.4 Electricity
- 4.5 Housing
- 4.6 Waste Management
 - 4.6.1 Recycling

Prince Albert Municipality – 2020/21 IDP Review

- 4.7 Free basic services & indigent support
- 4.8 Roads
- 4.9 Storm water
- 4.10 Planning & Local Economic Development
 - 4.10.1 Broadband
- 4.11 Community & Social services
 - 4.11.1 Libraries
 - 4.11.2 Cemeteries
- 4.12 Air quality
- 4.13 Law enforcement
- 4.14 Fire Services and disaster management
- 4.15 Sport and recreation
- 4.16 Financial services
- 4.17 Human Resource Services
- 4.18 Performance Management

Chapter 5: Ward planning and needs identification

- 5.1 Sector and operational planning
- 5.2 Climate Change
- 5.3 Comprehensive Rural Development Programme (CRDP) Approach
 - 5.3.1 Neighbourhood Development Planning (NDP)
- 5.4 SWOT analysis of the area
- 5.5 Focus area for wards
- 5.6 Strategic Informants for RDP Project Selection to Absorb the Poor
- 5.7 SWOT Analysis on the Integration of Poverty Pockets and Value Chain

- 5.9 Karoo Small Town Regeneration Initiative

Chapter 6: Institutional Arrangements

- 6.1 Council composition
- 6.2 Municipal Wards
- 6.3 Management team
 - 6.3.1 Staff component of the Prince Albert Municipality
 - 6.3.2 Employment Equity
 - 6.3.2 Ward committees
- 6.4 Skills Development
- 6.5 Municipal Administrative and Institutional Capacity

Chapter 7: Sector plans

- 7.1 Intergovernmental Relations
- 7.2 Joint Planning Initiative
- 7.3 Prince Albert Spatial Development Framework (SDF)
- 7.4 Disaster Management
- 7.5 Storm Water Master plan
- 7.6 Good Governance
- 7.7 ICT
- 7.8 Risk Management
- 7.9 Development Strategies
- 7.10 Sector Plans and strategies
- 7.11 Integrated Programmes
 - 7.11.1 Thusong programme

Chapter 8: Financial Management

- 8.1 Division of Revenue Act (DORA)
- 8.2 Operating and Capital budget
 - 8.2.1 Long-term financial Plan
- 8.3 MIG projects registered
- 8.4 mSCOA
- 8.5 Planned sector department's investment in municipal space: 2020/21 MTREF
- 8.6 A Schedules

Chapter 9: Performance Management

- 9.1 iMAP: Project & programme planning

Prince Albert Municipality – 2020/21 IDP Review

Preface of the IDP

The Prince Albert Municipal Council acknowledges its constitutional responsibility and understands the importance that strong political leadership and sound administration and financial management plays in the effective functioning of a municipality and has therefore reconfirmed its vision, mission and values which are;

Vision

Prince Albert, an area characterised by high quality of living and service delivery.

Mission

To enable all stakeholders and sectors in the municipal space to add value to the community, whether intellectual, social, economical, etc in order to ensure high quality of living and service delivery fostering citizen centric ownership.

Development strategy

To ensure a sustainable Prince Albert, where all sectors is aligned for the betterment and benefit of the municipal area as a whole. To create an enabling environment for the inhabitants of Prince Albert towards guaranteed job opportunities and thus a better livelihood and citizen satisfaction.

Values

The value system of Prince Albert Municipality describes the relationship between people within the municipality as well as the relationship between the Municipality and its customers. This involves a description of all practices applied and the values placed on certain principles.

Prince Albert Municipality – 2020/21 IDP Review

Foreword by Executive Mayor

Globally all nations are experiencing a volatile and extremely challenging period in our history with the spread of the COVID-19 pandemic. The magnitude and severity of the COVID-19 outbreak has reached unprecedented scales and resulted in the World Health Organisation declaring the COVID-19 outbreak a Public Health Emergency of International Concern. With the COVID-19 pandemic arriving on South African shores the national government acted swiftly and declared a national disaster in terms of Section 3 of the Disaster Management Act, 2002. This was followed by regulations promulgated on 17 March 2020 to alleviate, contain and minimise the effects of the disaster.

On 23 March 2020 President Ramaphosa announced a 21 day lock down that which came into effect on midnight on the 26th of March 2020. The lockdown has since been extended and has a huge impact on the everyday lives and economic survival of our communities and businesses. The impact of COVID-19 on municipalities is just as detrimental as on our businesses and our residents. If our communities and economy is not doing well, the sustainability of municipalities will not be doing well. On a personal level, if ever there was a time for humanity to step up to the plate and be the best version of themselves, it is now. This is the time of uBunthu. This is the time where we show who we are and showcase our strength by doing what is right for all of us and not just for the individual.

On an economic side, it is imperative that we adapt the way we do business. We must open our doors for business while protecting our workforce and economy. Now is the time to go the extra mile and support our local businesses. Please note that there is support available via the Unemployment Insurance Fund in terms of the National Disaster Benefit. Small Business can also receive assistance from the Department of Small Business Development. More information is available at www.smmesa.gov.za

Prince Albert Municipality will continue with its essential services. Refuse removal, sanitation services, electricity, water provision, road law enforcement and fire services will continue as normal. For emergencies you can contact Prince Albert Municipality on cell 082 220 0848. Our offices are open for the public from 08h00 to 13h00 during the week. All visitors and staff will be screened and we will continually adjust our operations aligned to the new regulations as they are promulgated.

You are most welcome to contact your ward councillor should you have any queries. The contact details of the ward councillors are as follows:

Ward 1	Cllr Elsabe Maans	Cell: 0608472068
Ward 2	Cllr Linda Jaquet	Cell: 073 213 3797
Ward 3	Cllr Goliath Lottering	Cell: 079 444 7794
Ward 4	Cllr Margy Jaftha	Cell: 072 909 9183

Please note that Council adopted the draft budget, draft Integrated Development Plan and draft performance deliverables on 26 March 2020 and was made available for public input until 15 May 2020. These documents can be found on our website at www.pamun.gov.za. It is understood that

Prince Albert Municipality – 2020/21 IDP Review

the public participation processes could not function as normal with community participation, but the public had the opportunity to provide input via social media, telephone, e-mail and visits to the Municipality. We now table the draft IDP budget and draft SDBIP for Council approval.

Bearing in mind that COVID-19 will be for us for months to come, we urge our communities to follow Prince Albert Municipality on our facebook page, ensure that you provided your contact number to the Municipality for inclusion in our bulk sms messaging service and if you have an email address, please provide this to us to ensure that we add you to our mailing list.

Once this challenge in our lives are overcome – and we will overcome it – we will resume our normal service delivery and governance activities. The challenge of ailing infrastructure, poor debt collection and an ever-increasing burden of compliance, while facing a recession in our economy, is a fight we will continue to fight with integrity, dedication and the support of our communities and inter-governmental partners.

We encourage all to give their full support to the authorities and each other during this time. We request that you protect the vulnerable, your families and yourself. We also wish to extend our heartfelt thanks to our emergency staff and personnel; to the frontline staff in shops and service areas that face the risk of COVID-19 exposure to ensure that their communities are taken care of. We appreciate and honour your sacrifice.

Stay safe and may God bless this beautiful country and all its people

Cllr G Lottering

Executive Mayor

Prince Albert Municipality – 2020/21 IDP Review

Foreword by the Municipal Manager

In every challenge that we face, we have a choice. We can either embrace it or we can run from it. The COVID-19 national disaster declaration and subsequent lock down posed severe challenges to South Africans. Since 15 March 2020 more than 80 new pieces of legislation were approved that posed severe challenges to our normal way of life, of doing business and of just understanding what is happening. Even with us moving to level 3 from 1 June it must be realised that COVID-19 will remain with us for many months more and that this is our new normal. It is not going to be easy, but we have overcome so much in the past that there is no doubt in my mind that we will overcome the COVID-19 pandemic and all that it brings with it.

Prince Albert Municipality will continue with its essential service delivery during Alert Level 3 and onwards, while still taking the necessary precautions to safeguard our staff and community. The safety measures and safeguarding of staff, will have a negative impact on our operations, but we will minimise these upheavals and challenges to make sure that service delivery is not compromised.

Please be assured that the authorities on both national, provincial, regional and local level – in all spheres of governance and sectors – are doing all possible to ensure our communities safety and to minimise the impact of the COVID-19 pandemic. Our strongest defence, however will be our communities' co-operation and adherence to the regulations. We urge all to please co-operate and give life to the spirit of uBunthu. We have the opportunity to show the world our true spirit as we yet, again, rise and overcome that which strive to rob us of our future.

The South African economy is officially in recession. The Prince Albert municipal area's economy is largely dependent on agriculture and tourism. The loss of jobs in the tourism and hospitality sector is a reality and we must all do what we can to address this. The vital role of agriculture, that is still suffering from a severe drought in our municipal area, has never been better showcased. We will as authorities and communities have to put in every effort to protect our local economy and support each other. One of the ways to do so is to protect and improve our infrastructure, with specific focus on our water resources and roads, while we have to look at collaboration on fire-fighting services to ensure that our limited resources have the maximum impact.

Prince Albert Municipality is now experiencing the lowest payment rate ever. In short this means that the income we generate from trade services are severely compromised and our cash-flow will be under pressure. Tough decisions had to be made as our final budget had over R2,8 million less for our operations than pre-Covid-19. Council resolved to freeze all vacancies, to reduce operational expenditure and to apply for exemption not to implement salary increases. Going forward stringent financial management will be implemented. We will strictly monitor financial targets for the period of recovery, we will implement expenditure reduction, monitor debt levels, revenue improvement targets, debt collection targets, gearing ratio, cost coverage and liquidity requirements, to ensure that we devise and implement the necessary mitigating plans and actions to not compromise our sustainability and service delivery.

The need to collaborate and move away from silo approach planning have resulted in the Western Cape government moving to a more inclusive regional planning approach where the relevant districts play a bigger role in coordination of planning initiatives. This approach is known as the joint district approach and the Central Karoo municipalities have already had some success with this with their Drought Recovery Action Plan (DRAP). It is hoped that this will deepen the integrated approach to

Prince Albert Municipality – 2020/21 IDP Review

service delivery with the intention of creating synergies through the consolidation / concentration of resources, also across different spheres of government.

Prince Albert Municipality has a good relationship with other sector departments and will continue to work with them to realise our vision. Due to the market price over extending the available funding to establish a sport precinct in Prince Albert with nearly 80%, the Prince Albert Municipality had to defer the allocation of R11.5 million from the national sports department back to them. The Municipality have motivated that this funding be made available in a following financial year and they are supported by the relevant sector and national departments in this.

The Municipality will commence with the extension of the Thusong project in the 2020/21 financial year. This project has become crucial to the economic recovery of the community since 15 March 2020. Together with the proposed Sport Precinct Plan, the Thusong extension, will promote social cohesion and address the apartheid special divide between the communities of North and South End in Prince Albert.

Prince Albert Municipality is well aware of the vulnerability of our communities due to the economic recession, the COVID-19 pandemic and subsequent unemployment and poverty. We will continue with our support initiatives in terms of labour-intensive projects, EPWP programmes, CWP support and collaboration with the IDT programme. We will continue with our indigent programmes and support to initiatives such as PACT and the Tourism Bureau.

The Municipality will investigate renewable energy resources and more information will be provided about this during the coming year.

As indicated by the Executive Mayor, the formal draft IDP, draft budget, draft performance objectives and targets was available for public comment on the municipal website at www.pamun.gov.za and people having access to e-mail were invited to provide comment. Input could also be provided directly to the Municipal Manager via whatsapp or in person visits to the Municipality. The predominant concern of our community remains unemployment and recovering from the impact of COVID-19. We will be working tirelessly towards addressing these concerns in the coming years.

On behalf of myself, Council, municipal staff and our community we wish to extend our sincerest gratitude towards all our healthcare workers, emergency service teams, social workers, law enforcement and essential municipal personnel for your selfless work and dedication to keeping our citizens safe. We appreciate you and are grateful to you and your loved ones for your sacrifices during this difficult time.

May God bless this beautiful country and its people.

Anneleen Vorster
MUNICIPAL MANAGER

Prince Albert Municipality – 2020/21 IDP Review

Chapter 1

1.1 Introduction

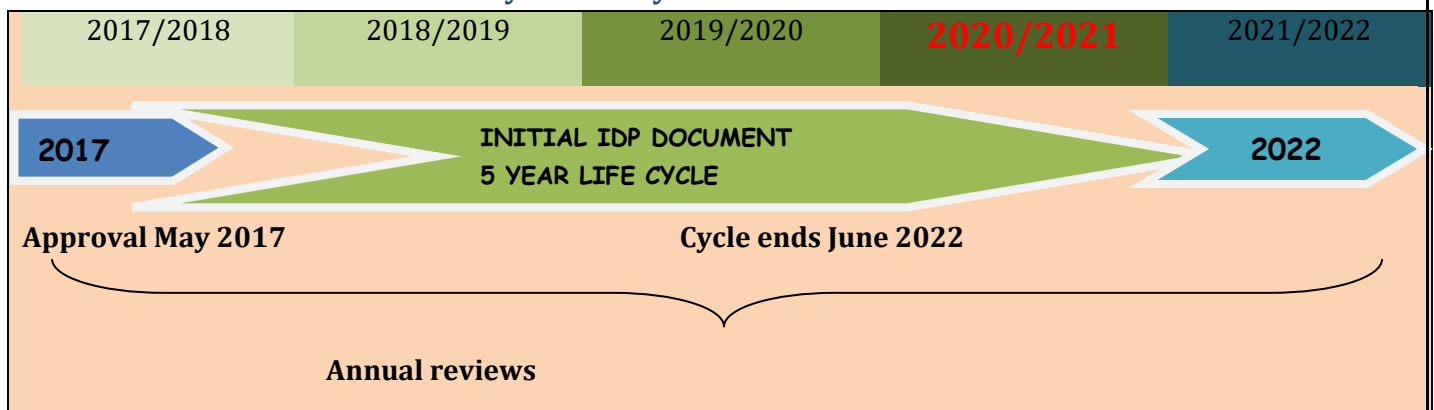

Integrated development planning (IDP) is a process whereby a municipality prepares its strategic development plan for a five-year cycle directly linked to the term of its Council. Hence this IDP is the third review for Prince Albert Municipality (PAM) for the 2017 – 2022 cycle. Integrated development planning is at the centre of the system of developmental local government in South Africa and represents the driving force for making municipalities more strategic, inclusive, responsive and performance-driven in character.

Review of the Integrated Development Plan

The Municipal Systems Act (Act 32 of 2000) does require municipalities in South Africa to review their IDP's on an annual basis in order to keep track and remain relevant to the ever-changing needs and dynamics in communities. In relation to the illustration below of the evolution of IDP's over a 5-year period this process can be described as review two of the 4th Generation IDP of the Prince Albert Municipality. The priorities and actions identified in this IDP review will inform the structure of the Prince Albert Municipality, the service delivery standards, all financial planning and budgeting as well as performance reporting by the municipality.

This second review of the 4th Generation IDP does not attempt to rewrite the 2017 -2022 IDP, but mostly focuses on assessing and reporting on the strategic objectives and targets set in the 5-year plan. That is why it is essential to read this IDP review together with the 2017-2022 IDP, because Prince Albert Municipality is still well on course in attaining its strategic objectives as set out in the aforementioned plan.

Five year IDP cycle – Vision 2022

For the IDP to remain relevant a Municipality must assess its performance and the achievement of its targets and strategic objectives. The IDP will therefore have to reflect the impact of successes as well as corrective measures to address challenges. The 2020/2021 review IDP process will address

Prince Albert Municipality – 2020/21 IDP Review

internal and external circumstances that impact on the priority issues, objectives, strategies, projects and programmes of integrated planning.

The review seeks to integrate and balance the economic, ecological and social pillars of sustainability within the Greater Prince Albert Municipal area without compromising the institutional capacity required to implement and coordinate the efforts needed across sectors and relevant spheres of government. The IDP is the principle strategic planning instrument which guides and informs all planning, budgeting and development in the Prince Albert municipal area. The priorities and actions identified in this IDP will inform the structure of the municipality, the service delivery standards, all financial planning and budgeting as well as performance reporting by the municipality.

2020/21 IDP revision summary

REFERENCE IN DOCUMENT	ADDITIONS	PURPOSE AND IMPACT ON PLANNING AND BUDGETING PRIORITIES
Chapter 1	Mayor Foreword	Sets political leadership tone and provides governance oversight.
Chapter 1	Foreword of the Municipal Manager	Sets management leadership tone and provides administrative oversight.
Chapter 1	Key planning and policy directives	National and provincial priorities have changed, due to new term of office and this may impact local government budget allocations for certain programmes and projects
Chapter 3	Situational Analysis	To recognise the 2019 Provincial MERO Report and the 2019 Municipal Socio-Economic Profile findings, growth and development impact assumptions in our planning trajectory.
Chapter 4	Past Performance	This is merely to report on the previous year's highlights and performance
Chapter 5	Ward planning and needs identification	This outlines the development priorities aligned to the 2020/21 budget.
Chapter 6	Institutional arrangements	To update and align the administrative and institutional capacity to ensure organisational readiness to implement the IDP. Incorporate the new Macro and Micro structure that will come into effect 1 July 2020. Review and align the WSP to the IDP.
Chapter 7	Sector plans	All sector plans have been incorporated into the reviewed IDP. Safety plan and Rural Development plan for LG
Chapter 8	Financial Management	To present a responsive budget that align to the development priorities contained in the IDP.
Chapter 9	Performance Management	To review the targets and ensure that programmes and projects are implemented, monitored and reviewed through the SDBIP.

Prince Albert Municipality – 2020/21 IDP Review

1.1.1 Process followed to formulate the 2020/21 IDP review

This Integrated Development Plan (IDP) is the fourth round of strategic plans since the inception of the IDP as a planning mechanism to synchronise planning and fiscal spending across all spheres of government and also reflects the five (5) year strategic development intent and the delivery agenda of the newly elected Council. It is drafted in such a way to be strategic and inclusive in nature. The plan links, integrates and coordinates other existing plans, while taking development proposals into account. The ultimate aim is to align the IDP with the municipality's resources and internal capacity, forming a policy framework on which annual budgets are based.

The IDP was developed in terms of an IDP process plan that ensure that the IDP process complies with certain minimum quality standards, to ensure that proper coordination between and within the spheres of government is established and that communities are engaged during the preparation of the IDP. The process plan is in effect a “plan to plan”.

According to Section 28(1) of the Municipal System Act, 32 of 2000 a municipal Council must adopt a process set out in writing to guide the planning, drafting and review of its integrated development plan. This Process Plan outlines the programme to be followed and provides detail on the issues specified in the Act. The IDP time schedule were unanimously adopted by Council on 30 August 2019. The time schedule is attached as annexure A.

The Integrated Implementation Plan (IIP) for provincial and municipal planning, budgeting and implementation is an annual plan which outlines the approach, processes and actions required as well as the stakeholders who will be involved in executing the Integrated Work Plan for the respective year. Taking an integrated management approach therefore involves the practice of co-planning, co-budgeting and co-implementation through both vertical and horizontal integration. The IIP takes into account the policy, economic and fiscal context and identifies the objectives and approach for 2020/2021 to give effect to integrated and citizen-centric service delivery. This is the official departure point for the 2020/21 integrated planning and budgeting process and is further complimented by the Joint District Approach. The 2020/21 integrated planning and budgeting process focuses on strengthening the progress made to align planning and budgeting in the Province and will place particular emphasis on enhancing the provincial and local government interface.

The Integrated Management approach seeks to ensure that, inter alia, the budget, programmes and projects of municipalities and provincial and national departments are derived from robust and integrated planning processes, at the heart of which is the Integrated Development Plan (IDP) and its core components such as the Spatial Development Framework (SDF). The SDF must direct the spatial location of growth and development within the municipal areas.

The Strategic Integrated Municipal Engagements (SIME) which takes place in April and May precedes the approval of municipal budgets. The engagements provide provincial government the opportunity to assess the Municipality's compliance and performance through the planning review of municipal IDP and budgeting efforts for the upcoming financial year.

Prince Albert Municipality – 2020/21 IDP Review

The SIME process will primarily focus on strategic issues emanating from the municipality's integrated development plans, strategic development planning frameworks and draft annual budgets. The aim will be to strengthen the synergies between the three main sets of documents in order to gear the municipalities for sustainable growth, development and social upliftment.

A key focus of the 2020/21 SIME process will be on local government responsiveness to its socio-economic environment and the related impact for its citizens. This will also reveal potential opportunities and gaps for spending and collaboration or partnerships with Province or other stakeholders.

The national State of Disaster, declared on 15 March 2020, has had a significant impact on the way we engage with the different role players and the respective timeframes. Most engagements took place virtually.

1.1.2 The IDP Process summarised

The IDP was drafted through public participation initiatives based on various types of engagements and participation with and by the community and stakeholders. These mechanisms include ward committees, sector engagements, meetings with interest groups, public meetings, individual engagements, as well as the Municipality's electronic complaint system. The Municipality drafted an IDP process plan to guide engagements with the various stakeholders. The process plan was made public to ensure that the community engage and participate in the compilation of the IDP and thus take an active part in the guidance of the municipality's planning and budgeting processes helping to ensure proper planning to be carried out for the disbursement of the resources necessary to conduct the municipality's constitutional duties and obligations.

Unfortunately, all stated requirements and requests cannot always be accommodated, due to limited funding, viability and the fact that local government can and should only concentrate on those functions allocated to them by the Constitution. Community needs that are the function of other spheres of government such as district, provincial and national are referred to that level of government for their interventions.

During the first series of ward committee meetings service delivery needs analysis for all wards were determined which were used as a point of departure for the public engagement sessions. In most of the poorest, disadvantaged wards the building of decent houses and the rectification of existing low income (RDP) houses, infrastructure development (streets and storm waters), street lights, tar roads and the initiation of Local Economic Development (LED) projects which focuses on job creation were unanimously identified by the communities and high on the list of priorities.

The main consideration during our 2020/21 IDP process relates to the approving of projects which reflect and address the changing needs of our communities, and the minimum internal operational demands required to keep the municipality functional. However, the balancing factor for the successful implementation of this plan will always be the availability of funds for capital projects within the municipal budget.

Prince Albert Municipality – 2020/21 IDP Review

On 30 January 2020 the World Health Organisation declared the Covid-19 outbreak a public health emergency of international concern. On 15 March 2020 the Minister of Cooperative Governance and Traditional Affairs declared a national state of disaster in South Africa in terms of Section 3 of the Disaster Management Act, 2002. On 17 March 2020 further regulations were issued by the Minister of Cooperative Governance and Traditional Affairs limiting public participation. On 23 March 2020 President Cyril Ramaphosa announced that South Africa will go on lock down from 23h59 on 26 March 2020. This declaration severely limited public participation and input in our planning processes. It was thus decided that even though Prince Albert Municipal Council approved its draft planning documents, budget and performance targets and objectives on 26 March 2020 and published same on the municipal website at www.pamun.gov.za. Comments were invited to be sent via email, personal visits to the Municipality or whatsapp-apps to the Municipal Manager. Engagements took place with the construction sector and JOC on COVID-19 related matters and a virtual SIMS engagement took place. Comments in general were directed on COVID-19 and related economic challenges. Except for the comments received from the Department of Local Government no direct IDP or budgetary comments were received.

1.1.3 Status of the IDP

This reviewed IDP is the strategic plan for Prince Albert Municipality for the period 2020/2021. The draft IDP & budget was tabled to council on, 30 March 2020 and was available for public comment until 15 May 2020. The final document was tabled to Council on 28 May 2020 for approval.

1.1.4 Legislative Framework

Framework of driving force behind the IDP Municipalities function within an extensive legislative and policy framework that provides prescripts and guidelines for municipal objectives, strategies and programmes to be implemented and aligned with municipal functions. Prince Albert Municipality realises that in order to achieve growth and development. The budget, programmes and projects must be aligned to regulatory, developmental and institutional policy directives.

- **The Constitution of the Republic of South Africa**
- **The Municipal Systems Act (MSA) Act 32 of 2000**
- **The Local Government: Municipal Planning and Performance Management Regulations of 2001** set out
- **The Municipal Finance Management Act (Act 56 of 2003) (MFMA)**

It should further be noted that the Disaster Management Act of 2002 must also be considered in this instance as the Minister of Cooperative Governance and Traditional Affairs subsequently issued a national state of disaster on 15 March 2020 with a subsequent national lock down initiated from 23h59 on 26 March 2020. The national state of disaster declaration lead to more than 80 pieces of legislation and directions being issued since 15 March 2020 in respect of numerous fields such as waste management, traffic law enforcement, health and bio-diversity. It is impossible to include all in the IDP and therefore a separate Disaster Management Covid-19 action plan and operational plan for the Municipality was drafted and is continuously being updated.

1.1.5 Key planning and policy directives

One of the key objectives of IDP is to ensure alignment between national and provincial priorities, policies and strategies (as listed below):

- The 2030 Agenda for Sustainable Development Goals
- National Development Plan Priorities (2030 Vision)
- Medium Term Strategic Framework
- National Spatial Development Perspective
- National Key Performance Areas
- National Outcomes
- Provincial Strategic Objectives

The Sustainable Development Goals

The Sustainable Development Goals and targets will stimulate action over the next 15 years in areas of critical importance for humanity and the planet. The municipality's IDP should be responsive to the programmes and actions identified for each Sustainable Development Goal. The municipality is committed to the goals and will plan in accordance, in terms of significantly addressing the plight of poor people and broader development objectives.

The National Development Plan: In 2012, the National Cabinet adopted the National Development Plan (NDP), to serve as a blueprint for the work that is still required to achieve the desired results in terms of socio-economic development and the growth throughout South Africa by 2030. Prince Albert Municipality endorses the thrust of the National Development Plan and has aligned its development strategies and resources to bring about optimal growth and development at all levels within the virtuous cycle.

Medium-Term Strategic Framework: Municipalities are expected to adapt their Integrated Development Plans in line with the national medium-term priorities. Each of the priorities contained in the MTSF should be attended to. Critically, account has to be taken of the strategic focus of the framework as a whole. This relates in particular to the understanding that economic growth and development, including the creation of decent work on a large scale, investment in quality education and skills development are at the Centre of the government's approach.

National Spatial Development Perspective (NSDP): The guidelines put forward by the NSDP are: (1) prioritises investment and development spending in line with governments objectives, invest and spend should maximise and achieve a sustainable outcome. (2) Spatial forms and arrangements must be conducive to achievement social and economic inclusion and strengthen nation building.

- **Provincial Strategic Plan (PSP):** The Western Cape Government has identified the following five strategic goals in its aim to contribute to the realisation of the aims and objectives of the National Development Plan: Safe and Cohesive Communities, Growth and Jobs, Empowering People, Mobility and Spatial Transformation and Innovation and Culture.

Prince Albert Municipality – 2020/21 IDP Review

Spatial Development Frameworks (Provincial and Municipal): The Prince Albert Spatial Development Framework (SBSDF) which is an overarching document in the municipal IDP must be a mirrored expression of the development intentions of the municipality as expressed in the IDP. The SDF is aligned with the PSDF.

Central Karoo District Integrated Development Plan: Section 29(2) of the Municipal Systems Act (MSA) Act 32 of 2000 clearly states that district municipalities must:

- Plan integrated development for the area of the district municipality as a whole but in close cooperation with the local municipalities in the area;
- Align its integrated development plan with the framework adopted; and its integrated development plan, taking into account the integrated development processes of and proposals submitted to it by the local municipalities in that area.

Joint District Approach

The new district-based model was first announced by President Cyril Ramaphosa. Addressing the need for a capable and developmental state, Ramaphosa said a district-based approach, which will focus on the 44 districts and eight metros nationwide, will ensure that municipalities are properly supported and adequately resourced.

The new district-based service delivery model will aim to break down the silos between the different spheres of government, in a bid to improve service delivery in the 257 municipalities across the country.

In the following table the alignment between the national, provincial, district and local government strategic objectives are illustrated.

Prince Albert Municipality – 2020/21 IDP Review

ALIGNMENT OF SUSTAINABLE DEVELOPMENT GOALS, NDP, PSG, CENTRAL KAROO AND PRINCE ALBERT STRATEGIC OBJECTIVES

2016 Sustainable Development Goals	NDP 2030	Medium Term Strategic Framework	Back to Basics Revised Chapter 9 Outcomes	WC Strategic Plan (2019-2024) Provincial Strategic Goals	2017 -2022 Central Karoo Strategic Objectives	2017 – 2022 Prince Albert Municipality’s Strategic Objectives

Chapter 2: Our Strategy

2.1 Context

The Prince Albert Municipality is currently in its 175th year and was established to serve the surrounding rural community. It serves as the service centre of the hinterland or agricultural area surrounding it and was relatively self-sufficient. The surrounding hinterlands historically determined the tasks performed and the level of performance needed in the service centre or town. The revitalizing of Prince Albert however occurred as a result of what happened country-wide and in the town itself rather than because of the link between the town and its rural hinterlands.

The newly elected Council of Prince Albert Municipality, elected in August 2016, affirmed the strategic intend of the Municipality and expressed their dedication to the growth and development of Prince Albert

Vision

Prince Albert, an area characterised by high quality of living and service delivery.

Mission

To create an enabling environment that achieves our vision, in the delivering of quality and sustainable services, to our community.

2.2 Development Strategy

- To ensure a sustainable Prince Albert, where all sectors is aligned for the betterment and benefit of the municipal area as a whole;
- To create an enabling environment for the inhabitants of Prince Albert towards guaranteed job opportunities and thus a better livelihood and citizen satisfaction;
- To harness social, technical, economic and environmental innovation to the benefit of Prince Albert municipal area;
- To enable, promote and facilitate the education of our community in order to establish a high level of knowledge economy in Prince Albert municipal area;
- To enable the facilitation of an employable, citizen centric, responsible and caring community;
- To encourage responsible account payment in order to maintain and improve communal equity;
- To establish partnerships with stakeholders in the municipal space, including the community and ward representatives, sector departments and private sector; and
- To continuously upskill staff in order to maintain levels of service and ensure expert attention to municipal activities.

2.3 Strategic objectives and priority areas

The table below illustrates the integration and coordination of the Prince Albert Municipality's strategic objectives and programmes of the sector departments aligned with the national key performance indicators. A fundamental principle of these local objectives is to create a receptive and conducive environment to achieve the national, provincial and local agendas.

SFA#	Strategic Focus Area/ National Key Performance Area	SO#	Strategic objectives	Key Performance Area	KPA#
SFA 1	Basic service delivery	SO 1	To promote sustainable integrated development through social and spatial integration that eradicates the apartheid legacy	Environmental & spatial development	KPA 1
		SO 3	To promote the general standard of living	Social Development	KPA 3
		SO 4	To provide quality, affordable and sustainable services on an equitable basis.	Basic service delivery & infrastructure development	KPA 4
SFA 2	Local Economic Development	SO 2	To stimulate, strengthen and improve the economy for sustainable growth.	Economic development	KPA 2
SFA 3	Municipal financial viability & transformation	SO 5	To maintain financial viability & sustainability through prudent expenditure, and sound financial systems.	Financial sustainability & development	KPA 5
SFA 4	Municipal transformation & organisational development	SO 6	To commit to the continuous improvement of human skills and resources to deliver effective services	Institutional development & transformation	KPA 6
SFA 5	Good governance & Public participation	SO 7	To enhance participatory democracy	Good governance and public participation	KPA 7

Chapter 3: SITUATIONAL ANALYSIS

Source: Stats SA, 2011

3. Situation Analysis

The demographics, a decisive factor in shaping our current socio-economic reality and critical for government, economists and politicians, is based on the Socio-Economic Profile (2018).

3.1 Description of Prince Albert

Prince Albert lies on the south edge of the Great Karoo, nestling under the majestic Swartberg Mountains. Prince Albert was found in 1762 on the loan farm De Queek Vallei with Zacharias De Beer as its first incumbent. Originally known as Albertsburg, when it obtained municipal status in 1845 it was renamed Prince Albert in honour of Queen Victoria's consort, Prince Albert of Saxe-Coburg.

The village has many well-preserved Cape Dutch, Karoo and Victorian buildings, thirteen of which are National Monuments. There are several olive farms and other very large export fruit farms in the area, as well as sheep farms, an export mohair trade. Birding, hiking, cycling and stargazing are other pursuits for visitors. The area is well known for its hardy endemic veld plants and is frequently a destination for botanists from all over the world. Visitors also enjoy excellent dining on fine Karoo lamb and cheese from the local dairy.

3.2 Population

According to the Department of Social Development's 2018 projections, Prince Albert municipal area currently has a population of 14 609, rendering it the second smallest municipal area within the Western Cape. This total is estimated to increase to 15 613 by 2024 which equates to an a 1.1 per cent growth rate, slightly lower the estimated population growth of the CKD of 1.4 per cent (SEP, 2019:5).

3.2.2 Age distribution

Year	Children: 0-14 Years	Working age: 15 - 65 Years	Aged: 65+	Dependency ratio
2019	4 172	8 829	1 068	59.3
2022	4 091	9 137	1 140	57.3
2025	4 133	9 474	1 215	56.4

Source: SEP report 2019

The above table depicts the population composition regarding age cohorts. The total population is broken down into three different groups: Age 0 - 14: children; Age 15 - 65: working age population; Age 65+: seniors. The comparison with the base year of 2019 and the estimated numbers for 2025 show a growth in the percentage of seniors (aged 65+) relative to the other age cohorts but more specifically for the working age cohort (15 - 65 years).

This is an important factor in the calculation of the dependency ratio. In Prince Albert, this ratio was 59.3 in 2019 and will decrease to an estimated 56.4 in 2025. This ratio expresses the dependency of people who are part of the workforce (age 15 - 65) and those, who are depending on them (children and seniors). A higher dependency ratio means a higher pressure on social systems and the delivery of basic services. This in turn must be budget for in terms of delivery of services.

3.3.3 Early Childhood Development (ECD)

There are five (5) ECD Centres in the Prince Albert area, three (3) in Prince Albert, one (1) in Leeu-Gamka and one (1) in Klaarstroom. The communities especially, Leeu Gamka highlighted the need for an ECD facilities in the Bitterwater area hence the risk of children moving over the N1 to attend the ECD centre.

3.3 Health

Area	PHC Clinics		Community Health Centres	Community day centres	Hospitals		Treatment sites	
	Fixed	Non-fixed			District	Regional	ART clinics	TB Clinics
Prince Albert	2	3	0	0	1	0	3	6

Source: 2019 SEP report

In terms of healthcare facilities, Prince Albert had 5 primary healthcare clinics (PHC) in 2019, which comprises of 2 fixed and 3 mobile clinics. In addition, there are also 1 district hospital, as well as 3 Antiretroviral treatment clinics/sites and 6 Tuberculosis clinics/sites.

3.3.1 EMS

Access to emergency medical services is critical for rural citizens due to rural distances between towns and health facilities being much greater than in the urban areas. Combined with the relatively lower population per square kilometre in rural areas, ambulance coverage is greater in rural areas in order to maintain adequate coverage for rural communities.

Provision of more operational ambulances can provide greater coverage of emergency medical services. Prince Albert, has 1 ambulance per 10 000 inhabitants in 2017 which is on par with the District average of 1 ambulance per 10 000 population. It is worth noting that this number only refers to Provincial Ambulances and excludes all private service providers.

3.3.2 HIV

AREA	ART clients that remain with treatment month end		NUMBER OF NEW ART PATIENTS		HIV TRANSMISSION RATE	
	2016/17	2017/18	2016/17	2017/18	2016/17	2017/18
PRINCE ALBERT	294	303	42	40	0.0	0.0
CENTRAL KAROO	1631	1884	299	292	1.4	0.0

Source: 2018 SEP report

Patients receiving antiretroviral treatment in Prince Albert increased by 9 between 2016/17 to 2017/18. The 303 patients receiving antiretroviral treatment are treated at 3 clinics/treatment sites. A total of 1 884 registered patients received antiretroviral treatment in CKD in 2017/18. Prince Albert, with 303 patients represent 16.0 per cent of the patients receiving ART in CKD. The number of new antiretroviral patients decreased to 40 in 2017/18 from 42 in 2016/17. The HIV transmission rate for the Prince Albert area remained at zero over 2016/17 and 2017/18.

3.3.3 Tuberculosis (TB)

Prince Albert experienced a decline in the number of tuberculosis (TB) cases. Prince Albert, with 124 TB patients in 2017/18 compared to 130 in 2016/17 represents 23.4 per cent of the TB

patients who are treated in the treatment sites in the CKD. The TB patients are treated in 6 TB clinics or treatment sites.

3.5 HOUSEHOLDS

In order to ensure basic service delivery to all, municipal budget allocations should be informed by credible and accurate assumptions regarding the number of households within a municipal area. Access to formal housing and services in Prince Albert is measured against a total number of households of 3 578 in 2011 and 4 183 in 2016. Prince Albert experienced a higher growth rate in the number of households from 2011 to 2016 relative to the Central Karoo District.

AREA	2011	2016	AVERAGE ANNUAL INCREASE	AVERAGE ANNUAL GROWTH 2011 - 2016
PRINCE ALBERT	3 578	4 183	121	3.2%
CENTRAL KAROO DISTRICT	19 076	21 980	581	2.9%

SOURCE: SEP REPORT 2018

3.5.1 ACCESS TO HOUSING

Standard definition: Households with access to a formal dwelling

AREA	2011	2016	TOTAL INCREASE 2011 - 2016	AVERAGE ANNUAL INCREASE	AVERAGE ANNUAL GROWTH 2011 - 2016
PRINCE ALBERT	93.9%	91.8%	479	96	2.7%
CENTRAL KAROO DISTRICT	97.0%	97.8%	3003	601	3.1%

SOURCE: SEP REPORT 2018

The number of formal dwellings in Prince Albert increased by 3 003 between 2011 and 2016, at an average annual rate of 2.7 per cent, which translates into approximately 601 additional formal dwellings per year over this period. This increase in formal dwellings was however unable to keep pace with the growth in the total number of households, resulting in the proportion of formal households declining slightly from 93.9 per cent in 2011 to 91.8 per cent in 2016.

The need for housing must however be balanced with the availability of sustainable resources such as water. It is thus imperative that integrated human settlements be undertaken in a cohesive manner that addresses not only the imbalances of the past, but considers the sustainability of existing natural resources. The current drought is placing pressure on the provision of houses to the communities.

The Municipality continued with their endeavour to restore human dignity to the community with the continuation of the title deed restoration project and applying for funding for the replacing of outer toilets with toilets added to houses.

3.5.2 INDIGENT HOUSEHOLDS

The objective of the indigent policies of municipalities is to alleviate poverty in economically disadvantaged communities.

AREA	2017	2018	2019
PRINCE ALBERT	900	1057	1167

The Prince Albert municipal area experienced an increase in the number of indigents between 2016 and 2018, implying an increased demand for indigent support and additional burden on municipal financial resources. For the 2019/20 financial year, the municipality has made provision for 1 100 indigent households, which amounts to R5 112 620.00. Due to the impact of COVID-19 this number is estimated to significantly increase in the 2020/21 financial year. An estimate of 1 400 indigent households will be budgeted for.

It should also be noted that the Municipality, together with Department of Local Government and Environmental Planning provided food relief parcels to the most vulnerable within the municipal area during the months of April, May and June 2020. Due to cash constraints the Municipality will not be able to continue to do so after July 1, 2020.

3.5.3 ACCESS TO WATER

Given Prince Albert municipalities current drought situation, great focus is currently placed on water availability and supply. This goes hand in hand with due consideration for water quality. Access to safe potable water is essential to prevent the contraction and spread of diseases and maintaining a healthy life.

STANDARD DEFINITION: Households with access to piped water inside the dwelling or yard or within 200 metres from the yard.

AREA	2011	2016	TOTAL INCREASE 2011 - 2016	AVERAGE ANNUAL INCREASE	AVERAGE ANNUAL GROWTH 2011 - 2016
PRINCE ALBERT	99.3%	97.9%	541	108	2.9%
CENTRAL KAROO DISTRICT	99.4%	95.1%	1930	386	2.0%

SOURCE: SEP Report 2017

Although Prince Albert experienced an annual increase of household access to piped water (to within 200 metres of the yard) of approximately 541 households per annum between 2011 and 2016, the proportion of households with access declined over this period from 99.3 per cent in 2011 to 97.9 per cent in 2016. This again indicating that access to piped water was unable to keep pace with the growth in the total number of households.

Due to COVID-19 Prince Albert Municipality have prioritised the provision of water on each allocated plot in the transit area of Klaarstroom. This project has been prioritised through MIG and will commence in 2019/20 financial year, to be completed in 2020/21 financial year.

3.5.4 ACCESS TO SANITATION

Access to sanitation promotes health and dignity through the provision of safe disposal and treatment of human waste. Where sanitation systems are inadequate, negative health effects can be extremely serious. The current drought highlights challenges in the use of potable water within the sanitation services process.

AREA	2011	2016	TOTAL INCREASE 2011 - 2016	AVERAGE ANNUAL INCREASE	AVERAGE ANNUAL GROWTH 2011 - 2016
PRINCE ALBERT	81.6%	95.6	1079	216	6.5%
CENTRAL KAROO DISTRICT	89.4%	95.4	3931	786	4.2%

SOURCE: SEP Report 2017

Prince Albert experienced significant progress in household access to sanitation services, as the proportion of households with access to acceptable standards of sanitation services increased from 81.6 per cent in 2011 to 95.6 per cent in 2016. The Municipality was able to provide an additional 1 079 households with access annually; access growing at an average annual rate of 6.5 per cent.

Due to COVID-19 Prince Albert Municipality have prioritised the provision of sanitation ablutions in the transit area of Klaarstroom. This project has been prioritised through MIG and will commence in 2019/20 financial year, to be completed in 2020/21 financial year.

3.5.5 ACCESS TO ELECTRICITY

AREA	2011	2016	TOTAL INCREASE 2011 - 2016	AVERAGE ANNUAL INCREASE	AVERAGE ANNUAL GROWTH 2011 - 2016
PRINCE ALBERT	86.4%	96.8%	957	191	5.5%
CENTRAL KAROO DISTRICT	89.4%	87.5%	594	119	5.6%

SOURCE: SEP Report 2017

Energy is essential for human life; generally identified household uses include energy for cooking, heating and lighting. Energy sources also have usage risks; for example, health and safety risks especially in the use of paraffin and open flame usage. The information below relates to the use of electricity for lighting purpose.

The annual growth in household access to electricity of 191 is above the total household growth of approximately 121 on average per annum. The proportion of households with access to electricity increased from 86.4 per cent in 2011 to 96.8 per cent in 2016.

Prince Albert Municipality engaged with Eskom to provide access to electricity to the informal settlement in Klaarstroom and also to backyard dwellers in Leeu Gamka and Klaarstroom. This project will commence in the 2019/20 financial year, to be continued in the 2020/21 financial year.

The Prince Albert Municipality will investigate the possibility of renewable energy and the inclusion of Small-Scale Embedded Generation (SSEG) onto the electricity distribution network so that safety, power quality, grid operation and municipal revenue issues are adequately addressed, and that the local renewable energy industry and green economy is promoted at the same time, supporting job creation. This will have a direct impact on the Municipality's income and will thus have to be done with careful consideration and input from our communities.

3.5.6 ACCESS TO REFUSE REMOVAL

Definition: Household who have waste removed by local authorities at least weekly

AREA	2011	2016	TOTAL INCREASE 2011 - 2016	AVERAGE ANNUAL INCREASE	AVERAGE ANNUAL GROWTH 2011 - 2016
PRINCE ALBERT	86.4%	96.8%	957	191	5.5%
CENTRAL KAROO DISTRICT	89.4%	87.5%	594	119	5.6%

SOURCE: SEP Report 2017

Household access to refuse removal increased from 73.4 per cent in 2011 to 95.4 per cent in 2016. Prince Albert experienced significant progress in household access to refuse removal over this period. The Municipality was able to provide an additional 1 367 households with access annually; access growing at an average annual rate of 8.7 per cent.

In an effort to ensure a safe and healthy environment the Municipality also embarked on an initiative to reduce littering by implementing a fine of R200 if a person is found guilty of littering. The Municipality will work with the private sector and the provincial government to restore a recycling project that will create jobs and minimise the waste on our landfill sites.

3.6 ECONOMIC CONTRIBUTION

In the Prince Albert municipal area, the local economy was dominated by the agriculture, forestry & fishing (R106.9 million; 22.2 per cent), general government (R105.8; 21.9 per cent) and wholesale & retail trade, catering & accommodation (R70.6 million; 14.6 per cent) sectors. Combined, these top three sectors contributed R283.3 million (or 58.7 per cent) to Prince Albert's economy, estimated to be worth R482.3. million in 2017.

Prince Albert GDP performance per sector, 2006 - 2017									
Sector	Contribution to GDP (%) 2017	R million value 2017	Trend		Real GDP growth (%)				
			2008 - 2017	2014 - 2018e	2014	2015	2016	2017	2018e
Primary sector	22.2	106.9	3.8	1.6	9.0	-2.4	-9.7	11.4	-2.2
Agriculture, forestry & fishing	22.2	106.9	3.8	1.6	9.0	-2.4	-9.7	11.4	-2.2
Mining & quarrying	0.0	-	-	-	-	-	-	-	-
Secondary sector	13.5	65.0	2.3	1.7	3.6	2.7	0.8	0.3	-0.6
Manufacturing	3.2	15.3	1.3	2.5	3.3	3.4	0.2	1.8	4.4
Electricity, gas & water	2.7	13.0	3.6	2.6	4.0	3.3	0.4	2.3	3.0
Construction	7.6	36.7	2.5	1.2	3.6	2.3	1.2	-0.9	-4.0
Tertiary sector	64.4	310.4	3.3	2.5	3.5	2.2	2.1	1.8	1.2
Wholesale & retail trade, catering & accommodation	14.6	70.6	1.6	0.1	0.8	1.5	1.0	-0.4	-4.0
Transport, storage & communication	8.5	40.8	2.6	2.6	3.5	1.6	2.4	2.1	2.5
Finance, insurance, real estate & business services	8.0	38.7	4.6	3.7	4.5	3.8	2.8	4.9	2.7
General government	21.9	105.8	4.6	3.2	5.1	2.0	1.8	1.4	2.5
Community, social & personal services	11.3	54.5	3.1	3.1	3.1	2.4	3.0	2.8	3.0
Total Prince Albert	100.0	482.3	3.2	2.1	4.8	1.1	-1.0	3.8	0.2

SOURCE: SEP Report 2019

The 10-year trend, between 2006 and 2016, shows that the finance, insurance, real estate and business services sector registered the highest average growth rate (5.5 per cent) in Prince Albert during this period, followed by the general government sector (5.3. per cent) and community, social and personal services (4.9 per cent).

A cause of concern is the fact that a significant sector, such as agriculture, forestry and fishing sector only recorded 2.8 per cent annual average growth during this period. The agriculture, forestry and fishing sector contracted in 2015 and 2016 due to the severe drought but the estimated growth rate for 2017 is a healthy 6.7 per cent.

The South African economy will feel the impact of the coronavirus significantly because it was already dealing with its own internal crisis, including a "ceiling" on the rate at which it can grow because of electricity supply interruptions. Now that the country has declared a national state of disaster to try to contain the coronavirus - a declaration that instantly put the brakes on many industries in the tourism and hospitality sector the economy will probably be flat or below zero in the first quarter, as the real impact will begin to be felt towards the end of March.

For 2020 as a whole, depending on a number of variables, including how effective local authorities will be in dealing and containing the spread of the virus, the economy will likely contract by 1% to 3%.

3.7 LABOUR

This section highlights key trends in the labour market within the Prince Albert municipal area, beginning with a breakdown of skills of the labour force, followed by employment numbers per sector as well as the unemployment levels. The majority of workers in the Prince Albert labour force in 2016 was dominated by low skilled workers (46.4 per cent) and only 16.3 per cent were skilled.

The number of skilled workers increased much more than that of semi-skilled workers during the period 2006 – 2016, while a decrease was experienced in the number of low-skilled workers. An improvement in education and economic performance can contribute to a further decrease in low-skilled workers.

The agriculture, forestry and fishing sector contributed the most jobs in the Prince Albert municipal area in 2016 (1 399 or 37.0 per cent), followed by the community, social and personal services (623 or 16.5 per cent), wholesale and retail trade, catering and accommodation sector (603 or 16 per cent); general government (567 or 15.0 per cent) and construction (239 or 6.3 per cent). Combined, these top five sectors contributed 3 431 or 90.8 per cent of the 3 778 jobs in 2016.

With the Covid-19 national state of disaster declared on 15 March 2020 and the subsequent national 21-day lock down, our hospitality and tourism sectors, the building blocks of our economy, will be severely affected. The role of the UIF Disaster Benefits will be crucial to help secure jobs, but the reality remains that the local economy of the municipal area will be severely crippled.

3.8 SHALE GAS EXPLORATION

A policy statement regarding Shale gas development in the Karoo basin

Background

The use of hydraulic fracturing (commonly known as “fracking”) to extract shale gas deposits (SGD) in the Karoo Basin is undoubtedly one of South Africa’s more contentious proposals in the last decade. The intense deliberations between various parties on this topic have exposed the public to a wide range of information on the matter. To date, SGD is still only a theoretical proposal within the Karoo Basin. Most notably, there is limited evidence that shale gas reserves can be viably recovered within the Karoo Basin, and estimates of shale gas reserves vary widely.

While much of the debate on SGD to date has focussed on the production phase of shale gas (of which hydraulic fracturing is an integral part), it must be emphasised that, at present, only applications for exploration rights in terms of the Mineral and Petroleum Resources Act, 2002 (“MPRDA”) have been lodged.

In light of the aforementioned dearth of evidence for the Karoo Basin, the extent and viability of these gas reserves, as well as the characteristics of their subsurface environment, can only be known with satisfactory levels of certainty by means of exploration, that is, drilling into the target shale deposits and, if hydrocarbons are encountered, undertaking a limited amount of hydraulic fracturing.

Information gathering and evidence-based policy development remain key priorities for providing relevant information upon which decisions can be taken.

There is inadequate information to support or oppose full or large-scale production of shale gas. DEA&DP does however, acknowledge that the need for information necessitates the commencement of exploration.

3.9 SWOT ANALYSIS

The following table illustrates the Prince Albert municipality’s main strengths, weaknesses, opportunities and threats that are based on the municipalities seven strategic goals:

<p>Strengths</p> <ul style="list-style-type: none"> • Relatively low crime • Tourism destination • Good Agricultural sector • High temperatures • Well managed town • Stable political environment • Functioning ward committees • Stable community • Good public participation record • Audit committee established and functional • Clean environment • Close to national roads, N1 & N12 • Silent and calm environment • Popular place for adventures sports, cycling routes and hiking trails 	<p>Weaknesses</p> <ul style="list-style-type: none"> • Some rural communities still have gravel roads • Potholes in some areas • Inadequate storm water drainage in some areas; • Ageing service infrastructure • Water storage capacity • Limited public transport options • Limited marketing • Professional capacity shortage • Division in the private sector, rather than cooperation • Objections to reasonable and needed development • Geographic isolation • Apartheid spatial legacy
<p>Opportunities</p> <ul style="list-style-type: none"> • Many development opportunities • Improve Public Transport Capitalising on the Extended Public Works Programme • Strategic partnerships • SMME Development • Agri-processing • Precinct development 	<p>Threats</p> <ul style="list-style-type: none"> • Covid 19 pandemic • HIV & AIDS • High unemployment • Increase in crime • ESKOM price increase • Government Grant Dependency • Increasing climate change, Droughts • Brain drain

Chapter 4: PAST PERFORMANCE

4.1 Introduction to highlights of the past year

The Municipality has four wards with functional and trained ward committees. The ward committees play an integral role in mobilizing the community around the drought management strategy of the Municipality. The ward committees had ward committee summit on 30 October 2019 as part of the Municipality's capacity training sessions.

The Municipality has a well-functioning public participation strategy to inform and mobilize the community around key service delivery and planning matters. Unfortunately, the weekly radio slots on the local radio station could not continue due to difficulties on the side of Radio Gamkaland. The previous partnership with Radio Gamkaland was seen as very valuable and the Municipality will look to restore this initiative in future.

The ward councillors are also very active with WhatsApp groups that supports the municipality's official communication mechanisms.

To avoid Day zero, water use must be reduced in all areas and an investigation into the ground water availability must be undertaken. Artificial recharge possibilities must be investigated, the sunken boreholes must be equipped and if possible, an additional reservoir on the North End side of Prince Albert must be established. To ensure effective management of water resources and emergency situations, a fully functional telemetric system will be needed. The Municipality applied to Water Service Infrastructure Grant to equip the boreholes but will need additional funding for the telemetric system and additional reservoir at North End.

4.2 Water

Highlights: Water Services

Highlights in respect of Water services are indicated below.

Highlights	Description
Water week	Awareness campaign was done in partnership with the Breede Gouritz Catchment Agency and a visit was brought to scholars in Prince Albert & Klarstroom on 20 & 22 March respectively.
Effective Drought management during summer months	The Department of Local Government provided funding to undertake several drought relief projects such as the first phase of the iron removal plant, the upgrade of the water treatment works in Klarstroom, the implementation of water telemetric systems and skills transfer on improved water demand. Water restrictions level 4 was implemented on January 2019 and drought tariffs was effective from February 2019 till present. It should be noted that with the public awareness campaign water use was reduced and no water services were disrupted in Prince Albert as per previous seasons.
Drought proclamation	Funding was secured for emergency drought relief in the form of additional boreholes and farmers were also supported with feed for their animals.

DRAP	A Drought Recovery Action Plan committee was established on district level to coordinate and monitor drought related projects. This is still in operation
------	---

Table : Water Services Highlights

4.3 Waste water (sanitation) provision

Introduction to Sanitation Provision

The four towns in the PAM area each have their own wastewater collection and treatment facility. Prince Albert, Klaarstroom and Leeu-Gamka have oxidation pond systems for WWTW, whereas Prince Albert Road is served by a communal septic tank and soak-away.

Klaarstroom

The sanitation system for Klaarstroom comprises a full waterborne system. The Klaarstroom WWTW does not hold any permit or license but function under a general authorisation. Wastewater is screened in town and pumped to the WWTW. The works has a design capacity of 50 kl/day and was constructed in 1970. It consists of an anaerobic pond and an oxidation pond with the final effluent overflowing into the adjacent field. The Municipality is in the process of upgrading the WWTW by rebuilding the inlet works to provide for screening, dual grit removal channels and flow measurement. Two new anaerobic ponds will also be erected. This project will be completed by 30 June 2020.

Improved ablution blocks in the Klaarstroom transit areas is to be prioritised due to the COVID-19 outbreak.

Leeu-Gamka

The treatment works is a pond system comprising: Four primary ponds operating in parallel. The WWTW was originally constructed in 1985 with a design capacity of 140 kl/ day; however, it was recently upgraded to provide for the upcoming 251 houses and the Transnet area. Final effluent is used for irrigation into the adjacent field. The main of this project is still unfunded and needs to be upgraded so as to eradicate the bucket system. Funding to relieve the residents of the Transnet areas from the bucket system is still needed and the Municipality is collaborating with the Department of Human Settlements to provide bulk infrastructure in this respect. The wastewater is screened at the pump station before being pumped to the WWTW. The night fall (buckets) are deposited in a manhole upstream of the central pumping station. The buckets are washed and stored at the central pumping station.

Prince Albert

The Prince Albert WWTW, a pond system was designed to treat 623 kl/day (with the final effluent being used for irrigation at the adjacent nursery, or it is discharged uncontrolled to the lower lying areas adjacent to the site. The sanitation system consists of a waterborne system as well as septic tanks. These septic tanks are serviced by means of a sanitation team with appropriate equipment and vehicles who collect sewerage and deposit it into a pump network that is connected to the waterborne network. The WWTW was upgraded to provide for the planned 350 RDP housing units of which 254 was built as a first phase.

Highlights: Waste Water (Sanitation) Provision

The following table depicts the highlights in respect of sanitation services for the reporting year.

Highlights	Description
Approvals and installations of new connections	More people connected to waterborne systems.
Upgrade of Waste Water Treatment Works in Klaarstroom	Inlet of septic tank construction completed
Appointment of Water Process Controllers	Water Process Controllers was appointed with several being enrolled in a MISA programme as part of skills development

Table: Waste Water (Sanitation) Provision Highlights

Challenges: Waste Water (Sanitation) Provision

The following table depicts the challenges in respect of sanitation services within the reporting year. The Municipality continually encourage residents to connect, where possible, to the sewerage reticulation network so as to move away from the operational costs. The performance of this division correlates closely with an available maintenance budget, with particular reference to the honey sucker vehicles.

Description	Actions to address
Licensing of WWTW's	Currently operating under general authorisation. Funding to be sourced
Septic and Conservancy tanks in South End	Source funding to connect to waterborne system
Scheduled sewerage suction hampered by breakages on honey sucker due to aged vehicles	Scheduled maintenance on equipment with Leeu-Gamka's equipment as standby but breakages happens often.
Need to eradicate bucket system in Transnet areas	Funding needed to address bulk infrastructure shortcomings and to connect Transnet areas to sanitation network

Table: Waste Water (Sanitation) Provision Challenges

4.4 Electricity

Introduction to Electricity

The municipality provides a reliable service within NERSA specified limits within the area of supply. In the areas of Klaarstroom and Leeu-Gamka, electricity is directly supplied by ESKOM,

thus impacting on revenue collection and the implementation of Prince Albert Municipality's credit control and debt collection policy. This is detrimental to the municipality's sustainability as is evident in the low payment rate in these areas. Several efforts have been made by the Municipality to conclude a credit collection agreement with SALGA but this was unsuccessful. SALGA is currently driving this process and have obtained a legal opinion stating that electricity distribution is a municipal function as per the Constitution and that Eskom can only provide said services by agreement. This proposed agreement will then include a clause on debt collection and can have a major positive change in the finances of especially rural municipalities.

Illegal electricity connection within residential areas remains a concern and the Municipality will be undertaking door to door visits to monitor the situation on an ad hoc basis.

The Municipality engaged with Eskom to provide electricity to backyard dwellers and the informal settlements.

Highlights: Electricity

The following highlights pertaining electricity provision during the reporting financial year are emphasised.

Highlights	Description
Skilling of electrician	An in-house electrician was sent for training and skills development to improve capacity
Data verification process	Data verification process undertaken by external service provider
Pre-paid electricity for backyard dwellers	Pre-paid electricity was negotiated for Klaarstroom informal settlements and backyard dwellers in the Eskom service delivery areas

Table: Electricity Highlights

4.5 Housing

Prince Albert Municipality supports the following objectives in respect of housing

- Promotion of equal access to housing for Prince Albert residents
- Transparency
- Prevention of unfair discrimination
- Promotion of fair administrative justice
- Apply the principle of "first come first serve" subjected to approved framework
- Proper recording of all housing applicants

It is important to note that recent national and provincial policy directives indicate that persons older than forty years will receive preference in future. In Prince Albert municipal area people earning less than R3 500 per month per household can qualify for a normal housing subsidy, while GAP housing applicants can qualify if they earn between R3 501 and R15 000 per-month.

As per provincial directive preference will be given to persons older than 35 years, when allocating housing top structures.

The housing waiting list for the whole of Prince Albert Municipality's jurisdiction reflect 1 364 people against 2019/20 1 381 applicants. This increase in the waiting list can be attributed to the fact that the waiting list is updated annually in each town and more and more applications are received.

Klaarstroom

The Klaarstroom Informal Settlement is the biggest in the municipal area with 30 structures with average 4-5 residents per structure. Residents have access to one communal tap and water at this tap adhered to the bacteriological standards of SANS 241 when tested. Residents share three flush toilets amongst themselves. Some of the structures use solar panels for energy, but most use wood. Storm water ditches and intakes are present with adequate drainage. No health nuisance occurred.

Prince Albert

Prince Albert Informal Settlement exists of thirty-five (35) informal structures. The two informal structures at the nearby cemetery have been relocated to Tortelduif Street which is a more formalised informal settlement. The ablution facilities at the informal settlement was recently upgraded. The Municipality is also looking towards the extension of the informal settlement with an additional 100 enhanced service sites.

The Western Cape Government: Human Settlements indicated in January 2020 that the following housing pipeline for Prince Albert municipal area is supported.

DELIVERY PLAN		2020/2021			2021/2022			2022/2023		
25 November 2019	PROGRAMME									
2019/20 - 2023/24 HSDG		SITES	HOUSES	FUNDING	SITES	HOUSES	FUNDING	SITES	HOUSES	FUNDING

Housing Pipeline

The Housing Database is continuously cleaned to avoid duplication and the housing officials trained in the improved use of the housing data base. Letters were issued to those that are included on the housing waiting list but have previously owned property or a portion of property as well as previous beneficiaries. Continuous data cleansing has been done through community outreaches.

Challenges: Housing

The following challenges in respect of housing during the reporting year are:

Description	Actions to address
R 21 million still needed for the Transnet bulk infrastructure and upgrade of Transnet houses	Apply to province for more funding.
Compilation of Integrated Human Settlement Plan due to capacity constraints	Referred to 2019/20 financial year to align with SDF review in terms of SPLUMA
Increasing waiting list	Funding applications to Province
Need for middle class housing is sharply increasing	Apply for CRU funding instead of GAP funding
Beneficiary administration	Due to challenges in respect of external beneficiary administration it was decided that beneficiary administration will be conducted internally in future
Re-location of Klaarstroom transit area	Application to be lodged
Need for toilets connected to houses	An application was submitted to the MEC

4.6 Waste management

Introduction to Waste Management

Waste is collected on a weekly basis and each service point is supplied with black bags by the municipality. In order to better manage distribution households are encouraged to collect the bags at the Technical offices. Prince Albert has three waste removal vehicles: a Kia 2.7l small truck equipped for daily collection of refuse, a 2.7l Kia small truck equipped for garden refuse and a Tractor for the removal of domestic waste in Leeu-Gamka. The waste collection in Klaarstroom and Prince Albert Road is managed from Prince Albert. A new refuse truck has been purchased and brought into operation in April 2019.

There are five existing mini-transfer stations for garden waste disposal in the North End of Prince Albert. These facilities have been fenced during the reporting year, but are not designed nor intended for household waste. Unfortunately, they are being used as general waste depots opposed to garden waste depots as it was originally intended. The residents of North End do not have large gardens and thus generate insignificant volumes of garden refuse. The Municipality uses the CWP program as well as other EPWP programmes to manage the mini-transfer stations. Illegal dumping still proves to be a challenge in some of the areas. Residents are encouraged through the ward committee system to report such transgressions.

All landfill sites in the municipal area are licensed. The landfill sites are prone to smouldering and the Fire Prevention staffing component closely monitors this on all landfill sites within our boundaries. Inspections undertaken by the Western Cape Government: Environmental Affairs and Development Planning during the year in respect of the landfill site in Prince Albert indicated that no ethane gas was detected.

RECOGNISING that both the National Department of Environmental Affairs and the Municipality have a responsibility of ensuring that environment is conserved and protected for the achievement of socio-economic development goals and future generations;

ACKNOWLEDGING that the Municipality does not have adequate capacity to execute the environment management functions, thus the need of support from the National Department of Environmental Affairs;

RECOGNISING the need of support by Municipalities, the National Department of Environmental Affairs established its local government support programme which focuses on ensuring integration of environmental management in the Integrated Development Plans (IDP's), implementation of environmental programmes, capacity building of municipal officials responsible for environment functions;

CONFIRMING that the National Department of Environmental Affairs will place officials (youth environment graduates) within selected municipalities to provide support to municipalities in the coordination and implementation of ward and school based environmental education and awareness and other environmental related functions and programmes; place the Officials within the Municipality to coordinate ward based environmental education and awareness programme and also provide support to the Municipality in executing the environment management mandate under the guidance of managers responsible for environment functions in the Municipality. Mr Njabulo Ncogobo was placed at Prince Albert Municipality in the 2019.

Waste Management Licensing

The Prince Albert Local Municipality has three (3) operational and licenced Waste Disposal Facilities (WDF); which are Prince Albert WDF, Leeu Gamka WDF and Klaarstroom WDF. The poor condition of these WDFs is a major concern. Areas which require urgent attention at these Facilities relate to storm water management, windblown litter and access control.

Prince Albert WDF

The waste disposal facility is audited annually by the Department of Environmental Affairs and though air space is extremely limited, management of the site has improved significantly. Access control remains a challenge at all facilities and in the case of Prince Albert lead to the waste site catching fire, resulting in residual burn and smoke for longer than 30 days. The airspace at this site is extremely limited and the municipality will be implementing a redesign of this site so that airspace for several years more is accomplished. It must be noted that waste classification was undertaken at all the sites and the results will in the end be included in the reviewed Integrated Waste Management Plan. The total cost of required infrastructure to enable the Prince Albert WDF to comply with conditions of the permit/waste management license will be approximately R3 996 656.17.

Leeu Gamka WDF

The waste disposal facility is audited annually by the Department of Environmental Affairs and though air space is extremely limited, management of the site has improved significantly. Access control remains a challenge at all facilities and in the case of Leeu Gamka lead to the waste site catching fire on several occasions. This facility neighbours a game farm with windblown litter causing a nuisance. EPWP workers clean the neighbouring game farm thrice weekly. The airspace at this site is sufficient. It must be noted that waste classification was undertaken at all the sites and the results will in the end be included in the reviewed Integrated Waste Management Plan. The total cost of required infrastructure to enable the Leeu Gamka WDF to comply with conditions of their permit/waste management licence will be approximately R3 564 900.00.

Klaarstroom WDF

The waste disposal facility is audited annually by the Department of Environmental Affairs and though air space is extremely limited, management of the site has improved significantly. Access control remains a challenge at all facilities. The airspace at this site is sufficient for the Klaarstroom community. It must be noted that waste classification was undertaken at all the sites and the results will in the end be included in the reviewed Integrated Waste Management Plan. The total cost of required infrastructure to enable the Klaarstroom WDF to comply with conditions of the permit/waste management licence will be approximately R2 226 497.92.

4.6.1 Recycling

The town of Prince Albert recycling facility is currently non-operational, due to internal capacity constraints. The communities of Klaarstroom and Leeu Gamka requested the initiative in their

towns. The Waste Characterization studies for Prince indicate that the 2020 diversion target of 20% can be achieved with the diversion from landfill of:

- Recovery for recycling (assume 6% diversion – continue supporting Pick A Piece and private recyclers)
- Composting of all organic waste (30% diversion –IWMP- would require wet and dry source separation)
- Use of all C & D Waste as cover material (unknown quantity)

A total diversion in excess of 20% is therefore possible with the above three technologies, but the following infrastructure would be required:

The Municipality is currently investigating a partnership in establishing a drop off facility for used motor oils and cooking oils.

Composting facility in Prince Albert

The 2014 Department of Environmental Affairs and Development Planning waste characterization study indicate the monthly organic waste quantity (both food waste and garden waste) to be approximately 60 tonnes per month which is well below the “imperical” 350 tonnes per month threshold for financially sustainable composting. The composting facility near Prince Albert would cost an estimated R3 750 000.

Required infrastructure up to 2030

Drop-off at Leeu Gamka and Klarstroom

The purpose of a public drop-off is to provide a community with a facility where they can drop-off the waste that they do not put out for weekly collection. It also provides the opportunity to separate waste streams like garden waste, C & D waste and recyclables.

A public drop-off facility in Leeu Gamka and Klarstroom, each with 30m³ hook lift containers, would not require a waste management licence and neither would it trigger the Norms and Standards for Waste Storage Facilities since it would have a designed capacity of less than 100m³. The cost to construct such a Public Drop-Off in Leeu Gamka is estimated at R2 513 000 and Klarstroom’s cost will be the same.

Gas detection on landfill sites

The Department of Environmental Affairs and Development Planning: Sub Directorate Waste Management Licensing from time to time conducts WDF gas detection exercises at Prince Albert Municipality’s landfill sites. To date no concerns has been detected during gas detection exercises, which bores well not only for landfill compliance but Air Quality compliance as well.

Challenges to Integrated Waste management include:

- Review and implement the Integrated Waste Management Plan
- Develop a clear asset maintenance and management programme.
- Waste minimization strategies and the development of a waste management plan for the next 5 years.
- Securing landfill site equipment to maintain the landfill sites.
- Ensuring access control to the landfill sites.

All landfill sites in the municipal area have been registered with the Department of Environmental Affairs.

4.7 Free basic services and indigent support

Introduction

A debtor is considered indigent if the total monthly household income is R3500 or less. All indigent households individually receive 6 kl water and 50Kwh electricity free each month. Furthermore, an indigent debtor also receives a subsidy on refuse removal and sewerage, rates and the availability charge in respect of water. All indigents have to renew their applications annually in order to qualify for the benefits.

The table indicates the percentage of indigent households that have access to free basic municipal services. In accordance with the approved indigent policy of the municipality, all households earning less than R3 500 per month will receive the free basic services as prescribed by national policy. The municipality has made provision for 1100 indigent households in the 2019/20 financial year, which amounts to R5 112 620.

4.8 Roads

The total roads in municipality amount to 1 741.2 kilometres of roads. The total amount of roads comprises of 257.6 (14%) kilometres of surfaced roads and 1 483.6 (85.2%) kilometres of gravel roads.

The maintenance of the roads within the municipal area remains a challenge with a limited operational budget. The neglect of several years has since culminated in a situation that requires more maintenance and capital expenditure than the limited budget of Prince Albert Municipality can afford.

It is imperative that an agreement be reached with the Department of Public Works whereby the Municipality can lease some of the aforementioned equipment to undertake critical maintenance. The maintenance of roads has become a crucial service delivery issue connecting directly to the municipal areas main economy sectors, namely agriculture and tourism.

Challenges: Roads

The following challenges in respect of the road's division are provided in respect of the reporting financial year.

Description	Actions to address
Pothole repairs	An amount of R200 000 was budgeted for 2019/20
Maintenance on gravel roads	Resources and capacity must be budgeted
No alternative drive through town than main road	Source funding to upgrade Mark street and/or De Beer Street. Long term solution.
Trees in De Beer Street, Prince Albert needs to be trimmed	Liaise with environmental expert on maintenance of De Beer Street trees

Storm water channels old and do not cater to the need of the growing town	MIG application to be drafted for funding for upgrade of storm water system
---	---

Table: Roads Challenges

4.9 Storm water

Prince Albert South

Prince Albert is nestled in the Dorps River valley. The settlement is built at the foot of the hills and is divided into two areas – Prince Albert North (PAN) and Prince Albert South (PAS). PAS is the business district and businesses combined with residences whilst PAN is a residential area developed in recent years to accommodate the growing population. PAS has an extensive system of furrows used for the primary purpose of irrigation. The water is sourced from the nearby Dorps River. These furrows act as storm water channels during storm events. In addition to the furrows PAS has open storm water channels. The furrow system is operated using a system of sluice gates which are opened during major flood events Storm water in PAS drainage paths during a storm event are indicated below:

- Storm water flows east-west down the hills to towards PAS and the streets of Klip, Bank and Nieuwe Street
- Storm water then flows down the side streets from Klip, Bank and Nieuwe east-west into Church Street
- The storm water from these upper streets are collected via storm water channels and furrows in Church Street
- The storm water from Church Street passes from the main channel into channels on De Beer, Pastorie and Meiring and Stockenstroom Street.

PAS lies on the foot of a hilly region to the east of the town. The town uses overland flow and open channels to convey the storm water. However, when there are high intensity storms the town experiences flash flooding. The following issues attributing the storm water problem were identified:

- Poor conditions, slopes and gradients of channels
- No clear storm water system routing for minor and major flood events
- Poor drainage in open spaces between households
- Poor maintenance of existing storm water infrastructure which cause blockages of inlets and outlets.

Prince Albert North

Storm water in PAN drains during a storm event via five main drainage paths namely:

- The natural stream that flows through the northern settlement flows from Margariet Prinsloo through the gabion attenuation and gabion channel towards the R328. Storm water from Rondomskrik and Karee and Spires Street also form part of this flow.
- Storm water from Lang, Middelweg and Reguit exits via a culvert in the R328.
- Storm water from Denne and Loop exit via a culvert in the R328.

- Storm water drains from Luttig via 1st avenue to Buitenkant Street, then through an open field to a culvert in the R328. Storm water from 2nd avenue and 3rd avenue also drain towards Buitenkant Street.
- Storm water from Enslin and Arendse drain across an open field to a culvert in the R328.

The following issues attributing the storm water problem were identified:

- Poor conditions, slopes and gradients of channels
- Poor drainage in open spaces between households
- Poor maintenance of existing storm water infrastructure which cause blockages of inlets and outlets.

The Storm water network in North End is currently being upgraded. The contractor has commenced with the project in February 2019 and will be finished in June 2019.

Leeu Gamka

Stormwater in Leeu Gamka drains during a storm event via the following main drainage paths:

- The tributary flows through the gabion channel towards the R353 (green). Storm water from Duiker and Aster Street also form part of this flow. The catchment of this tributary extends approximately 2km into the mountain range to the northwest of the settlement.
- Storm water from the hills flows into Granaat, Gousblom and Stapelia Street.
- Storm water from hills to the east drain into Gousblom Street.
- Storm water from Selonroos, Pofadder drains through channels alongside Aalwyn and then through a low road crossing in Gousblom. This storm water exits from a stone pitched channel into an open field.
- The new housing has a series of channels which drain towards the east.
- Storm water from the open field adjacent to the R328 flows into the culvert under the R353.
- Storm water from 1, 4 and 7 drains through the culvert under the R328 towards the Gamka River.

The following issues attributing the storm water problem were identified:

- Poor conditions, slopes and gradients of channels
- Poor drainage in open spaces between households
- Poor maintenance of existing storm water infrastructure which cause blockages of inlets and outlets.

The upgrading of the stormwater in Leeu-Gamka has also commenced in February 2019 and is anticipated to end in June 2019.

Klaarstroom

Storm water in Klaarstroom drains during a storm event via five main drainage paths:

- Storm water from hills across the N12 drains south through a culvert and then into a storm water channel in Klaarstroom.
- Storm water from hills in Klaarstroom flows towards the R407 to the North and storm water from the southern side of the hill drains towards a natural channel to the south.

- Storm water from Klaarstroom (orange) flows into a series of channels and low-level road crossing which joins the natural storm water channel.
- Storm water from the R407 drains towards a low-level bridge crossing which drains towards the river.

The following issues attributing the storm water problem were identified:

- Poor conditions, slopes and gradients of channels
- Poor drainage in open spaces between households
- Poor maintenance of existing storm water infrastructure which cause blockages of inlets and outlets.

Klaarstroom does not have sufficient capacity to convey storm water away from the settlement. In addition, some local flooding occurs due to supercritical flow – storm water flows on Aalwyn Street into properties on other side of street.

Proposed Storm water Projects

Prince Albert South

The projects in Prince Albert South aim at creating additional hydraulic capacity in the hydraulic structures on the East in Market and Nieuwe Street as these are the backbone of the storm water system. Increase in capacity of these channels will also prevent quicker build-up of runoff into Church Street. Storm water flow diversion structures between side roads and Church Street need to be installed to prevent water from flowing into properties on the western side. Cleaning and maintenance is also required as key storm water system components such as the detention pond and channels are blocked with vegetation and debris.

Additional detention ponds will need to be developed as part of the areas allocated for future developments. The costs of the detention ponds have been lumped into one sum as the number of detention ponds and the future development design is unknown at this stage.

Prince Albert North

The projects in Prince Albert North are to storm water flow diversion structures between select roads and need to be installed to prevent water from flowing into properties and flooding the roads. Cleaning and maintenance are also required as key storm water system components such as culverts and channels are blocked with vegetation and debris.

Klaarstroom

Klaarstroom requires upgrading of existing channels to improve conveyance of water away from the town towards the natural stream. Most of the projects are for the future developments in the form of providing detention storage areas and formalising unlined channels.

Leeu Gamka

The storm water projects in Leeu Gamka are focused around building larger channels and diverting storm water flow. Some channels such as the channel in Vygie Street has to be regarded to drain water away from the households. Leeu Gamka will need to increase the storage area

before the culvert in downstream in the R353 and also use the playground at the bottom of Pofadder Street as a storage area for storm water, to accommodate future development in the town.

4.10 Planning and Local Economic Development

The Department of Economic Affairs and Tourism assisted the Municipality in developing a PACA LED strategy which was included in the IDP as possible areas for development. This strategy was found to be basic and informed by the business community of Prince Albert. It provides a good basis to develop a full-fledged local economic development strategy. The Municipality realises the need to identify catalyst projects to contribute to the establishment of an economic value chain and sustainable economic growth. While a tender was allocated for the sourcing of funding for the drafting and implementing of a Local Economic Development Strategy, no funding has been generated thus far.

The Municipality in partnership with the Department of Environmental Affairs, Rural Development and Land Reform as well as the Department of the Premier developed an Economic Education Centre that offered an Access Centre with a business hub, training and meeting facilities as well as internet access to all residents. These facilities are used optimally. Access Centres were also developed in Klaarstroom and Leeu Gamka.

The Municipality lost out on a key catalyst project when the funding for the proposed sport precinct in Prince Albert was not enough to meet the market related prices of undertaking such a project. It is however imperative that this project continues so as to allow not only direct job opportunities in the construction phase but also allows for sport and events tourism, especially in the aftermath of COVID-19. The Municipality will embark on the RSEP program that will see the first phase of the extension of the Thusong Centre. This development together with the proposed sport precinct will promote social cohesion and address the apartheid planning legacy of before. Key to the Municipality's local economic support is preference provided to local suppliers and labour-intensive job creation through the Expanded Public Works Program as well as the Community Workers Program.

Challenges: Planning

The table beneath reflect the challenges in respect of Planning for the 2019/20 financial year.

Description	Actions to address
Zoning scheme outdated	Zoning register drafted
Providing approval within 120 days	This is not possible due to the challenges in respect of a reporting newspaper, comment periods and council meetings that do not align as well as the time it takes the registered town planner to compile reports
Poor legal compliance and enforcement by Municipality	A MISA Town planning Intern was appointed and has significantly improved compliance.

Description	Actions to address
Outdated SDF	New SDF under review

4.10.1 Broadband

In order to improve access and stimulate usage of the Internet, the Western Cape Broadband Initiative will be implementing Wi-Fi hotspots at a Provincial government building in every ward across the Province over the next three years. These hotspots will allow limited free access (250 Mb per month) to any citizen, as well as allow all gov.za websites to be accessed free of charge. Wi-Fi hotspots will be installed in 15 wards across the Central Karoo. These include the already installed hotspots in each of the 3 of the 4 wards in the Prince Albert Municipality, namely the Access Centre in Prince Albert, the access centres in Leeu Gamka and Klaarstroom. A further hotspot will be connected in ward 2 at the Thusong Centre in future.

Highlights: LED

The following performance highlights with regard to the implementation of the LED strategy are:

Highlights	Description
Community gardens and subsistence farming on Treintjiesrivier and commonage	Small subsistence farming by several emerging businesses on commonage and Treintjiesrivier
Partnership with non-government sectors	Partnerships with Tourism and PACT to promote Prince Albert as destination and support local economic development
Access Centre	Allocation of 5 Access Centres to Prince Albert municipal area of which three has already been opened
EPWP workers employed	163 employment opportunities were established via the EPWP program as on 20 May 2020, while Council facilitated additional labour job opportunities with community-based projects that is funded out of the CRR.
RSEP project	The implementation of the first phase of the extension of the Thusong Centre
Approval of land use applications	Approval of land use changes for guest houses and businesses

Table: LED highlights

LED Strategy

The municipality is sourcing external funding to compile an integrated economic development strategy. Though funding has not been received, the principles of quality strategic economic planning at the municipal level includes the setting up of effective structures for managing the economic strategy process (1), preparing a good strategic analysis of the municipality (2), strategy formulation (3) and strategy implementation (4).

A key concept throughout this process is partnership: partnerships within the municipality, as well as with others outside the municipal building, with whom these four steps are undertaken together.

At present the Municipality is driving the visioning process within the community to procure communal buy-in on what type of towns we want in our areas. Once agreement can be reached on these matters, further initiatives can be built upon the results. No funding to draft and implement this strategy has been received.

LED Maturity

The Western Cape, Department of Economic Development and Tourism (WCG:DEDAT) embarked in 2012 on a benchmarking process called LED maturity assessments, Benchmarking of LED practices and performances increase awareness and insight of leaders at Municipalities about:

- Factors critical to LED success,
- Which aspects of LED practices work in the Municipality and which do not,
- The root causes of their LED failures, and
- Options to learn from other who have succeeded where they have failed

The Prince Albert Municipality's assessment was held in 2015. The improvements are commendable but much improvement is still required. Having benefitted from a PACA process, the priority is firstly to follow through on implementation. With implementation comes credibility and on-going support from stakeholders.

The 2015 assessment shows continued improvement in almost all areas. The following learning activities are proposed for the next year:

1. Focus on implementing the PACA initiatives to completion. Refer to the LED good practice guidelines to identify gaps in current practices.
2. Sharpen up the understanding of the local economy. Refer to the LED good practice guidelines to identify gaps in current practices.
3. Utilise learning opportunities offered by WCG: DEDAT, SALGA, CENLED/UWC and others.
4. Measure the results and value added and report progress to stakeholders quarterly.
5. Much can be learnt from peer municipality success stories such as George and Threewaterskloof.

The Municipality also embarked on a partnership with the University of Stellenbosch to identify strategic partnerships that will enable economic development, enhance service delivery and improve the living conditions of all residents. Two project proposals have been drafted to date and funding for these proposals remains a challenge. In March 2018 a partnership between the municipality and Gouritz Cluster Biosphere Reserve (GCBR) to collaborate on initiatives of mutual interest. A Memorandum of Agreement is yet to be signed between the two parties. A list of projects that have been identified by GCBR is attached as annexure

Municipal Farm

The farm Treintjiesrivier (portion 1 of the farm Damascus no.153 in the Prince Albert area) was purchased in 2005. The farm is situated 6 kilometres west of Prince Albert and has a harsher climatic aspect than properties situated on the east, where river systems are stronger. It is located on the edge of the mountain range and thus includes mountain land as well as 'karoo plains'. The size of the farm is 5580 hectares and includes the following resources, according to the valuation report at the time of purchase:

Summary of Agricultural Assets

Type of asset Extent	Extent (ha)	Valuators estimated
Irrigated land (lucerne)	7.0	280 000
Irrigated land (cash crops)	1.5	52 500
Dry with potential to irrigate	11.5	57 500
Grazing	5 560.3	3 058 000
Total land value		3 448 000
Accommodation		867 000
Other buildings		336 480
Dams		362 000
Total value		5 013 980

Treintjiesrivier

New lease agreements were concluded with the emerging farmers on Treintjiesrivier and the commonage. Workshops were held with the emerging farmers of Prince Albert, Klaarstroom and Leeu Gamka to identify assistance required and future objectives. The Municipality provided support to the emerging farmers on the procurement of additional live stock; emergency drought relief and obtaining identifying marks on live stock. The South African Police assisted the Municipality and farmers with the counting of livestock and advised on legal compliance in respect of livestock theft and movements. Two ladies from Treintjiesrivier won the best agricultural garden award in the Western Cape for their garden on Treintjiesrivier. Uncontrolled access and theft remain a big challenge for emerging farmers. The Municipality assigned a task team to investigate the sustainability of optimum use.

Local Economic Development Project, Klaarstroom

The Prince Albert Municipality has a Memorandum of Agreement with the Prince Albert Tourism Association in its efforts to develop and market tourism in the entire Municipal area of Prince Albert. This includes the hamlet of Klaarstroom.

Prince Albert Tourism has an office in Prince Albert, but not in Klaarstroom. Klaarstroom has much to offer tourists. It has a unique character, has a well-preserved historical core, lies at the entrance to Meiringspoort which cuts through the majestic Swartberg range and offers a potential stop for travellers along the busy N12 route, running from Emalahleni to George.

Attempts to support projects aimed at local economic development and in the tourism sector, in particular, in Klaarstroom have been hampered by the fact that there is not a facility to use as a base for such projects. One project involves a group of Klaarstroom women who want to offer traditional Karoo roosterkoek and moerkoffie to travellers along the N12.

Erf 178/31 has been transferred to Prince Albert municipality by the Department of Public works. Part of the building on the erf could be used to house a satellite tourism office with information on Meiringspoort, Prince Albert, Klaarstroom and the area.

The building could also offer a perfect base for the roosterkoek project - there are basic kitchen facilities and an area where guests can relax and enjoy their coffee and roosterkoek. The building offers protection against the weather. Members of the community have also asked that the building be an outlet for local crafts and products. All three proposals could be accommodated under one roof.

4.11 Community and Social Services

4.11.1 Libraries

Libraries are a provincial function and the municipality is performing the function on an agency basis. The function is fully funded by province. The libraries are functioning very well and enjoyed an annual circulation of 28 317, with outreaches within the community that included outreaches to the disabled, the aged, schools, etc. The library won the provincial award for the best small municipality in the Western Cape.

The satellite library at the Thusong Centre in Prince Albert established during October 2014 to be nearer to the community of North-End continued its good performance during the reporting year. The Prince Albert Library was awarded the accolade of being selected as the best rural municipality in the Western Cape during February 2016. The internet access within libraries provides valuable support to persons without these facilities and it is the learners of our local school that are the primary users of these facilities.

4.11.2 Cemeteries

Introduction

We have five cemeteries in the municipal area Prince Albert two (2), Leeu-Gamka two (2) and one (1) at Klaarstroom. There is sufficient space in all cemeteries at present but new cemeteries are needed. An electronic burial register has been compiled to address the risks of double burials.

All fatalities due to COVID-19 will be dealt with under the guidance of the necessary Health and Occupational Safety and COVID-19 regulations.

Cemeteries Challenges	
Description	Action to address
Cemetery required for Klaarstroom, Leeu Gamka and Prince Albert	Available land to be identified and zoned accordingly
Prince Albert Road in need of Cemetery	Negotiate with Farmers for land

4.12 Air Quality Control

The Air Quality Management Plan for Prince Albert Municipality has been developed to comply with the National Environmental Management: Air Quality Act 39 of 2004 (AQA) requires Municipalities to introduce Air Quality Management Plans (AQMP) that set out what will be done to achieve the prescribed air quality standards.

As detailed in the AQA a local municipality has two primary statutory obligations with which it must comply and these obligations are:-

- designate an Air Quality Officer (AQO)
- incorporate an Air Quality Management Plan in its IDP

At Prince Albert Municipality the Manager: Corporate and Community Services will be responsible for air quality management. Training needs to be provided to said official to ensure that Air Quality Management enjoys serious priority in the operations and integrated planning of the Municipality. No Air Quality Management Committee was established in the municipal area. As there is limited capacity within the Municipality it is again suggested that a regional Air Quality Management Forum must be established to ensure peer-learning and the sharing of best practices. It will also ensure that Air Quality Management remains on the regional agenda.

The Municipality drafted their Air Quality Management Plan in late 2014 and this was again reviewed during the IDP compilation process. The new reviewed Air Quality Management Plan was approved by Council on 30 May 2019.

At present there is no funding set aside to undertake and implement Air Quality Management.

4.13 Law Enforcement

Law enforcement is performed by one permanent traffic officers who also operate the DTLC and are supported by one Clerk of the Court and three law enforcement officers. One of the traffic officers has been acting as the Management Representative of the DLTC. Significant improvement on the management of the DLTC have been made.

4.14 Fire Services and Disaster Management

In terms of Schedule 4 Part B of the Constitution, Fire Fighting Services is a municipal function. The Prince Albert Municipality does not have a formal, full-time Fire Services Unit. The Fire Fighting function is coordinated by the Fire Officer in the Municipality who is also responsible for occupational health and safety. Eight officials, at the level of labourers, previously received

training in the basics of Fire Fighting and act as the Fire Services unit of the Municipality. They perform dual functions and are not specifically allocated to fire services. Protective clothing and sufficient equipment remain a challenge for these officials. Prince Albert municipality has two fire fighting vehicles, with 2 000 litre and 600 liter water tanks respectively. A funding proposal to obtain new firefighting equipment has been submitted to the provincial disaster management centre and a 4x4 fire fighting vehicle was procured and delivery was in February 2020. The Municipality will also be incorporated in a Shared Service centralised call centre for emergency services that will be situated in Beaufort West. This is a project that will come into effect only after subsidisation from Provincial government. The Municipality will enjoy Hazmatt support from the Central Karoo District Municipality and is engaging with role players on the future deployment of Work on Fire teams within the municipal area to strengthen capacity.

On 15 March 2020 the Minister of Cooperative Governance and Traditional Affairs declared a national state of disaster pertaining to the Covid 19 outbreak in South Africa. The country will go on a 21-day lockdown from 23h59 on 26 March 2020. The municipality has established a municipal disaster JOC for the municipal area and will be aligning their strategies with the District JOC.

The Municipality adopted a Disaster Management Plan in June 2014. This plan was reviewed in March 2019, and was tabled with the draft reviewed IDP and will be adopted by Council in May 2020. It will be further reviewed during the public participation process guiding the IDP and budget approval.

The disaster management framework in Prince Albert is embodied in their Disaster Management Plan. By law each municipality must annually review their Disaster Management Plan to ensure that when a disaster occurs, they will be ready to address it in such a manner that it will have the least negative impact on our community and environment. The foundation of effective Disaster Management Planning is understanding the hazards, the exposure and vulnerability of people and assets to those hazards. The first step in the process of preparing a Disaster Management Plan for a Municipality, (in consultation with other key role players, is to compile a Disaster Risk Assessment that identifies risks to which the communities in the municipal area are exposed to. Prince Albert Municipality have done just this, in collaboration with the community and the Provincial Department. The Disaster Risk Assessment forms an integral part of the Disaster Management Plan and covers topics such as shale gas development, drought, accidents on the N1, and many more. The Municipality would like to invite the public to come and peruse the documents available at the libraries and provide their input on ways to improve their risk mitigation strategies.

Mr G van der Westhuizen was appointed as the Section 30 Control of Incidents officer.

4.15 Sport and Recreation

This component includes: community parks; sports fields; sports halls; stadiums; swimming pools; and camp sites.

We have four (4) sports grounds consisting of 3 combined rugby and soccer fields, one (1) soccer field in Prince Albert and 3 netball fields. Severe challenges are experienced with over-utilisation of the existing facilities. Funding applications to find a solution for this has been submitted to the relevant sector departments. In Prince Albert the Sydwell Williams and Odendaal field are not used due to the sub-standard condition of the fields. The field of Sydwell Williams need to be upgraded however to allow utilisation of it as an exercise field. Due to severe drought conditions

in Prince Albert the sport fields could not be irrigated on a regular basis and resulted into further deterioration. The wall build in the previous financial year in Leeu Gamka was demolished during a flash flood.

The Municipality had to defer a ring fenced MIG allocation of R11.5 million to National Sport as they could not commence with the proposed precinct sport development project in Prince Albert as the market related price was nearly 80% more than the available budget. The Municipality re-applied for the award of this funding in following financial years.

Highlights: Sport and Recreation

Highlights	Descriptions
Borehole sunk in Prince Albert	Borehole sunk for sport fields in Prince Albert
Safe swimming awareness	Safe swimming awareness done at swimming pool
Covering of swimming pool	A cover was purchase for the swimming pool in Prince Albert to reduce evaporation

The municipality embarked on a journey to establish a municipal sports council which are constituted by all three towns sports councils. All three towns have their respective sports council which reports to the municipal sports council. The Municipal Sports Council is under the Chairmanship of Nicole Wicomb.

Challenges: Sport and Recreation

Challenges in respect of sport and recreation for the reporting year are reflected below:

Challenges	Actions to overcome
Insufficient equipment and maintenance budget to maintain facilities	Equipment must be maintained via maintenance plan and control measures implemented
Funding for sporting codes and facilities needed	Funding proposals for external funding prepared
Lighting at sport fields	Lighting could lessen the overuse of facilities and improve security – application for funding for Klaarstroom and Leeu Gamka
Security at facilities	Security at facilities must be improved to protect assets – especially in Klaarstroom – community asked to report vandalism
Water for sport fields	Water must be secured for Klaarstroom sport facilities – engagements with school board
Overuse of facilities	Due to a lack of suitable facilities, some of the fields are overused – lighting needed

Defer of R11.5 million of funding for sport precinct	Market prices of sport precinct exceeds available funding
--	---

Table: Sport and Recreation Challenges

4.16 Financial Services

The following highlights in respect of the reporting year for the financial department are reflected below:

- The municipality received an unqualified audit opinion (*clean audit*) for the 2018/19 financial year. The only municipality within the central karoo to obtain a clean audit opinion from the AG.

Current Ratio July 2017 - June 2018 Quarter 4

6.65 😊

The value of a municipality's short-term assets as a multiple of its short-term liabilities.

More than double the ratio for similar municipalities in Western Cape: 1.91

More than double the ratio for similar municipalities nationally: 1.07

good 😊 More than 1.5
 average 😊 Between 1 and 1.5
 bad 😞 Less than 1

+ Show calculation

Liquidity Ratio July 2017 - June 2018 Quarter 4

5.18 😊

The municipality's immediate ability to pay its current liabilities

More than double the ratio for similar municipalities in Western Cape: 0.82

More than double the ratio for similar municipalities nationally: 0.17

good 😊 More than 1
 bad 😞 Less than 1

The following challenges in respect of the reporting year for the financial department are reflected below.

Description	Actions to address
Grant Dependent	We need funding from National and Provincial Government to comply to legislative requirements
Expand income base	Verify income sources to ensure all services are correctly levied
Low payment percentage in Klaarstroom and Leeu-Gamka	Continue with debtor payment awareness programs, and petition SALGA and COGTA to salvage the Eskom delivery area dilemma

Table: Financial Services Challenges

4.17 Human Resource Services

The Human Resource Department have only two dedicated staff members of which one is a contract worker funded by the EPWP-program. The Skills Development Facilitator performs dual functions within the corporate service division. The Municipality undertook a HR profiling audit to determine the challenges within the HR division.

Highlights: Human Resources

The following highlights in respect of the HR division for the reporting financial year is portrayed below:

Highlights	Description
Wellness meeting with staff	Staff wellness meeting held where MM engaged directly with workers
EPWP contracts concluded for 123 persons	Contract administration in respect of EPWP workers successfully undertaken
Improved oversight on over time	Stronger control measures implemented

Table : Human Resources Highlights

Challenges: Human Resources

The following challenges in respect of HR management as it pertains the reporting year are indicated below.

Description	Actions to address
HR policies are out-dated.	Policies reviewed – to be tabled at LLF
Vacancy rate is 28.3%	Vacancy rate needs to be addressed within financial constraints
Individual performance agreements to be concluded	The municipality is currently on a trial period to implement individual performance from March 2018 – June 2018.

4.18 Performance Management

Approval of the Top Level SDBIP 2019/20

The SDBIP for 2019/20 were prepared as described in the paragraphs below and the Top Layer SDBIP approved by the Executive Mayor on 28 June 2019.

The organisational performance is evaluated by means of a municipal scorecard (Top Layer SDBIP) at organisational level and through the service delivery budget implementation plan (SDBIP) at departmental levels.

Performance Agreements

All MSA Section 57 Performance Agreements was signed with respective employees in July 2019.

Municipal Public Accounts Committee (MPAC)

This committee has been established and training was provided.

Annual Reporting to Council

The annual report has been submitted to council as per the legislative prescripts and requirements. The final annual and oversight report was adopted by Council on 28 January 2020.

4.19.1 Overall Service Delivery Performance in terms of the Top Layer SDBIP

It must be noted that the Top Layer SDBIP contains 32 KPI's of which 13 does not fall into the reporting period. The table below reflects the top layer SDBIP dashboard of overall performance of the respective Departments from 1 July 2019 to 31 December 2019.

The table below illustrates the Municipality's overall performance for the reporting period of 1 July 2019 to 31 December 2019.

OVERALL PERFORMANCE

The table below illustrates the Municipality's performance per Directorate for the period 1 July 2019 to 31 December 2019.

PERFORMANCE PER DIRECTORATE

Chapter 5

Ward Planning and needs identification

5.1 Sector & operational planning

The identification and prioritization of community needs was an exhaustive process that builds on the needs and priorities of previous years, while taking into account new developments and priorities. Ward engagement took place through ward committee meetings, public meetings, sector engagements, door-to-door visits, interest group engagements and individual input throughout the year.

As the ward committees play such a pivotal role in the IDP the newly elected ward committee members were taken on site visits of all key municipal service infrastructure to provide an overview of the status quo of services and they also received training on the respective municipal processes in preparation of their one on one engagements with the community to solicit input in the ward profile and ward-based planning. An IDP Representative Forum with representatives from all four wards were also established to support the prioritization of needs.

5.2 Climate change

The science of human-caused climate change is undisputable. The average global temperature has already increased by 0.8°C; at this rate we are on track to reach a 4°C global average warming by 2100. Evidence suggests Africa is warming faster than the global average which is having severe impacts for hard-won developmental gains across an already vulnerable continent. Climate change impacts are already evident in the Western Cape and are negatively impacting and undermining economic and social development. Infrastructure, basic resources (water, food and energy) and livelihoods will all be impacted on and these impacts will affect all sectors and stakeholders, with a particular impact on the poor and vulnerable sectors of our community. Substantial responses are required by all role-players in order to adapt to the changes that will be experienced.

Climate change response is both about reducing vulnerability to climate change and developing adaptive capacity to cope with what can't be avoided. Climate risk is relatively high in the Central Karoo as it is an arid area that has always been prone to drought situations. Climate related disasters have substantial financial implications, and climate change in general could have far reaching long term economic consequences for the viability of the region. Climate-related impacts such as drought, flooding, snowfall, wind, fires and extreme heat are not new to the Central Karoo District but they are likely to be exacerbated, as well as increasing in frequency and severity. Importantly, long term incremental changes and shifts in trends in climatic variables will impact on the thresholds of tolerance of infrastructure and critical services provided by government.

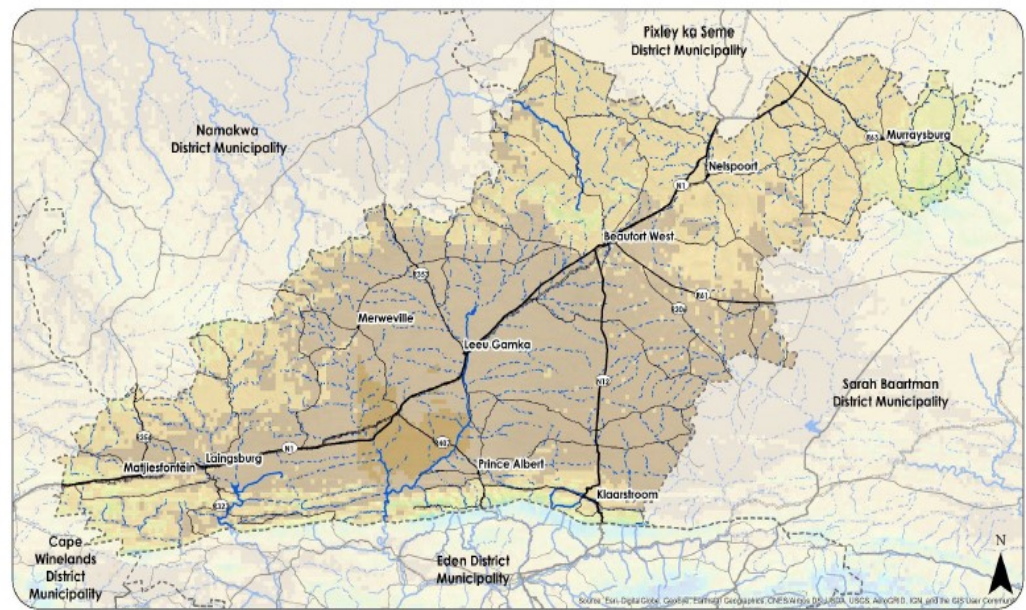

To date, the implementation of climate change responses to this changed climate has been slow. Many stakeholders do not perceive that it is their responsibility or mandate to prepare for climate change, and state limited resources and the delivery of other basic services as a challenge. Climate change is everyone's business and has to be incorporated into every facet of spatial and land use planning, service delivery, infrastructure development and economic planning. Failure would compromise basic service delivery, exacerbate poverty and undermine the most vulnerable communities.

Prince Albert declared a drought in all of its areas in October 2017. This drought declaration is still applicable at present, putting agriculture and available water resources as well as the general environment under pressure. Drought mitigating initiatives include the procurement and drilling of boreholes in Klaarstroom and Leeu Gamka as well as increasing the storage capacity in Prince Albert. Drought tariffs was implemented in the town of Prince Albert from in February 2019 and is still valid.

The Municipality do not have alternative water source options other than boreholes or in the case of Prince Albert, leiwater. The Municipality thus prioritised careful and continuous monitoring of water demand in all their towns to mitigate the wasting of resources. The Municipality also embarked on a leak detection and repair programme to

protect the already scarce water sources. If the situation worsens, the Municipality will implement drought tariffs and curb water usage. The Municipality is also considering the development of a building by-law that will only allow water and energy saving appliances and connections. The following table depicts the drought risk register for Prince Albert Municipality.

MEAN ANNUAL PRECIPITATION MAP

Mean Annual Precipitation Map: Central Karoo District Municipality

Priority	Municipality	Towns	Project name	Description	Financial Implications	Lead Department + Supporting departments
	Prince Albert	Prince Albert	Repair and upgrade water treatment works	Repair and upgrade water treatment works	2 000 000	DLG: MI; DWS, Municipality
	Prince Albert	Prince Albert	The installation of new data loggers on boreholes.		2 000 000	DLG: MI; DWS, Municipality

	Prince Albert	Prince Albert	Design and construction of raw water storage dam		40 000 000	DLG: MI; DWS, Municipality
	Prince Albert	Prince Albert	Drought aid support to farmers	Purchasing fodder	6 500 000	DoA; DLG

The Prince Albert municipal area is in a predominantly natural state (89%) which supports biodiversity and the ecological process that maintains biodiversity. The expansion of intensive land uses (mining, cultivation and urbanization) which result in the loss of habitats is sometimes unavoidable but must be done by carefully considering the impact on the environment. The proposed uranium mining and shale gas exploration in the region's impact on the environment, water and air quality, is a matter of concern and therefore the Municipality partakes in the regional forums where this is discussed. The Municipality will also be developing an alien vegetation eradication policy and programme to help conserve the natural environment.

5.3 Comprehensive Rural Development Program (CRDP) Approach

Ward 1 which includes Leeu Gamka, Bitterwater and Prince Albert Road has been identified as a CRP site and is amongst the recognised poverty pockets in the Western Cape. The CRDP focusses on supporting the IDP in rural wards by following a holistic approach that includes social facilitation, social upliftment, infrastructure development and economic development. The CRDP therefore is an opportunity to fast track development in rural wards as funding from the Department of Rural Development and Land Reform is made available to cover high priority projects as identified by a Council of Stakeholders (COS), elected from amongst the residents of the CRDP site and needs included in the IDP. A general meeting was held in February 2017 to elect a new Council of Stakeholders in the CRDP area. The elected Council of Stakeholders are:

Chairperson – Raymond Swarts
Vice chair -Nicolaas Abrahams
Secretary - Tamlyn Petoors
Vice secretary- Roslin De Wee
Treasury- vacant

The objectives of the CRDP programme are to:

- Stimulate the local economy;
- Identify programmes & projects that will improve the livelihoods of rural communities;
- Facilitate infrastructure investment in rural settlements; and
- Social upliftment of rural communities

An Inter-governmental Steering Committee (ISC) co-ordinates the input and support from all relevant government departments which include the Departments of Rural Development & Land Reform, Agriculture, Social Development, Education, Casidra as well as the municipality. Through

this programme comprehensive development plans will be developed by the relevant stakeholders particularly for the rural communities and will be incorporated in the reviewed economic development strategy of the municipality.

In the past severe difficulties were experienced in linking the projects initiated in the CRDP site with municipal projects and incorporating them in the Integrated Development Plan. Projects seem to be implemented on a silo basis, excluding the Municipality and thus these needs are not incorporated in the IDP. Some effort has gone into remedying this situation.

Beneficiary Selection and Cooperative Registration:

- A Total of 35 Cooperatives has been registered

Projects:

- 21 Food Gardens supported by the Department of Rural Development, Department Water & Sanitation and Department of Agriculture
- Cleaning of river supported by the Department Water & Sanitation
- Nursery project

5.3.1 Neighbourhood Development Planning (NDP)

This section focuses on the input received from the municipal stakeholders during the IDP engagement process and planning for the wards. Planning methodologies used in the ward planning processes were twofold namely:

Comprehensive Rural Development Program (CRDP) approach and' Neighbourhood Development Planning (NDP) approach

To enhance effective and excellent service delivery the area was divided into four wards namely:

Ward	Area
1	Leeu Gamka and Prince Albert Road
2	Klaarstroom, Seekoegat, Die Gang farming areas and Prince Albert South, east of Church Street
3	North End Prince Albert
4	Prince Albert North, Rondonskrik

The Neighbourhood Development Plan project aims to deepen community engagement in the future development of the municipal area. The Neighbourhood development Planning does essentially three things. Firstly, it provides a vision of what the area/ neighbourhood should look like over a period of time, sets out clear development objectives and proposes action plans/ projects for implementation.

5.4 SWOT Analysis of the Area

During the door to door visits and the community meetings, facilitated by the University of Stellenbosch, as well as during sector engagements the following strengths, weaknesses, opportunities and threats were identified per ward.

	Ward 1	Ward 2	Ward 3	Ward 4
Strengths	<p>Situated along the N1</p> <p>Available land</p> <p>Clean air</p> <p>Agriculture – game farming</p> <p>Available labour</p>	<p>Beautiful environment</p> <p>Rich cultural heritage</p> <p>Attractive tourist destination</p> <p>Intellectual capacity</p> <p>Export fruit and wine</p> <p>Clean air</p> <p>Swartberg Pass</p> <p>Situated along N12 (Klaarstroom)</p>	<p>Sound infrastructure</p> <p>POP Centre</p> <p>Available labour</p> <p>Potential for cultural tourism</p> <p>Open space</p> <p>Business development potential</p>	<p>Access Centre</p> <p>Open spaces</p> <p>Available labour</p> <p>Potential for cultural tourism</p> <p>Business development potential</p> <p>Cultural heritage (PA South)</p>
Weaknesses	<p>Water scarcity and poor quality</p> <p>Skills shortage</p> <p>Poor infrastructure</p> <p>Bucket system</p> <p>Unemployment</p> <p>Drug Abuse</p> <p>Lack of crèche in Bitterwater</p> <p>Lack of church and business premises</p> <p>Industrial area not developed</p> <p>Low literacy levels</p> <p>Limited job opportunities</p> <p>No secondary school</p> <p>No further education facility</p> <p>Limited access to government services</p> <p>Lack</p> <p>High road accident risk</p> <p>Upgrading of Transnet area to acceptable standard</p>	<p>Street children</p> <p>Aged infrastructure</p> <p>Fire truck needed at Klaarstroom</p> <p>Fire fighting capacity to be improved</p> <p>Lack of storm water system</p> <p>Areas not disabled friendly</p> <p>Lack of street lighting</p> <p>Klaarstroom isolated from government / municipal services</p>	<p>Street Children</p> <p>Skills shortage</p> <p>Poor infrastructure</p> <p>Unemployment</p> <p>Drug Abuse</p> <p>Lack of crèches</p> <p>Lack of church and business premises</p> <p>Low literacy levels</p> <p>Limited job opportunities</p> <p>No further education facility</p> <p>Community Safety Challenges</p> <p>Limited skills base</p> <p>Lack of ATMs</p>	<p>Street children</p> <p>Skills shortage</p> <p>Limited water – drought</p> <p>Substance abuse</p> <p>Unemployment</p> <p>Lack of business and church premises</p> <p>Limited job opportunities</p> <p>Community safety challenges</p> <p>Limited skills base</p> <p>No further education facilities</p> <p>Lack of ATMs</p>
Opportunities	<p>Skills training</p> <p>Developing tourist and road support infrastructure along N1</p> <p>SMME development</p> <p>Emerging farming support</p> <p>Develop industrial area</p>	<p>Skills training</p> <p>SMME development</p> <p>Develop tourism node and destination marketing initiatives</p> <p>Skilled retirees to support community and municipality</p> <p>Emerging farming support</p>	<p>Skills training</p> <p>SMME development</p> <p>Emerging farming support</p> <p>Establishment of FET facility</p> <p>Establishing recreation facilities</p>	<p>Skills training</p> <p>SMME development</p> <p>Emerging farming support</p> <p>Establishment of FET facility</p>

5.5 Focus areas for Wards

From the above the following development objectives were identified as critical focus areas for the respective wards.

		WIFI access to all users	Ward 4	Development & Strategic Support

5.6 Strategic Informants for RDP Project Selection to Absorb the Poor

Projects for Prince Albert should enable and strengthen the tourism industry and support small and emerging farmers while also growing commercial crop farming in a manner that benefits all residents. Market links should also be strengthened with improved access and flow of exports to the N1, Leeu Gamka and Beaufort West.

There are three DRDLR farm projects DRDLR adjacent or near the poverty pocket. A breakdown of this, their current activity and suggestions to improve linkages into the value chain and further assist the rural poor.

Using the SWOT analysis as a framework, a strategic, high-level approach to projects was derived per poverty pocket. Particular attention was given to understand the potential of proximate DRDLR project land and State-owned land not held for nature conservation.

The DRDLR confirmed the following DRDLR projects on state owned land.

Name	Distance from Primary PP	Size (ha)	Current Activities	Potential Improvement
Swartriver	Adjacent	3647.67	Horses and sheep (Elsenburg Livestock Farms Shapefile, 2013)	No potential improvement suggested.
Prince Albert Commonage	5km	5580.31	Animals (and by-product) (DRDLR LRAD, 2015) Goats, horses and sheep (Elsenburg Livestock Farms Shapefile, 2013)	No potential improvement suggested.
Maans Group 2	15km	1892.41	Animals (and by-product) (DRDLR LRAD, 2015) Beef, goats, horses, sheep (Elsenburg Livestock Farms Shapefile, 2013)	No potential improvement suggested.
Maans Group 1	31km	924.51	Animals (and by-product) and secondary production of horticulture (DRDLR LRAD, 2015) Game, goats, and horses (Elsenburg Livestock Farms Shapefile, 2013)	Restore any degradation to CBA and protect intact biodiversity corridors, possibly plant Spekboom and use fencing to protect from goats
Rietkraal	42km	4236.36	None	Farm sheep

5.7 SWOT Analysis on the Integration of Poverty Pockets and Value Chains

The linkages between the functional regions, value chains and poverty pockets were analysed according to the socio-economic profile of the poverty pockets as well as the spatial attributes of

the built environment in relation to the economic activities of the value chain. This analysis is per poverty pocket cluster as the primary purpose is to identify solutions to absorb the poor into the economic value chains of the Central Karoo.

Prince Albert

The town of Prince Albert has the third highest number of households in poverty. Yet this local municipality has featured the district's highest GDP growth rate since 2006 with highest contributions from the business and finance, construction, agriculture and retail and accommodation.

<p>Strengths</p> <ul style="list-style-type: none"> • Scenic mountain landscape • Provides access to Oudtshoorn and the Garden Route through the scenic Swartberg Pass • Access to water and fertile soils provide the greatest opportunity for crop and produce farming as well as tourism • Most olive tree crops are situated in Prince Albert LM. Area also has a strong fruit industry • Prince Albert was awarded the winners in the 2012 Western Cape “town of the year” competition, hosted by the television program Kwêla. Furthermore, the new reality cooking program Kokkedoor is also filmed in Prince Albert with local competitors • Prince Albert Abattoir • The vast rural landscape is the Karoo’s most valuable commodity 	<p>Weaknesses</p> <ul style="list-style-type: none"> • Seasonality of employment opportunities • Lack of support to emerging entrepreneurs • Fragmentation of tourism industry. Tourism has a more dispersed character, and plays out on a greater regional scale, linking across the district boundaries to the Garden Route, the Northern and Eastern Cape • Lack of access to services (health care, protection, retail, etc) • Sprawling development pattern contributes to social fragmentation due to distances between residences and work, community facilities and social and retail opportunities • Poor public transport • Poor communication facilities • High dependency on social grants and wage income by the poor • High poverty levels • Low quality of road infrastructure • Low institutional capacity • Low rainfall
<p>Opportunities</p> <ul style="list-style-type: none"> • Diversifying economy to secondary and tertiary sectors • Growth in Tourism • Brand Development • Expanded Public Works Programme (EPWP) • Agro-Processing and technology innovation • Existing abattoir has capacity to take on more livestock • Opportunities for technology changes • Eco Tourism • Projects for Prince Albert should enable the tourism industry • Support small and emerging farmers while also growing commercial crop farming 	<p>Threats</p> <ul style="list-style-type: none"> • Climate change that will impact on water resources and agricultural activities • Water supply • Water Quality • Electricity supply • Political climate • Lack of unity between public and private sector • Prince Albert Abattoir is under capacity • Volatile exchange rate • Narrowing agriculture profit margins • Fluctuations in tourism industry • Lack of retention of skilled labour (Brain Drain) • Global uncertainties of economic conditions

	<ul style="list-style-type: none"> • Vastness of area • Economy focussed on primary sectors • Small domestic market
--	--

5.7.1 Agriculture (Crops) Projects

Opportunities that have been identified by municipal policy documents for the main value chains discussed above include:

- Growth of other higher yielding/higher labour-intensive agricultural sectors e.g. Olives and dryland agriculture
- Horticulture

The following projects have been identified for investment:

Project Name	Project Description	Project Driver
Food Security	Upgrading and support all community food gardens. Due date: December 2018. Responsibility of Municipality, and DOA. Estimated budget: Province.	Prince Albert Local Municipality
Fruit Drying Facility with Communal Plantation	The Department of Agriculture facilitated a discussion between the local authority, Dried Fruit SA and Montagu Dried Fruit. After much research, the Municipality availed a part of its commonage for the establishment of a drying facility, farmers in the surrounding area committed delivery, and the neighbouring commonage is envisaged for 30ha of apricot cultivars. The drying facility would be managed by Montagu Dried Fruit with a view to substantial skills transfer and local empowerment. Profits would be shared with supplying farmers and the community. Montagu Dried Fruit will take up all the product which would, for the first time establish a sustainable market in Prince Albert for stone fruit of the dried cultivar type. Communal apricot plantation business plan drafted and in the process of funding	Prince Albert Local Municipality

	<p>sourcing. Activities include: a plantation of 30 ha of Royal Abeco apricots; buying of other cultivars from surrounding stone fruit farms; cooling facilities; drying of cultivars; logistics to and from farms and facilities; and fruit sweets. Estimated cost: R12.1 million. PAM has secured R3 million from The Department of Rural Development and land reform</p>	
<p>Pomegranate Business Project in Leeu Gamka</p>	<p>This project can be linked up with an existing Alternafruit pomegranate venture that is currently running in Murraysburg. The challenge in Leeu Gamka will be that all development will have to be initiated from virgin land with no infrastructure. The only water source available will be recycled sewage water that at the moment runs back into the Gamka river. The total amount and the suitability of that water for irrigating fruit trees needs to be confirmed. Probably one will also have to look at the cost to establish the necessary infrastructure to do the needed purifying. Ample vacant land is available on the commonage land, but the fact that it was never utilised for anything else than grazing land, one have to do a proper investigation in terms of depth and quality for establishing fruit trees.</p>	<p>Prince Albert Local Municipality</p>
<p>Vegetable Enhancing Facilities</p>	<p>This includes tunnels, and cooling facilities. The cooling facilities can be shared with the dried fruit installation. This also includes logistical facilities such as cooling vehicles to transport produce to the primary installation for packaging and branding. There are many vegetable farmers in Prince Albert (predominantly emerging farmers specialising in vegetable farming). High cost of logistics</p>	<p>Prince Albert Local Municipality</p>

	<p>presently makes it unprofitable. The project includes: tunnelling, Water reticulation and treatment, Seedling production, Cooling facilities of Drying facility to be used in Prince Albert, and Smaller Cooling facility in already build structure in Leeu Gamka. Estimated costs: R900,000.</p>	
<p>Seedling Production Facility</p>	<p>Farmers travel to Willowmore in the Eastern Cape to buy seedlings for onions etc. if this could be produced locally it would provide and create many positive spin-offs. Establishing a seedling production unit requires tunnels, turbines and irrigation. Establishing a viable seedling project would bear an estimated initial cost in the order of R 550 000 where after it would be self-sustaining and capable of absorbing the costs of expansion.</p>	<p>Prince Albert Local Municipality</p>
<p>Onion Seed & Olive Production</p>	<p>Organised agriculture in the Western Cape supports the implementation of empowerment projects anchored in onion seed production. The local authority and local farmers have a convergence of interests to establish onion seed and olive product production on land belonging to local farmers that will simultaneously: Extend the existing onion seed and olive product production area by at least 30 hectares; Create sustainable skilled and unskilled employment opportunities; Facilitate empowerment partnerships; and Take off filtered sewerage water that presently seeps into the environment and poses a significant threat to the environment. The estimated costs of establishing both the onion seed and olive product projects including infrastructure</p>	<p>Prince Albert Local Municipality</p>

	and irrigation is in the order of R2.5 million.	
Dry Fruit Project in Leeu-Gamka	Project of DRDLR. No information available.	Prince Albert Local Municipality
Facilitating the Initiation of Agriculture Production Hubs & Vegetable Gardens in the Central Karoo District Municipality	This project involves establishing and maintenance of vegetable gardens in each of the towns of Murraysburg, Merweville, Nelspoort, Prince albert, Leeu Gamka, Klaarstroom, Laingsburg, Matjiesfontein and Vleiland. Sustainable production plans for a variety of vegetables to be grown according to the season and market demand. Marketing plan to retail the produce to local entities such as Hotels, hospitals, elderly homes, guest houses, schools, retail shops, supermarkets and in neighbouring towns. The direct project beneficiaries would be the project members and their households. A minimum of 15 – 20 people per town can be involved provided a 10 Ha tree and 5 Ha vegetable projects are launched. A well-designed plan for seasonal planting and harvest will have to be developed and also in accordance with the demands of the local markets.	Central Karoo District Municipality

Agriculture (Other) Projects

The following projects have been identified for investment:

Project Name	Project Description	Project Driver
Develop a Small-Scale Farmers Programme	To facilitate inclusivity and broaden the economic base. Responsibility of Municipality and the Western Cape Department of Agriculture (DOA).	Prince Albert Local Municipality
Link Businesses with Growth Potential	To support the expansion of small agri-businesses by linking to government support programmes. Responsibility of Municipality and the Western Cape Department of Economic Development and Tourism	Prince Albert Local Municipality

	(DEDAT). Budget estimates: Jobs Fund, MCEP, DoA, FSD, DST, TIA, and DoL.	
Skills Development & Agricultural Training	To develop most needed skills for the private sector to absorb in all sectors. Responsibility of Municipality, DOA, and DRDLR. Estimated budget: DOA.	Prince Albert Local Municipality
Agri-Processing	To develop a hub for farmers to add value to their produce. Responsibility of Municipality, Province, and DOA. Estimated budget: DOA.	Prince Albert Local Municipality

Tourism Projects

The following projects have been identified for investment:

Project Name	Project Description	Project Driver
Tourism Sector Support	To diversify tourism product and promote agri-tourism. Responsibility of Tourism Exco and Municipality.	Prince Albert Local Municipality
Development of a Tourism Strategy	Provide a framework to guide future tourism development. Responsibility of Municipality, Tourism Exco and Tourism Business. Budget estimate: R200,000.	Prince Albert Local Municipality
Neighbour-hood Revitalisation & Urban Design	Attract tourists to the area and provide bicycle paths infrastructure. Budget estimate: R7 million (over 3 years).	Prince Albert Local Municipality
Branding & Marketing	To expand the number of visitors to the area and expenditure within the area. The Tourism Association, with support of the Municipality, has made strides in building a brand strategy. To build a brand strategy for Prince Albert (ongoing). Responsibility of Tourism Bureaus, Business Chambers, Municipality, District and Wesgro. Budget estimate: R500,000.	Prince Albert Local Municipality
Youth Entrepreneurship Mentoring Scheme	To establish a channel for youth interested in entrepreneurship to learn and grow. To provide centre to guide unemployed youth. Responsibility of Municipality, DEDAT, IDC and DRDLR. Funding source from	Prince Albert Local Municipality

	tourism human resource development, skills development and internships WC government mentoring scheme.	
N12 Treasure Route	A widely supported tourism route which runs from Emalahleni in the north to George in the south all along the N12 with a 150 km corridor. A draft MOU will be sent for discussion. Budget: R30 000 p.a	N12 Treasure Route Association

Business projects

The following projects have been identified for investment:

Project Name	Project Description	Project Driver
Construction of Business/Trading Hubs	The creation of an enabling environment for business development and growth with a focus on SMME support. Due date: 2019. Responsibility of Municipality, Province DEDAT, IDC, and DRDLR. Estimated budget: R4 million.	Prince Albert Local Municipality
Rose More Bakery in Leeu Gamka	Project of DRDLR. Business Plan completed by Urban-Econ Development Economists (Pty) Ltd in June 2018. The bakery is a co-operative with five members. The bakery has a number of product offerings, chief of which is its bread; but also sells pies, cakes, doughnuts, tarts and koeksisters.	

Land Reform & Rural development

Natural resources such as land and water are scarce resources in Prince Albert and they need to be used in a prudent and sustainable manner. The municipality has partnered with the Department of Agriculture to roll out a Comprehensive Rural Development Programme (CRDP) in Leeu Gamka, in the Bitterwater area. This will complement the existing NARYSEC programme of the Department of Rural Development and Land Reform that is already in existence in these two areas. The objectives of the CRDP programme are to:

- Stimulate the local economy;
- Identify programmes & projects that will improve the livelihoods of rural communities;
- Facilitate infrastructure investment in rural settlements; and
- Social upliftment of rural communities

The municipality in partnership with the other relevant government departments has established a Council of Stakeholders (COS) in Leeu Gamka which comprises of representatives from all sectors of the rural society. An Inter-governmental Steering Committee (ISC) co-ordinates the input and support from all relevant government departments which include the Departments of Rural Development & Land Reform, Agriculture, Social Development, Education, Casidra as well as the municipality. Through this programme comprehensive development plans will be developed by the relevant stakeholders particularly for the rural communities and will be incorporated in the reviewed economic development strategy of the municipality.

The projects that were identified and reviewed by the COS and reprioritised under the CRDP initiative include the following:

<ul style="list-style-type: none"> • Streetlights • Local Economic Development • GAP Housing Development • Paving of all gravel roads • Lights on the N1 • Business Development next to the N1 • Extension of medical doctor and clinic visits • Community development Centre • Subsidized transport • Upgrading of the current school to Grade 12 • Beautification of Public Space • Relocation of the current Crèche to Bitterwater area & Development of a new Crèche at Prince Albert Road • Development of a Cemetery at Prince Albert Road • Skills Training • New Water Network for Prince Albert Road 	<ul style="list-style-type: none"> • Swimming Pool • Youth Centre • Animal Control/ Veterinary Services • Development of vacant business plots • Youth training centre • Thusong Centre • Improvement of water quality • Recycling project • Eradication of bucket system • Upgrade of streets • Street lights • Permanent job opportunities • Financial assistance to community projects • Financial assistance for Nursery project • Upgrade of sport facilities by two toilets per sex, a community gym on the field, lighting on field, stadium and playing field to be upgraded for safety of players. • Weigh Bridge
--	--

Current Project implementation progress:

Beneficiary Selection and Cooperative Registration:

- A Total of 35 Cooperatives has been registered

Projects:

- 21 Food Gardens supported by the Department of Rural Development, Department Water & Sanitation and Department of Agriculture
- Cleaning of river supported by the Department Water & Sanitation
- Nursery project

The Municipality awarded an on-risk tender to do a status quo analysis of the local economic arena and identify and assist in the implementation of catalyst projects to stimulate the local economy. Unfortunately, the tender was unsuccessful in procuring funding to undertake said

study. The Municipality therefore identified key projects that can stimulate the local economy. These projects, seen as Joint Planning Initiatives, include:

5.9 Karoo Small Town Regeneration Initiative

The Growth Potential of Towns Study, undertaken in 2014, was undertaken by the Western Cape Provincial Government as a land use instrument informing the provincial spatial development framework. As this data is used as an investment decision support tool and for detailed spatial targeting, municipalities with low growth potential such as Prince Albert had to revisit ways in which they can motivate spatial development and future investment. This led to a SALGA initiative called the Small-Town Regeneration Programme. Prince Albert Municipality is part of this initiative and formally adopted the Karoo Small Town Regeneration and Regional Economic Development Conference Recommendations in June 2016. The participants of the Karoo Small Town Regeneration Programme thus recommended that all municipalities in the Karoo Region formally consider their participation in a Inter Municipal Cooperation in terms of the Municipal Systems Act to start discussions on regional spatial planning and economic development framework; that the status of the initial cooperation between municipalities from the Karoo area from the Western Cape, Norther Cape And Eastern Cape be clarified and be revived with the inclusion of Free State Municipalities with the Karoo region; That a process be initiated to discuss with relevant role players at national, provincial and local level to consider a Karoo Regional institutional arrangements; that the Karoo Brand initiative be discussed and finalized and that the details from the Commission reports be processed through the relevant forums and organisations.

Chapter 6 INSTITUTIONAL ARRANGEMENTS

Prince Albert Municipality is a category B Municipality. It has an Executive Mayoral System combined with a ward participatory system. The council consists of seven seats. Four of these seats are for elected representatives and 3 for proportional representatives based on a formula related to the number of votes that each political party receives in the elections.

6.1 Council composition

After the election of 3 August 2016, the Council composition is as follows:

Cllr Name	Position	Party Affiliation
G Lottering	Executive Mayor	Karoo Gemeenskapsparty
L Jaquet	Deputy Mayor	Democratic Alliance
S Botes	Speaker	Democratic Alliance
M Jaftha	Representative to the District Municipality	Karoo Gemeenskapsparty
S Koonthea	Councillor	Democratic Alliance
E Maans	Councillor	African National Congress
S Piedt	Councillor	African National Congress

In terms of Sections 79 and 80 of the Municipal Structures Act 117 of 1998 Prince Albert Municipal Council has established four sub-committees to assist Council in carrying out its responsibilities and mandates. These Standing Committees / Portfolios are as follows and have quarterly meetings in preparation of the general Council meeting. All councillors are part of the respective portfolio committees indicated below, under the chairmanship of the councillors indicated below:

- Finance Portfolio with chairperson Goliath Lottering
- Personal & Administration with chairperson Margy Jaftha
- Civil & Electrical Services with chairperson S Koonthea
- Development and Community Services with chairperson Linda Jaquet

The Council composition is indicated in the table below. The Council is led by a coalition of the Democratic Alliance and the Karoo Gemeenskapsparty.

Composition of Council after 2016 local government elections

Political Party	Number of Councillors	Gender	
		Male	Female
DA	3	2	1
KGP	2	1	1
ANC	2	0	2

6.2 Municipal Wards

Prince Albert Municipality is divided into four wards. The ward areas are showed in the following photographs:

Ward 1

This ward includes Leeu Gamka / Bitterwater and Prince Albert North as well as some surrounding farm areas. The ward councillor is Cllr Elsabe Maans.

Prince Albert Road

Ward 2

This ward included Klarstroom, Seekoeigat, die Gang farming areas and a portion of Prince Albert South. The ward councillor is Cllr Linda Jaquet.

Klarstroom portion of ward 2

Note: The farming areas of Seekoeigat and Die Gang is also included in this ward.

Ward 3

This ward includes a portion of Prince Albert North. The ward councillor is Cllr Goliath Lottering.

Ward 4

This ward includes a portion of Prince Albert North and a portion of Prince Albert South. The ward councillor is Cllr Margy Jaftha.

Prince Albert South - part of ward 4

Prince Albert North portion of ward 4 

6.3 Management Team

The Administrative arm of the Municipality is under the leadership of the Municipal Manager. The following departments supports the Municipal Manager: Chief Financial Officer and Operational Manager.

The Municipal Manager

The Municipal Manager as head of the administration is responsible and accountable for tasks and functions as provided for in Section 55 of the Systems Act, other functions/tasks as provided for in legislation, as well as functions delegated by the Executive Mayor and Council. The municipal manager is responsible for the implementation of the IDP and SDBIP under the direction and guidance of the Municipal Council. The Municipal Manager is supported by a team of executive managers appointed in terms of Section 56 of the Municipal Systems Act, 32 of 2000. The position is filled by Mrs A Vorster. The Municipal Manager and can be contacted at tel: 023 541 1320 or email: anneleen@pamun.gov.za.

Section 57 Appointees

The Municipality has one Section 56 appointment namely the Chief Financial Officer. The area of competency of these Section 56 appointees is highlighted below:

Chief Financial Officer

This department is responsible for the financial management of the Municipality under the leadership of Chief Financial Officer, Mr Jannie Neethling at tel (023) 541 1014 or E-mail: jneethling@pamun.gov.za. The Chief Financial Officer complies with the Minimum Competency Regulations.

The Department manages the financial affairs of the Municipality and is responsible for:

- All revenue collection
- Supply Chain Management
- Expenditure Management
- Management of the municipal investments and insurance portfolio
- Indigent support
- The annual budget, financial statements and all accounting facilities.

Operational Manager

This Department resorts under the Chief Financial Officer and is responsible for the infrastructure services and projects of the Municipality. This department is led by Mr George van der Westhuizen and can be contacted on 023 541 1320 or email at george@pamun.gov.za. Mr van der Westhuizen complies with the Minimum Competency Regulations.

This Department oversees the following services:

- Water and Sewerage purification
- Water and Sewerage reticulation
- Refuse removal and management of landfill sites
- Vehicle maintenance
- Streets, storm water and construction
- Roads and pavements
- Infrastructure projects
- EPWP administration

Operational Manager

The Corporate, Strategic and Community Department are responsible for Corporate and Community services in the Municipality. The department is under the leadership of Mr George van der Westhuizen. This Department oversees the following services:

- Human Resources
- Traffic and law enforcement services
- Housing administration
- Fire services and Disaster Management
- Libraries
- Thusong
- Community liaison
- Parks and recreation facilities
- Contract Management
- Committee services
- Administrative support
- Integrated Development Planning
- Performance management
- Town planning
- Building Control
- Records management
- Local Economic Development

6.3.1 Staff component of Prince Albert Municipality

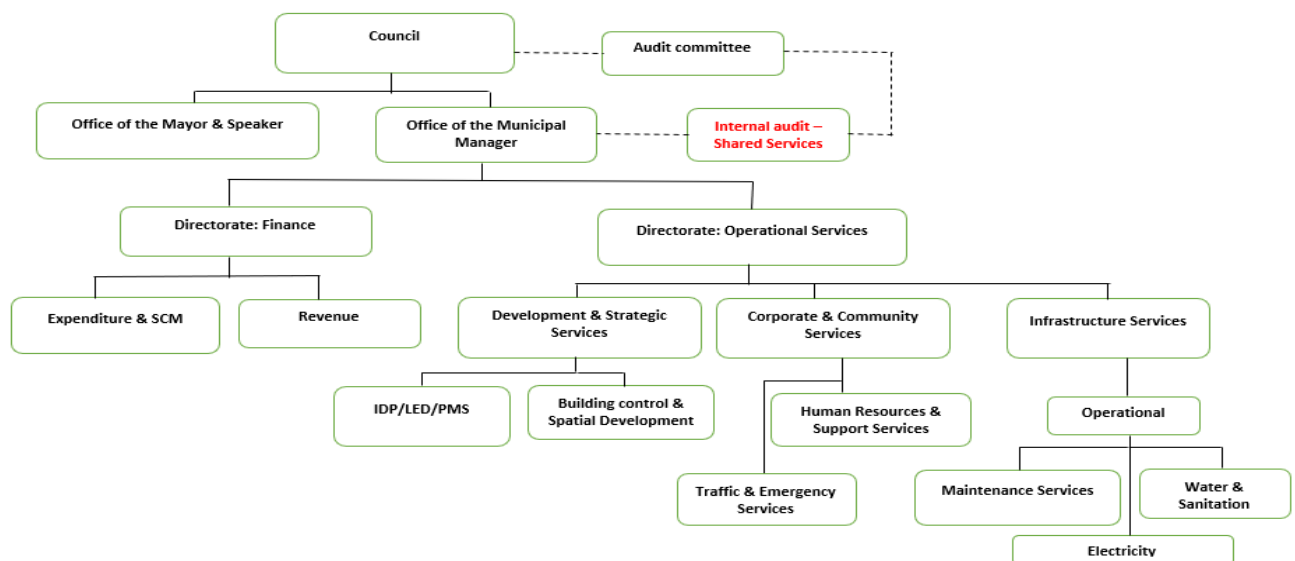

The staff establishment is 109 posts after the amendment of the organogram in January 2020. The newly approved organogram is aligned to address service delivery blockages. Prince Albert has a very flat organizational structure due to financial constraints and the Municipality is largely dependent on the Expanded Public Works Programme (EPWP) and Community Works Programme (CWP) participants to assist with labour intensive aspects of service delivery. Out of the positions on the organogram, 77 positions were filled as on 23 March 2020 with 20 vacant, representing a 28.3% vacancy rate during the year under review.

Three officials were sent on Municipal Minimum Competency training. One of the officials has completed the training and is competent on all levels of management, the remaining four will finish their training by December 2020.

One of the traffic officers were boarded in October 2019 due to illness, the position is currently vacant. The position was advertised and interviews conducted, no one was appointed. A second round of recruitment has already commenced. The vacancy puts enormous pressure on the unit as there is only one permanent traffic officer in service at the moment, which are assisted by three law enforcement officers. The traffic income has been underperforming for the last three years. Interventions for collection will include the serving of summonses and road blocks. The Municipality also applied for permission to undertake law enforcement in the road works area on the N1, within their municipal jurisdiction as the area surrounding Prince Albert Road and Leeu Gamka have a high fatality percentage as once again illustrated during December 2019.

Prince Albert Municipality drafted their financial statements for the 2018/19 financial year in-house in collaboration with external consultants and obtained an unqualified audit opinion (clean audit).

Council will continuously strive to fill the critical positions identified on the organogram to ensure continuous, equitable and sustainable service delivery. The organogram was last reviewed in January 2020 and council will review it annually to ensure that services is addressed accordingly with the needs of the community. Below is a reflection of the current organogram:

6.3.2 Employment Equity

The Employment Equity Act (1998) Chapter 3, Section 15 (1) states that affirmative action measures are measures designed to ensure that suitable qualified people from designated groups have equal employment opportunities and are equitably represented in all occupational categories and levels in the workforce of a designated employer. The national performance indicator also refers to: "Number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan".

An Employment Equity Plan was submitted in February 2019. The Municipality employed 36.36% women as on 23 March 2020 and employed two disabled individuals. The table below indicates the current Employment Equity status of the Municipality:

Occupational levels	Male		Female		Total
	C	W	C	W	
Categories					
Top Management	0	1	0	1	2
Senior Management	1	0	0	0	1
Professionally qualified and experienced specialists and mid-management	3	1	0	0	4
Skilled technical and academically qualified workers, junior management, supervisor, foreman and superintendents	8	1	4	0	13
Semi-skilled and discretionary decision making	16	0	16	2	34
Unskilled and defined decision making	16	1	5	0	22
Total permanent	32	2	19	2	54
Non-permanent	12	2	6	1	22
Grand total	44	4	25	3	76

6.3 Ward committees

Prince Albert Municipality is a municipality with a Mayoral Executive System combined with a ward participatory system as set out in section 9 (d) of the Municipal Structures Act, and the municipal council has resolved in terms of section 72(2) of the Act to adopt the ward participatory system. A ward committee has been established for each of the respective four wards and is operational to date.

6.4 Skills Development

The employment equity guidelines form an integral part of planning for training as reflected in the Skills Development Act. The Municipality has developed a comprehensive Workplace Skills Development Plan in line with the said Act. The Municipality are registered with the Local Government Sector Education and Training Authority (LGSETA) and skills development initiatives relating to the municipal core services have been carried out at all levels of employment. The Municipality contributed an inclusive amount of R 210 000 to skills development.

The new Workplace Skills Plan is currently being developed and will be submitted in April 2020 for approval at the Regional Labour Forum and will be approved by Council in May 2020.

6.5 Municipal Administrative and Institutional Capacity

The municipality has the following policies, service delivery improvement plans and systems to support the workforce in delivering on the strategic objectives and to promote institutional viability and cohesion:

Name of policy, plan, system	Status	Responsible directorate
Delegation of powers	Reviewed annually	Corporate Services
Performance policy framework	Framework to be reviewed annually	Strategic Services
Employment equity policy	Approved	Corporate Services
Organisational structure	Reviewed Annually	Corporate Services
HIV/ AIDS policy	To be reviewed	Corporate Services
Youth, gender and disability policy	To be reviewed	Corporate Services
Overtime policy	Adopted	Corporate Services
Acting allowances	Adopted	Corporate Services
Cellular telephone policy	Adopted	Corporate Services
Leave and long leave service bonus	Adopted	Corporate Services
Language policy	Adopted	Corporate Services
Housing allowance/ subsidy policy	To be developed	Corporate Services
Scarce skills policy	To be developed	Corporate Services
Work place skills plan	Approved and in process of being implemented – reviewed annually	Corporate Services
Protecting clothing policy	Adopted	Corporate Services
Recruitment and selection policy	Approved	Corporate Services
Travelling and substance policy	Adopted	Corporate Services
Internship and experiential policy	To be developed	Corporate Services
Staff and external bursary policies	To be reviewed	Corporate Services
Occupational health and safety plan	To be reviewed	Corporate Services
Long term financial plan	Adopted	Financial Services
Indigent policy	To be reviewed with budget documents	Financial Services
Information technology policies	Need to be drafted	Financial Services
Credit control policy	Approved	Financial Services
Asset register	Approved	Financial Services
Financial delegations	To be reviewed	Financial Services

Procurement policy	Part of SCM policy; to be reviewed annually	Financial Services
Disaster management and contingency plans	To be reviewed annually	Strategic Services
Risk management policy and strategy	Adopted and needs to be reviewed annually	Strategic Services
Audit committee charter	Adopted – to be reviewed annually	Strategic Services
Customer care strategy	To be adopted with budget and reviewed annually	Corporate Services
Marketing plan	To be developed	Strategic Services
Communication plan and website	Drafted and implemented	Corporate Services
Human Resource Management system	No funding	Corporate Services
Financial management system	Approved	Financial Services
Performance management and related systems	Approved	Strategic Services
Risk management system	Approved	Strategic Services
Document management and process flow system	Implemented	Corporate Services
Electronic management system	To be implemented	Corporate Services

It is Council's intention to develop a schedule of all policies and by-laws that will indicate a rotation plan for reviewing all policies and by-laws. This process will assist the municipality to be developmental and innovative in fulfilling its constitutional mandate. The systems are continuously updated to ensure that it supports the administration. The municipality is currently in process to review the IT platform and the integration of IT systems. IT management has been allocated to a dedicated official.

Chapter 7 Sector plans

The Municipality is responsible for the delivering of municipal functions as specified in Schedule 4B and 5B of the Constitution. All the strategic planning processes to address these functions should be aligned and fully integrated to ensure sustainable growth and development. It is therefore required that all the sector plans are considered as these plans should guide the provincial and national departments on specific issues to be addressed during the compilation and implementation of the IDP.

7.1 Intergovernmental Relations

Prince Albert Municipality also forms partnership or engage with internal or external departments / municipalities / cross-boundary or sector collaborating in deliver on their constitutional obligations.

District IGR Structures

Prince Albert Municipality participates in all these Intergovernmental Relations activities in the district and province, but also at local level. The municipality delegates officials and councilors to the following forums.

Structure/ Publication	Objectives/Functions
Public Structure and Engagements	
Ward Committee Meetings	<ul style="list-style-type: none">• To inform the community of council decisions, municipal affairs, etc.• To enable the community to inform the ward councillors/ municipality of their concerns

Public meetings/IDP & Budget	<ul style="list-style-type: none"> To inform the community of council decisions, community rights and duties, municipal affairs etc. To enable the community to inform the councillors and officials of their issues
IDP Representative Forum	<ul style="list-style-type: none"> To ensure that every activity and decision taken in its meeting are properly communicated to the forum members' respective constituencies To monitor the implementation of the Integrated Development Plan To reflect and safeguard community inputs by acting as the spokespersons for the communities To reflect and safeguard community inputs by acting as the spokespersons for the communities To represent the interests of communities To provide feedback to communities To provide an organisational mechanism for discussion, negotiation and decision making between stakeholders, including the municipal Government To participate in the process of setting and monitoring key performance indicators
Sector Departments	<ul style="list-style-type: none"> To inform PAM of their programmes and projects that will be undertaken within the municipal jurisdiction
IDP Indaba	<ul style="list-style-type: none"> To integrate Provincial and National Government projects and programmes To allow government Directorates to give input on the IDP, instead of just evaluating and assessing the IDP
Intergovernmental Relations Structures:	
Municipal Managers Forum	Municipal Manager
Provincial IDP Managers Forum	IDP Coordinator
Premier's Coordinating Forum	Mayor and Municipal Manager
The IDP Indaba 1 & 2	Municipal Manager, Manager & IDP coordinator
ICT Managers Platform	ICT coordinator
MIG forum	Technical Manager
District Coordinating Forum	Mayor & Speaker
SALGA Working groups	<p>Councillor G Lottering: Municipal Finance and fiscal policy</p> <p>Councillor MD Jaftha: Community Development & Social Cohesion. SALGA women Commission.</p> <p>Councillor S Koonthea: Public Transport & Roads. Water Sanitation & Waste Management.</p>

7.2 Joint Planning Initiative (JPI)

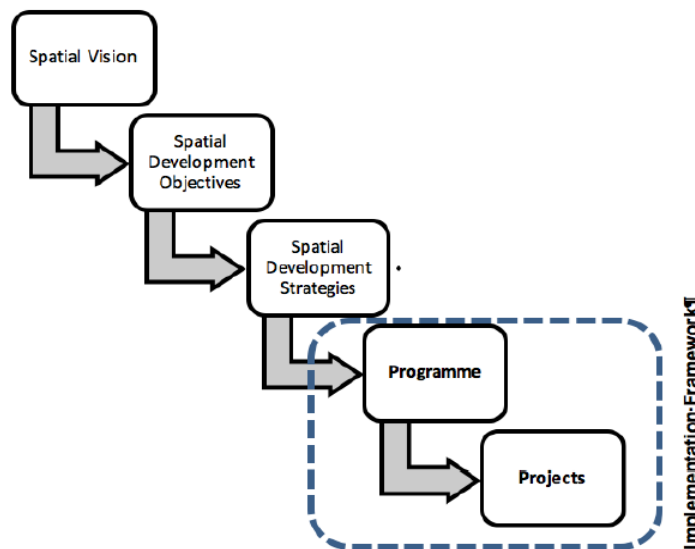

The National Development Plan (NDP) that has set an important vision to address challenges facing South Africa propels the Joint Planning Initiative of the Western Cape Province. Planning in the province has matured to a phase where joint planning and implementation is a fundamental element in ensuring sustainable and integrated service delivery.

JPI Strategic Intervention	Project Outputs	Lead Department	Supporting Department
Eradication of the Water, sanitation and landfill space backlogs	Implementation of the relevant master plans	Prince Albert Municipality	DEADP DHS DLG DTPW

Community Learning Centre	1. Business Plan 2. Implementation Plan for the CLC	Prince Albert Municipality	All

JPI Game changers 2017/18

7.3 Prince Albert Spatial Development Framework (SDF)

The Prince Albert Municipal council approved the SDF at its meeting held end of February 2014 that provides a framework with a 20-year horizon. To ensure the integration of the Spatial Development Framework and the Integrated Development Plan the SDF approved in 2014 is in the process of

amendment. The amendment process was initiated in July 2017 where the public was invited to register as stakeholders in the review process. No stakeholders registered. The Municipality again advertised for suggestions on the amendment to the SDF. Input was invited through advertisements, in public meetings and via the municipal radio programme. Several input were received that can be summed up as follows:

- Extend the urban edge in Prince Albert to include the air strip

- Identify additional business and faith-based premises in Klaarstroom, Leeu Gamka and Prince Albert.
- Land for emerging farmers.
- Protect the town farms and cultural heritage
- Development of Agri Parks hub and plantation in Prince Albert on the air strip and behind the EE Centre.

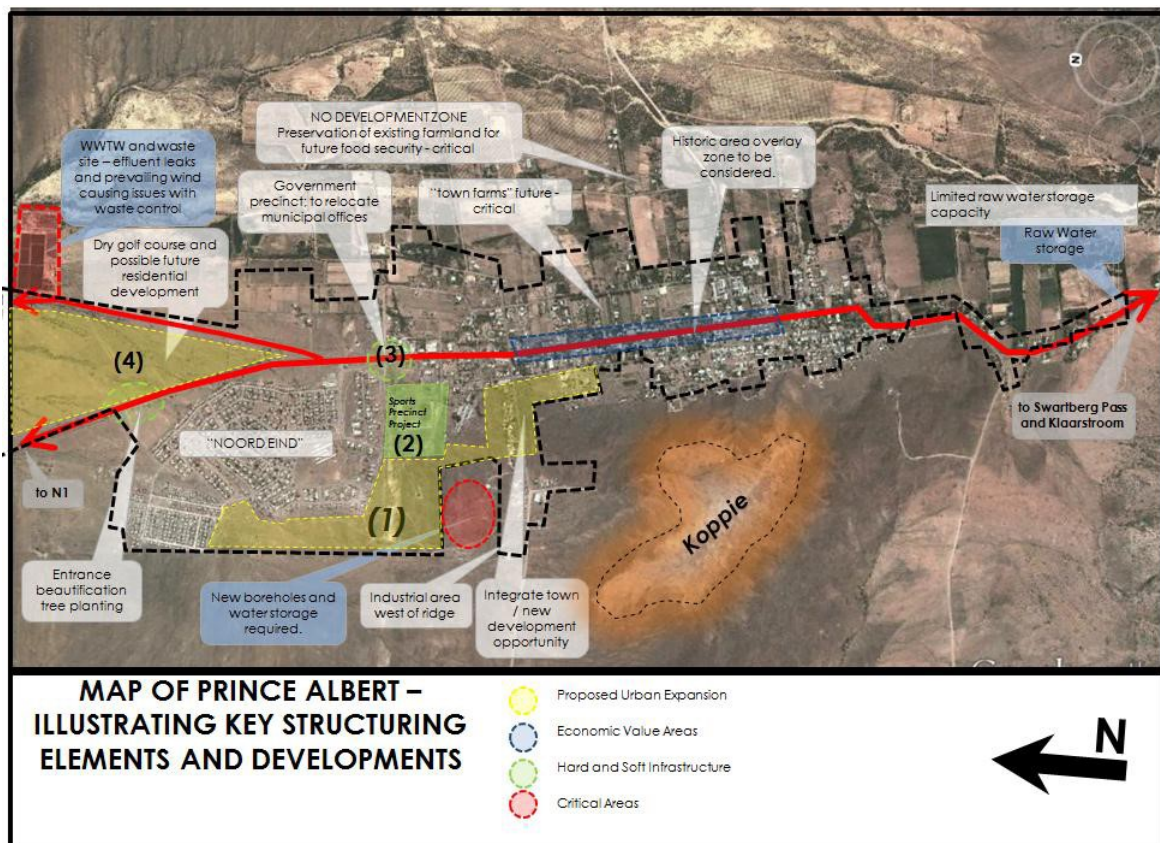

These spatial proposals will be spatially illustrated in the reviewed SDF that will then be advertised for 30 days to the public for their input, while the Minister of Local Government in the Western Cape will be afforded 60 days to comment on the proposed reviewed amendments. The Municipality adopted the 2014 SDF as is with the 2019/20 IDP and will continue its review of the SDF, for amendment. The provincial planning department is assisting with amending of the SDF and it is anticipated that the process will finish in July 2020.

Spatial facts listed in the SDF and IGP are summarised in the below maps and supporting tables:

Infrastructure Growth Plan

The Infrastructure Growth Plan was developed in collaboration with the Department of Local Government in April 2014. The ultimate goal of this plan is to put the municipality in a better position to do 3 - 10-year budgeting and to ensure that the most critical and beneficial projects are addressed.

Figure: Prince Albert SDF – development guidelines

Note that the above map will be changed to reflect the urban edge be moved to include the Air Strip.

Prince Albert: Challenges & Potentials

Approximately 130 hectares of land is reserved within the urban edge for future residential development, which is in excess of what is required to accommodate growth projected for the next 20 years. The future residential development areas are prioritized for infill development first, bridging the divide between North End and the town itself, with the outlying land being last to be developed.

The nature of the “infill development“ between North End and the town centre will be in the form of residential development, the development of sport and recreational activities and an extension of Mecuur Street to link it to the rest of the town’s street network. It is proposed that a business hub be developed along Voor- and Long Street, with faith-based activities to be allowed as infill development between erven 1729 and 1730; between 2289 and 2189; on a portion of erf 743 between the Access Centre and the top of Buitekant Street.

The town farms of Prince Albert are highly treasured and development of these farms should be carefully considered and as such a Steering Committee was established to compile guide lines for town farms for public participation.

Water availability is also a significant constrainer of the future growth of Prince Albert, as the area falls in an arid climatic zone. Existing water and watercourses must therefore be strictly protected and rehabilitated, where necessary, to ensure that the settlement has access to a sustainable and clean water supply. The Municipality increased their storage capacity to address water shortages.

Leeu Gamka: Challenges & Potentials

Approximately 50 hectares of land is reserved for future residential development, which is far in excess of the land required to accommodate future growth for the next 20 years.

The future residential development areas are prioritized to encourage the growth of Bitterwater towards Welgemoed, allow for a degree of infill development, and to promote commercial, retail, light industrial and transport-related development adjacent to the N1 highway.

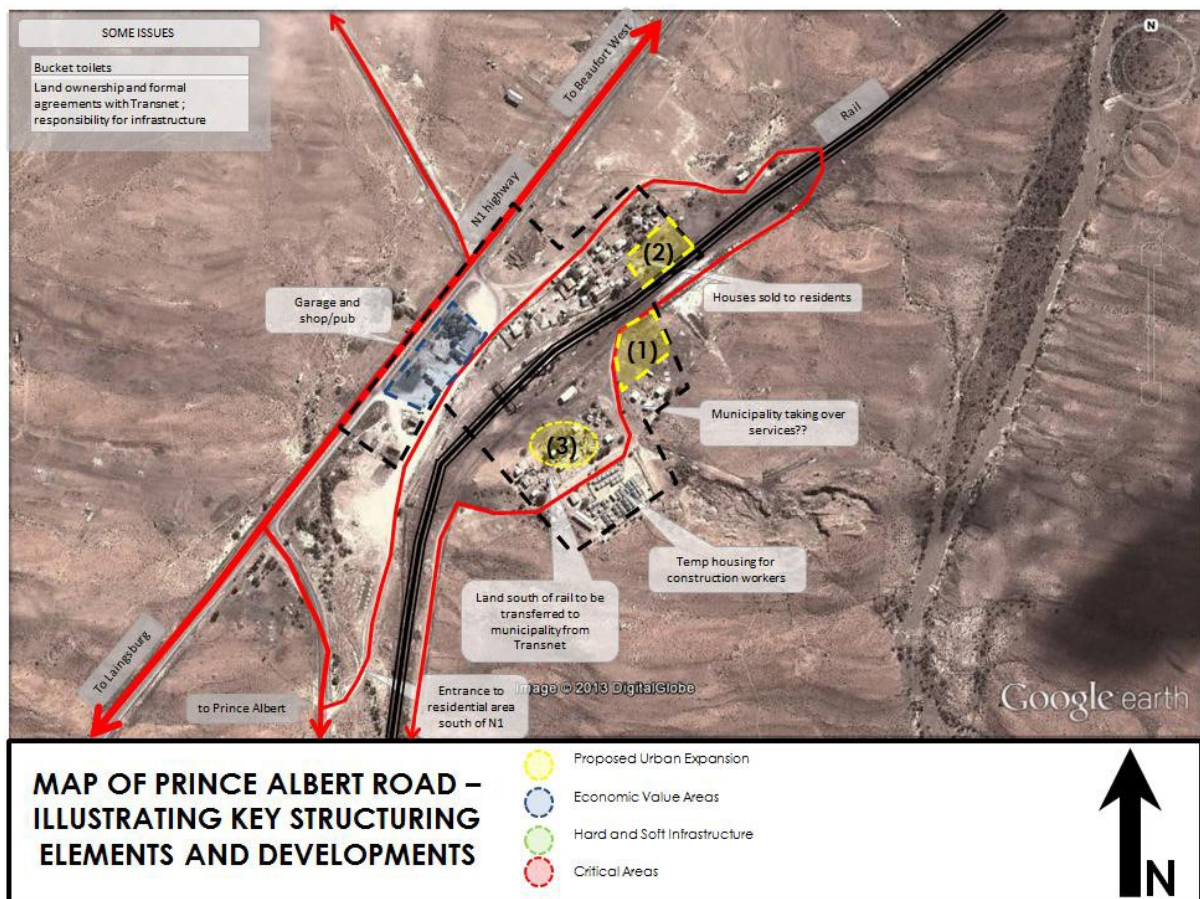

Business and commercial activities should be accommodated along the activity spine and focused towards the identified lower order neighbourhood nodes, as shown in the draft SDF map for the area - above. Extensive development on both sides of the N1 should be discouraged as this could result in traffic-related dangers (i.e. people crossing the busy N1 highway).

Note that the 80 zone in Leeu Gamka should officially be recognized as within the urban edge as it links the Stasie to Bitterwater and speed law enforcement by camera should be allowed in this area to mitigate road fatalities and accidents. This is a high-risk area.

Further note that the business erven opposite the Community Hall should be developed and one church erf should be developed there as well. An additional church erf should be developed next to the Childrens Park towards Mountain View.

The existing cemetery should be extended.

Figure: Prince Albert development elements

Prince Albert: Challenges & Potentials

- The Prince Albert Road entrance from the N1 lacks a sense of arrival; much can be done to enhance the first impression.
- The railway system and the national road which passes through Prince Albert Road causes noise pollution.
- Although future residential development is not encouraged, a total of 0.8 hectares of land is earmarked for future development, if required.

- The areas to the south of the N1 highway, which are earmarked for light business, should be reserved for transport related commercial and support activities.
- Local business and commercial activities should be accommodated towards the identified lower order neighbourhood nodes.

Klaarstroom: Challenges & Potentials

- Approximately 13 hectares of land is reserved for future residential development which is in accordance with the household growth projections. The future residential development areas are prioritized as follows: (see the draft Klaarstroom SDF, above)
- Priority Area 1, 2, 3 & 5: Ideal for BNG housing to bridge the spatial divide
- Priority Area 4: Ideal for GAP housing
- Priority Area 6: The lowest priority is allocated to this area for it does not promote the integration of Klaarstroom north and south.
- The density of new developments will be as high as 25du/ha.
- Business and commercial activities should be accommodated along the activity spine (main road) and focused towards the identified lower order neighbourhood nodes.
- The area north of the N12 which is earmarked for business development should accommodate a service station and transport related services.
- The 1:50 year flood line adjacent to the river should be taken note of, and no development within this area allowed.
- A new cemetery should be developed on the commonage.
- Faith based erven should be allowed as infill development.
- The first entrance to Klaarstroom – opposite the clinic should be reserved for business.
- The existing transit camp (informal settlement) should be moved closer to the river to allow for business development.

The following additional recommendations will be included in the review of the SDF namely:

- Setting out a capital investment framework for the municipality's development programs – to be done in 2019/20, depending on funding.
- It is recommended that the Municipality should include a section in the SDF summarising the optimisation of resource-use efficiency and the mainstreaming of sustainability. (2018/19)
- It is recommended that the municipality consider incorporating threatened ecosystem status of areas and represent this spatially.
- The Municipality will develop a town farm framework as development parameters (2017/18)
- The Municipality will develop a new zoning scheme to replace the outdated Scheme 8 regulations. The public participation process on this initiative, based on the development parameters supplied by Provincial Government, has already commenced and is projected to be completed during 2017/18.

The following interventions have been identified as part of the Spatial Development Framework.

Response Required	Municipal response	Timeframe
Road infrastructure development	Maintenance of internal roads and sidewalks is required, with additions and upgrades to the Non-Motorised Transport network proposed.	2017-2021
Town Entrance Node	To improve the entrance from the R407 (north & south) into Prince Albert to improve the first impression of the town.	2019/20
Sports & Recreation	Development of sports and recreation facilities between North-End and Prince Albert central.	2018-2021
New offices at Thusong	Facilitate the development of offices near Thusong Centre.	2019/2020
Activity street	Reinforce Church Street as the activity street of the settlement by promoting intensification of architecturally and heritage appropriate development.	2017-2021
Housing development	RDP and GAP residential development adjacent (West) of North-End subject to housing allocations.	2019/20
Beautification	To plant trees and do landscaping of Church Street and North-End.	2017-2021
Town entrance node development	Facilitate the improvement of the three main entrances of Klaarstroom through landscaping and signage, which portrays the unique sense of place of Klaarstroom.	2017-2021
Tourism Development	Facilitate the promotion and enhancement of the tourism route between Klaarstroom and Willowmore, as well as the route to Meiringspoort	2017-2021
Housing development	Promote new residential development between the historic and newer parts of the town.	2017-2021
Business node development	Facilitate the establishment of infrastructure for new service station planned for the northern side of the N12 when developer / investor is secured.	2017-2021
Town entrance node development	Facilitate the development of the entrances of Leeu Gamka through landscaping and signage in order to capitalize on the economic opportunity of being situated adjacent to the N1	2017-2021
Housing development	To accelerate BNG & 69 GAP housing development to bridge the spatial divide subject to funding from Province.	2017-2021
Business development	Business and commercial (transport related) activities to be promoted to the west of the N1.	2017-2021

Response Required	Municipal response	Timeframe
Tourism Development	The development of a railway/Anglo Boer War Museum is proposed in the area earmarked for tourism development and will be supported if funding can be obtained.	2017-2021
Town entrance node development	Facilitate the improvement of the main entrances of Prince Albert Road through landscaping and signage in order to capitalize on the economic opportunity of being situated adjacent to the N1.	2017-2021
Beautification	Tree planting and landscaping of the main structuring elements of Prince Albert Road.	2018/19
New Scheme Regulations	Development of new scheme regulations to replace outdated Scheme 8 Regulations	2017/18

Project emanating from the SDF

- a) A Municipal Planning Tribunal consisting of A Vorster, C Vele, E Vreken and D Carstens were appointed by Council. There is one vacancy that is in the process of being filled.
- b) Council have adopted the planning delegations. This includes the appointment of an Authorised Official and adopting their categorisation of land use applications.

The Municipality intends to use the proposed standard draft zoning scheme to be developed by Province. This will however, be taken through a public participation process.

7.4 Disaster Management

As per Section 53 (1) of the Disaster Management Act, 57 of 2005 each municipality must:

- prepare a disaster management plan for its area according to the circumstances prevailing in the area;
- co-ordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and
- regularly review and update its plan; and through appropriate mechanisms, processes and procedures established in terms of Chapter 4 of the Local Government Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.

Upon commencement on implementation of the Disaster Management Amendment Act (2015), Section 43 has been amended to include distinct obligations on local municipalities to establish and institutionalize capacity to develop and co-ordinate disaster management plans and the implementation of a disaster management function within the municipality.

The Prince Albert Municipality's Strategic Disaster Management Plan has been drafted as part of the Public Safety strategy, co-ordinated by the Prince Albert Municipality in terms of the Disaster Management Act, 57 of 2002 and will be integrated with all other strategic, tactical and

operational Plans and all other relevant Emergency Plans and Procedures and the IDP. Guidelines and strategies by the NDMC, the WVDMC, CKDMC and other relevant authorities are incorporated.

This plan has evolved over the past few years and subsequently the plan has been reviewed and amended to serve as a guiding policy on how the municipality will handle any type of disaster that might occur. When an unforeseen major event occurs, which cannot be dealt with on our own, the Disaster Management Plan is activated to manage and mitigate the impact of the event where after partner government departments and service providers are approached for assistance. The costs for disasters are normally covered either by reprioritising the budget or in terms of Sec 29 of the MFMA. The national disaster management framework provides for a phased approach to disaster risk management planning and implementation.

The objective of the Prince Albert disaster management plan is to define and describe the essential elements and procedures at the strategic level and mitigating major incidents or disasters (covering a wide range of hazards and threats, including natural and man-made disasters, service disruptions, domestic terrorist attacks, and other emergencies) and to ensure a rapid and effective response in case of a major incident or disaster occurrence, that will:

- Save lives,
- Reduce risk exposure,
- Reduce suffering,
- Protect property,
- Protect the environment
- Reduce economic and social losses and
- Provide for the safety and health of all responders.

Institutional Arrangements

DISASTER MANAGEMENT RISK REDUCTION STRATEGIES LINKED TO THE IDP

Both the Systems Act and the Disaster Management Act require the inclusion of this Plan into the Integrated Development Plan (IDP) of the Prince Albert Municipality. In order to ensure continuous linkages with the IDP, all departments and role players are linking disaster risk management into their strategies, operational planning and project implementation. This ensures the integration of disaster risk management into the IDP and future to ensure that all plans and projects are focused on contributing to disaster risk reduction and disaster preparedness – thus reducing the impacts of disasters on lives, property, community activities, the economy and the environment.

Financial and human resources remain a challenge in terms of disaster management. The Fire & Rescue Unit of Prince Albert Municipality do not fulfil the full disaster management functions, and human resources as well as equipment remains a concern. The Fire and Rescue Unit are understaffed and they do not have the necessary protective gear to enable them to respond safely

to disasters. The Municipality received a water tank and some protective clothing in 2015, but this is still not sufficient to address the function properly.

The Municipality further received a 10-ton fire truck in May 2017. Training on the correct use of this fire truck is essential as is basic fire-fighting skills for the staff and volunteers. The need for basic fire-fighting training at all municipalities in the District has also been raised at the regional Disaster Management Forum. The Municipality invited the registration of volunteers to strengthen the emergency services. A shared service emergency communication centre will be established in the Central Karoo. A HAZMAT truck will also be stationed at the Central Karoo District to address HAZMAT emergencies in the region.

One of the biggest concerns remains the operations on the N1. SANRAL must be approached to provide financial remuneration in this respect. The Central Karoo District Municipality supports Prince Albert Municipality and provides services as provided for in the relevant legislation. Another risk is illegal electrical connections in houses and backyard dwellings. The Municipality plan to launch door to door visits to inspect electrical connections as a prevention measure. The fire alarm program of provincial government is also investigated for possible implementation in the municipal area.

The Disaster Management Plan was reviewed in October 2017, with the assistance of the Central Karoo District and the Provincial Disaster Management Centre, a community risk register was compiled. In addition to this, province has also assisted the municipality with drafting a disaster risk assessment report. The community was part and partial of the public participation process. The report was officially handed over to the municipality on 7 February 2018. The report can be perused on the municipal website at www.pamun.gov.za.

COVID-19 NATIONAL STATE OF DISASTER

On 15 March 2020 President C Ramaphosa declared a National State of Disaster in terms of the Disaster Management Act, 2002. Since this declaration more than 80 pieces of legislation has been issued, covering different sectors and issues.

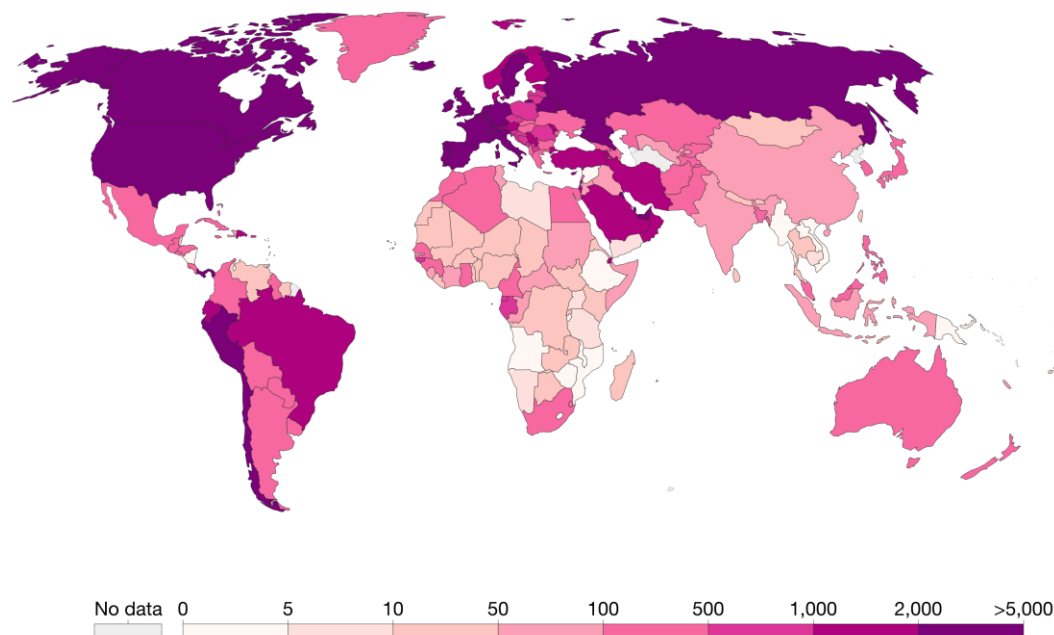

In the following graphs and tables the history of COVID-19, the spread of the pandemic and a summary of different initiatives is included.

This is an evolving pandemic that will pose severe challenges of all roleplayers, community, government, municipalities, NGO's, etc.

There will be no quick fixes and the response to COVID-19 will evolve and must continuously be updated. It is thus imperative that the updated documents that will be displayed on the Municipal website, must be read in conjunction with this reviewed IDP.

Total confirmed COVID-19 cases per million people, May 20, 2020

The number of confirmed cases is lower than the number of total cases. The main reason for this is limited testing.

COVID-19 Timeline in South Africa

- **March 6, 2020:** South Africa confirms its first coronavirus infection
- **March 15, 2020:** President Ramaphosa announces a national state of disaster to deal with the threat of COVID-19 (38 positive cases)
- **March 19, 2020:** Confirmed cases cross the 100 mark
- **March 23, 2020:** President Ramaphosa announces a nationwide lockdown from 26 March to 16 April (274 positive cases)
- **March 26, 2020:** A three-week nationwide lockdown begins (709 positive cases)
- **March 28, 2020:** Confirmed cases cross the 1 000 mark and first coronavirus death reported
- **April 9, 2020:** President Ramaphosa announces a two-week extension of the lockdown until 30 April (1 934 positive cases; 18 deaths)
- **April 23, 2020:** President Ramaphosa announces that the country will follow a five-level risk-adjusted approach to transition from the nationwide lockdown, and that effective 1 May, South Africa will ease lockdown restrictions to Level 4 (3 635 positive cases; 65 deaths)
- **April 29, 2020:** Confirmed cases cross the 5 000 mark
- **April 30, 2020:** Confirmed deaths cross the 100 mark
- **May 1, 2020:** South Africa moves from Level 5 lockdown to Level 4, opening up more economic activity
- **May 10, 2020:** Confirmed cases cross the 10 000 mark
- **May 13, 2020:** President Ramaphosa announces that most of the country be placed on Level 3 by end of May

COVID-19: A GLOBAL PANDEMIC

WHO declared COVID-19 a global pandemic on 11 March 2020. Data from WHO and DOH, as at 21 May 2020

	30 April 2020	21 May 2020
Global infection level	3 256 570	5 047 377
SA infection level	5 647	19 137
Global deaths	233 363	329 816

SA deaths	103	369
-----------	-----	-----

Total confirmed COVID-19 cases per million people

The number of confirmed cases is lower than the number of total cases. The main reason for this is limited testing.

PROVINCIAL INFECTION TRENDS

ECONOMIC ACCESS TO ADDRESS PANDEMIC

Government has prioritised key interventions, including:

1. Economic impact assessment and measures to mitigate;
2. Supporting health measures: essential health and PPE stocks;
3. Food and hygiene product supply-lines: from farm to shop;
4. Solidarity and social protection measures to assist the vulnerable;
5. Regulatory support to facilitate cooperation and keeping firms in business;
6. Protecting consumers: Action against unfair price rises;
7. Global coordination and engagement; and
8. Lockdown/Reopening the economy: risk adjusted approach.

ECONOMIC IMPACT AND MITIGATION

Estimates of the impact on the economy vary at the moment, and will be driven by trajectory of the virus both in South Africa and globally:

- The IMF estimates that GDP will fall by 5.8% in 2020;
- The SARB estimates that GDP will fall by 6.1% in 2020;
- The IDC estimates that GDP will fall by 6.3% in 2020;
- New (May 2020) forecast by Deloitte SA estimates that GDP could fall by 9.1% in 2020; and
- National Treasury economic modelling suggests employment losses are likely to be substantial.

R500 billion coronavirus budget:

- R200 billion loan guarantee scheme with major banks, National Treasury and the SARB.
- R100 billion for the UIF's benefit to support workers' wages and assist companies in distress.
- R70 billion in cash flow relief or direct payments to businesses and individuals, through a 4-month holiday for companies' skills development levy contributions, fast-tracking VAT refunds and a 3-month delay for filing and first payment of carbon tax
- R50 billion on a temporary 6-month Coronavirus grant towards relieving the plight of those who are most desperately affected by the coronavirus,
- R40 billion for income support payments for workers whose employers do not pay their wages.

- R20 billion for personal protective equipment for health workers, community screening, increase in testing capacity, additional beds in field hospitals, ventilators, medicine and staffing.
- R20 billion to municipalities for the provision of emergency water supply, increased sanitisation of public transport and facilities, and providing food and shelter for the homeless
- R2 billion to assist SMEs and spaza shop owners and other small businesses.

Additional measures, incl:

- Tourism support Fund
- Emergency loan provisions in National Credit Act
- Small Business Fund

NATIONAL CREDIT ACT – CONSUMER ACCESS TO FINANCE

- The National Credit Regulator has issued a circular providing guidelines to banks who wish to make emergency loans available to consumers during COVID-19
- The emergency loan provisions can be used to provide credit to consumers who suffered a loss in income; destruction of property or experienced death in the family
- The provisions also make allowance for consumers who need access to finance to support family members and friends who have lost income during the COVID-19 disaster
- Emergency loans suspend some of affordability criteria in the Act, making it easier for consumers to access finance
- To further support access to finance, it is expected that microfinance lenders will be allowed to operate during Level 3 of the lockdown

SOLIDARITY AND SOCIAL PROTECTION

SUPPORT FOR WORKERS IN DISTRESS

- UIF ‘ordinary’ payouts of R1.8bn;
- UIF TERS has disbursed almost R14.1bn for payment to employers (since 16 April 2020); (R2.2 billion at 30 April)
- These employers applied on behalf of 2.5 million workers;
- Through NEDLAC, social partners are engaging on how best to prepare workplaces and developing a guide to the conditions under which workers can refuse to return to work e.g. due to unsafe work conditions; and
- Also through NEDLAC, social partners are working with the Department of Transport (DOT) to develop Regulations and Directions to address the safety of workers while travelling to work.

- **The NEF has started implementing the COVID-19 Black Business Fund:**
- The Fund received over 300 applications amounting in excess of R1 billion.
- To date 12 projects for the value of approximately R80 million have been approved under the Fund
- **Relief for NEF Clients in COVID-19 Distress:**
- The NEF has granted repayment holidays to 47% of businesses in its invested portfolio which repayment holiday will be for a period of up to three months from April to June 2020.
- This is to help safeguard the sustainability of the businesses whose operations are distressed due to COVID-19.
- This will amount to a total R30 million postponement in capital repayments. In addition, the NEF will grant a zero rating on interest for these eligible investees over the same period, which will result in a total R20 million benefit for the clients.

RISK ADJUSTED STRATEGIC APPROACH

Level 5	High virus spread and/or low health system readiness	Full lockdown
Level 4	Moderate to high virus spread with low to moderate readiness	High restrictions
Level 3	Moderate virus spread with moderate readiness	Moderate restrictions
Level 2	Moderate virus spread with high readiness	Reduced restrictions
Level 1	Low virus spread with high readiness	Minimum restrictions

MOVING FROM LEVEL 4 TO 3

COVID-READY WORKPLACES

- Department of Employment & Labour issued workplace directions.

- COVID-19 prevention and mitigation plans and protection measures:
 - Identification and protection of vulnerable employees;
 - Safe transport of employees;
 - Screening of employees on entering the workplace;
 - Prevention of viral spread in the workplace; and
 - Hand sanitisers and face masks.
- Monitoring systems must be in place to ensure compliance with safety protocols and identify infections among employees.
- Partnerships with unions to get work-places COVID-19 ready.
- Mass testing for workplaces with over 500 workers.

Disaster preparedness plans

Appropriate disaster preparedness, response and recovery plans have been developed for a risk that cannot be prevented or mitigated. The identified disaster risks have been prevented or mitigated through the implementation of risk reduction programmes:		
	Response	Comments:
For the Municipal Area	Yes	<ul style="list-style-type: none"> • Identification of Lead Disciplines and Supporting Disciplines for each identified hazard which has a level of disaster-risk. • Risk-reduction methods incorporated into the integrated project planning activities by all role-players.

		<ul style="list-style-type: none"> Regular Project reviews i.t.o. the validity of risk reduction initiatives; Staff training to include risk reduction and response requirements; Preparedness initiatives to include adequate capacity elements comprising of sufficient and trained staff, that there is an excess of minimum of the required standard of equipment available, that the sourcing of supplementary resources has been identified, contingency planning, etc.; Establishment, equipping and staffing at each of the of the Joint Operations Centre's (JOCs)(for tactical & strategic co-ordination) at the Regional and Provincial Levels and liaison with the National Level, Establishment, equipping and staffing at Venue Operations Centre's (VOCs) (for pro-active and re-active operational co-ordination) as well as providing for the rapid establishment of any Forward Command Posts (FCPs), where necessary. The production of the necessary disaster-risk management plans and related Standard Operating Procedures (SOP's) by each Lead Discipline and Supporting Discipline for all identified hazards and support to the drafting of the specific Venue Safety & Security and DM Plan to ensure continuous communication, integration and co-ordination between all the Disciplines involved at each location; Regular exercising of crucial aspects of the various DRM and Safety & Security Plans and Procedures which have been developed; Regular inter-disciplinary strategic and tactical planning and communication to ensure overall preparedness and response readiness; Awareness & preparedness i.t.o. disaster risks and their roles, both pro-actively and re-actively, of the surrounding communities.
For projects identified in the IDP	Yes	Part of each project plan

Disaster management requirements

The Municipality has instituted the following disaster management requirements:		
	Response	
Established a functional Disaster Management Centre	No	Established at District Level
Appoint a Head of Centre	No	The District Head oversees tasks on an ad-hoc basis
A functional Disaster Management Advisory Forum	No	The CKDM Advisory Forum are being utilized to engage with different stakeholders on a regular basis
A Disaster Management (DM) Plan has been developed	Yes	Date of Adoption: 26 June 2014 Res: 38/14 - reviewed annually

This DM Plan does include Sectoral Plans	Yes	Sector plans form part of the DMP
--	-----	-----------------------------------

Disaster management functional system

Disaster Management has a functional system that complies with the following:		
	Response	
GIS data for disaster management	No	PAMUN in collaboration with CKDM are prepared to respond on the event of natural disasters such as fire, floods etc.
Risk reduction planning	Yes	None
Early warning system	Yes	None
Preparedness, response and recovery planning (Generic Plan)	Yes	None
These systems are linked to:		
	Response	
Other line functions in the Municipality	No	In process
Other Municipalities	No	
Security Forces (SAPS)	No	
Provincial EMS	No	
Provincial Departments	No	
The National Disaster Management Centre	No	
Comments: Linked to CKDM	No	

Disaster Management Plan status quo

The Municipal Disaster Management Plan is completed, submitted and approved by (answer where applicable):		
	Response	
Other Municipalities in District Municipal Area	No	In process
District Municipal Disaster Management Centre	Yes	No feedback

Provincial Disaster Management Centre	Yes	Assisted with compilation; no formal feedback
---------------------------------------	-----	---

8. Disasters dealt with during the past IDP Review cycle:

Hazardous situation	Description	Response
Fires	Vehicle accidents	Fires has been contained with minimal damage to property and loss life
	Structure fires	Fire has been contained with minimal damage to property and loss life
	Landfill fires	Fire has been contained with minimal damage to property and loss life
	Veld fire at Swartberg Mountains	Provincial and district mandate: Fire has been contained with minimal damage to property and loss of life

Risk assessment of IDP projects

2 Risks Assessment of high risk IDP Projects					
Project Ref	Project Description	Primary & Secondary Stakeholders	Risk Rating	Risk Reduction actions	Comments
Ward 2,3,4, 1	Covid-19 response	Division: All municipal and government, private sector role players	High risk	Operational work plans for OCHS Strategic plans to mitigate the social and economic impact of COVID-19	Explore strategic partnerships and support initiatives for economy
Ward 2,3,4	Housing Development	Division: Infrastructure Services	Medium risk	Determine the preparedness of the bulk water & sanitation infrastructure to accommodate these development	Explore alternative water sources and design effective storm water systems as part of the housing development project

2 Risks Assessment of high risk IDP Projects					
Project Ref	Project Description	Primary & Secondary Stakeholders	Risk Rating	Risk Reduction actions	Comments
Ward 4 Ward 2,3,4	Upgrade Waste water Treatment Plant	Division: Infrastructure Services	High risk	Upgrading of bulk infrastructure	Minimise the risk of pollution to the estuary which will compromise environmental integrity and subsequently have negative impact on tourism
Ward 2,3,4	Upgrade storm water systems	Division: Infrastructure Services	High risk	Prevention & Mitigation	It will minimise the risk of flooded houses in the area

Identification of possible risks to the Prince Albert municipal area:

Possible risks:

- Disruption of Electricity Supply / Power Failure (sustained)/ Cable theft (communication)
- Road Traffic Incident, incl. Road Transportation Disruption/Blockades/Traffic Congestion
- Disruption of Water Supply
- Drought
- Extreme Weather
- Floods
- Snowfalls
- Windstorms
- Hazmat Incident or Chemical or Biological Agents' or Radio-active Materials' (CBR) Release / Rail incident
- Fire – Structural Effects of Pyrotechnics
- Rail Incident
- Hydraulic Fracturing (Fracking)
- Desertification / Loss of Bio-diversity

- Disruption of Sanitation & Storm water Systems
- Disruption of Solid Waste Removal Services
- Epidemic / Major Infectious Disease Outbreak, incl. Food Safety issues
- Environmental Pollution – Ground / Air / Water
- Disruption of Commercial or Governmental Activities
- Hooliganism / Civil Unrest / Rioting / Public Disorder
- Structural Collapse
- Bomb Threat / Hostage-taking
- Bombing / Explosion / Terrorism
- Predator
- Earthquake
- Fire – Veld
- Aircraft Incident
- Petrol Depots
- Closing of N1
- Closing of Swartberg Pass

Top priority disaster risk profile quantification

The following disaster risks are quantified below in reference to probability rating, potential impact rating and risk rating.

Disaster Risk probability and rating

Combined Disaster-Risk Profile Quantification - Assessment & Vulnerability for Each Hazard					
Initial HRAVA, Conducted Prior To Any Special Risk Reduction Efforts Being Undertaken.					
Hazard	Lead Discipline	Probability Rating	Potential Impact Rating	Risk Rating	Vulnerable areas/ Populations
Road Traffic Incident, incl. Road Transportation Disruption/Blockades/Traffic Congestion- High	Prov. Traffic, Municipal Traffic, SANRAL, FBS Muni, SAPS, EMS, <u>Support</u> : Social Dev	4	3	7	Hospitals, Transport Systems- N1, R407, R327; N12
Covid-19 pandemic	Dept of Health, Local Government, SAPS, Social Development,	4	5	10	All sectors in the economy
Disruption of Electricity Supply / Power Failure (sustained)/ Cable theft (communication) - High	Eskom; Prince Albert Muni;	4	3	7	Agricultural areas (Farming communities); All Municipal areas.
Road Traffic Incident, including Road Transportation Disruption/ Blockades / Traffic Congestion	Municipal Traffic, SAPS, Provincial Traffic	4	3	7	All arterial routes, especially, Transport Systems- N1, N12, R61
Floods	All Municipalities; Disaster management; Agriculture; SANRAL;	3	4	7	Towns (Communities); Schools; Transport Systems- N1, N12, R61; Agricultural community.

	SAPS; EMS; Provincial & Municipal Traffic; Dept. Education.

Summary of Emergency Response Strategy

- Development of the Strategic Disaster Risk Management Plan and Safety & Security Plans for the whole area of Prince Albert Municipality, as well as the special Venue DRM Plans and other contingency plans, as identified – these Plans will be integrated into the CKDM Municipal Disaster Management Plan to ensure a “seamless” response to all Incidents occurring in Prince Albert Municipality’s jurisdiction.
- Ensure implementation of all line function Disciplines’ Emergency Response Plans and SOPs; Recruitment and training of supplementary staff by all Disciplines, including volunteers for identified functions;
- Testing and training through desktop and physical exercises of the Disaster Response and Relief Plans;
- Installation and testing of adequate inter-agency communications systems and the equipping of a Control Centre at the District and staff to allow for tactical and operational communications;
- Activation of the PA Municipality Joint Operations Centre, CKDM and the Provincial Safety & Security JOC (ProvJOC), with representation of by all Role-players at the strategic level, allowing for continuous monitoring of the prevailing situation and for immediate facilitation of adequate response to any major incident and for resource supplementation as required.

Emergency Evacuation of a Disaster Area: Procedure

Emergency responses to many of the hazards which have been identified as having a possible disaster risk, will differ although the respective responses to these hazard occurrences may have common responses i.e. the possible requirement for either a partial or full evacuation of the area which has been, or which might still be, affected by hazard (called the Incident Site).

The following sites have been identified in the respective towns to evacuate residents to:

Prince Albert	Sydwell Williams and Odendaal Hall
Leeu-Gamka	Community Hall
Klaarstroom	Community Hall

7.5 Storm water Master Plan

PAM has a storm water bylaw that aims at regulate and manage storm water related activities in built-up areas. The bylaw prohibits any activities by members of the public that may impair operations, maintenance of storm water infrastructure and storm water quality or cause flooding. The Prince Albert Water Treatment Works (WTW) was identified as being a flood prone area as it located near the Dorps River. A recommendation was made in the report for the investigation of the 1:50 year flood line and relocation of the WTW. The PAM SDF recommended that a 100-year floodline be used as a means of protecting properties and habitats from flood damage. Buffers should be should be determined where possible and for small drainage systems where a floodline cannot be determined a 32m buffer from the top of the bank of the drainage line is prescribed.

The SDF also forewarns that any development within the floodplain will require a report from a registered professional engineer that the development can adequately accommodate the floodwater and prevent any unnecessary damage and to the habitat or building to be included with the building plans. Those that do not have must include new storm water management plans. Any proposed development or redevelopment within the floodplain must be supported by a report by a registered professional engineer to ensure that any new or existing structure can withstand the forces and effects of floodwaters. If building plans are submitted in respect of proposed buildings within the floodplain and such a report has not previously been submitted, it must be included with the building plans.

Record Management

Sound records management is fundamental for good governance and effective and efficient administrator. It forms the basis for formulating policy, managing resources and delivering services to the public. Records management also provides a basis for accountability and protecting the rights of individuals. To support continuing service delivery and provide the necessary accountability, governmental bodies, including municipalities, should create and maintain authentic, reliable and usable records. They should also ensure that the integrity of the records is protected for as long as they are required as evidence of business operations.

In terms of the Provincial Archives and Records Service of the Western Cape Act, 2005 (Act No.3 of 2005, as amended) it is the role of the Western Cape Archives and Record Service to promote efficient administration by means of sound records management. Records management is the process of ensuring the proper creation, maintenance, use and disposal of records throughout their life cycle to achieve efficient, transparent and accountable governance. It is therefore required of all governmental bodies at the Provincial level of government, all provincial administrations as well as local authorities to put in place a records management policy. The Prince Albert Municipality, as a local authority, is compelled to keep information resources to support its operations, as well as to fulfil legal and other obligations. The Western Cape Archives and Records Service requires of governmental bodies, including Municipalities, to implement and maintain Integrated Document Management Systems that provide as a minimum the following records management functionality:

- managing a corporate file plan according to which records are filed,

- managing e-mail as records,
- managing web-sites as records,
- maintaining the relationship between records and files, and between file series and the file plan,
- identifying records that are due for disposal and managing the disposal process,
- associating the contextual and structural data within a document,
- constructing and managing audit trails,
- managing record version control,
- managing the integrity and reliability of records once they have been declared as such, and
- managing records in all formats in an integrated manner.

Mr G van der Westhuizen is the Records Manager of Prince Albert Municipality and is tasked with the duty to ensure that the Municipality meets all the applicable legislation in terms of Records Management. During the last inspection by the Western Cape Archives and Records Services several shortcomings were identified, including a lack of proper filing, outdated policies and authorisations as well as a lack of proper storage. SALGA have been providing assistance to address the backlog in filing and preparation of documents for transfer to the Western Cape Archives. The Municipality procured an electronic document management system, Collaborator, during 2016 and are currently implementing the said system.

A key instrument in ensuring this is the adoption of a Manual of Access to Information, adopted by Council in March 2017 and available on the Municipality's website www.pamun.gov.za

7.7 ICT

The Municipality appointed an ICT Steering Committee existing out of:

PW Erasmus	Senior Accountant
D Plaatjies	Head Expenditure
C Jafta	IDP Coordinator
G vd Westhuizen	Operational Manager

The ICT Steering Committee has an approved term of reference. The Municipality has an ICTnGovernance Policy.

The Municipality has no official ICT officer. ICT Help Desk support is provided on a Shared Service basis with the Central Karoo District. Ubertech is the service provider.

With a limited budget available the purchasing of new equipment remains a challenge. The Municipality faces significant challenges in that the financial management software program previously used is not mSCOA compliant. The municipality is migrating to the VESTA system. The two financial systems are currently running in tandem. The financial management system upgrade

requires a great financial burden and places a huge demand on the HR capacity. mSCOA compliance in respect of the new financial system remains the biggest governance risk in the municipality.

7.8 Risk Management

Section 62 (1)(c)(i) and 95 (c)(i) of the Municipal Finance Management Act, No. 56 of 2003, states that: *“the accounting officer of a municipality is responsible for managing the financial administration of the municipality, and must for this purpose take all reasonable steps to ensure- that the municipality has and maintains effective, efficient and transparent systems – of financial and risk management and internal control;”*

According to National Treasury’s Public Sector Risk Management Framework the definition of risk is an: “... unwanted outcome, actual or potential, to the Institution’s service delivery and other performance objectives, caused by the presence of risk factor(s),”

Risk Manifest as negative impacts on goals and objectives or as missed opportunities to enhance performance. Stakeholders expect the municipality to anticipate and manage risks in order to eliminate waste, inefficiencies, reduce unplanned events / crises and to continuously improve capacity for delivering on their mandates / commitments as depicted in the IDP.

The table below reflects the Risk Committee:

Member	Capacity	Department
1. A Vorster	Chairperson	Municipal Manager
2. J Neethling	Member / Champion	Finance
3. G vd Westhuizen	Member/ Champion	Operational Manager

Problem Statement

- Having to create a culture of Enterprise-wide Risk Management;
- in terms of awareness and effective application thereof,
- at all levels of functionality and responsibility;
- at each municipality within the district;
- in order to achieve and maintain a leading risk maturity and promote a sustainable risk profile.

Strategic Risks

- The risk of financial sustainability for the immediate and longer term – Being addressed through the development of a long-term financial strategy.
- Capital funding for projects decreasing, leading to increase in external funding required Included in the long-term financial strategy.
- Replacing old dilapidated infrastructure network – MIG funding applications submitted

- Re-vitalise local economy – through Agri Parks projects, labour intensive capital projects, neighbourhood revitalization initiatives such as the establishment of Parks, upgrading of roads etc.

Operational Risks

- MSCOA compliance and change to new financial software program
- Lack of division of functions in employment corps – internal audit program to include spot checks
- Flat organisational structure with limited capacity – develop smarter ways to work.
- Poor record keeping – implementation of electronic record system
- Loss of key data – Off site backup facility needed
- Outdated land use register – new register to be compiled.
- Registered town planner required – assistance from Provincial departments to be solicited.
- Ageing infrastructure – business plan to be submitted via MIG and partnerships
- Retaining qualified professional staff – appoint key staff members

Anti-Corruption and Anti-Fraud

Section 83(c) of the Municipal Systems Act refers to the implementation of effective bidding structures to minimize the possibility of fraud and corruption and the Municipal Finance Management Act (MFMA), section 112(1) (m)(i) identify supply chain measures to be enforced to combat fraud and corruption, favouritism and unfair and irregular practices. Section 115(1) of the MFMA states that the accounting officer must take steps to ensure mechanisms and separation of duties in a supply chain management system to minimize the likelihood of corruption and fraud.

Nr	Risk	Directorate	Impact	Likelihood	Priority2	Control Effectiveness (for risks within Municipality's control)	Residual Risk	Ability to Control Risk	Responsible Person	Existing Controls in Place	Control Weaknesses	Corrective actions necessary

7.9 Developed Strategies

Name of strategy	Developed Yes/No	Date Adopted/Reviewed
Anti-corruption and Fraud Prevention strategy and Implementation plan	Yes	Reviewed in June 2018
Risk Management Policy	Yes	Reviewed in June 2018
Risk Management Strategy and Implementation Plan	Yes	Reviewed in June 2018

Members of the Audit Committee which is also the Performance Audit Committee

Name of representative	Capacity
A Dippenaar	Chairperson
N van Wyk	Member
P Theron	Member
A Badenhorst	Internal Auditor

Internal Auditing

Moore Stephens is the Internal Auditor of Prince Albert Municipality. They are appointed on a Shared Service Basis in the Central Karoo District.

Performance Management

Performance Management is done in terms of the Prince Albert Municipality Performance Management Policy and uses the Service Delivery Budget Implementation Plan (SDBIP) as its basis. The MFMA defines the SDBIP as:

“a detailed plan approved by the mayor of a municipality in terms of section 53 (1) (c)(ii) for implementing the municipality’s delivery of services and the execution of its annual budget and which must include (as part of the top-layer) the following:

(a) projections for each month of:

(i) revenue to be collected, by source: and

(ii) operational and capital expenditure, by vote.

(b) service delivery targets and performance indicators for each quarter”.

The SDBIP is a management, implementation and monitoring tool. It enables the Municipality to give effect to its Integrated Development Plan (IDP) and Budget. The SDBIP is a layered plan comprising a Top Layer SDBIP and Departmental SDBIP's. The Top Layer SDBIP comprises quarterly high-level key performance indicators and service delivery targets for each quarter and is a public document. Performance reporting on the top layer SDBIP is done to the Mayoral Committee and Council on a quarterly, half yearly (Mid-year Budget and Performance Assessment Report) and annual basis (Annual Report). Any amendments to the Top Layer SDBIP must be approved by Council following the submission of the Mid-year Budget and Performance Assessment Report and the approval of the adjustment budget.

Departmental SDBIP's are informed by the Top Layer SDBIP and contain more detail. Departmental SDBIP's are used by Portfolio Heads and the Senior Management of the administration to monitor performance of individuals and departments on a monthly basis. Monthly performance reports are submitted to the Portfolio Committee assigned to each Department after which these reports are noted by Council. Amendments to Departmental SDBIPs are done on approval by the Municipal Manager. The Municipalities draft key performance indicators are attached as annexure C. The final SDBIP will be approved by the Mayor within 28 days of the approval of the budget.

7.10 Sector plans and strategies

The Municipality's sector plans can be summarised as follows:

Sector Plan	Status of Plan
Communication Strategy	Adopted
Performance Management Policy Framework	Adopted
Risk Management Strategy	Adopted
Long Term Financial Plan	Drafted – to be tabled with IDP
Local Economic Development Strategy	Drafted – to be tabled with IDP
Integrated Human Settlement Plan	Drafted
Electricity Master Plan	Drafted
Air Quality Management Plan	To be tabled with IDP
Disaster Management Plan	To be tabled with IDP
Law Enforcement Strategy	To be developed
Employment Equity Plan	Adopted
Skills Development Plan	Adopted
Integrated HIV/ Aids Plan	To be developed
Integrated Waste Management Plan	To be adopted with IDP
Pavement Management Plan	To be developed
Integrated Transport Management Plan	Developed with CKDM and adopted by Council
Storm water Management Plan	Developed – to be adopted by Council
Comprehensive Infrastructure Plan	Adopted
Water Service Development Plan	Adopted
Integrated Infrastructure Maintenance Plan	To be developed
Integrated Infrastructure Investment Plan	To be developed
Asset Management Plan	Adopted
Climate Change Plan	In process of development with CKDM

Spatial Development Framework	Adopted – to be reviewed with IDP
-------------------------------	-----------------------------------

Highlights of each of the above adopted sector plans is explained below:

Spatial Development framework (SDF)

<p>Status of the Reviewed SDF: Aurecon South African was appointed by the National Department of Rural Development Land Reform (DRD&LR) to prepare the original municipal Spatial Development Framework (SDF) for Prince Albert Local Municipality and this was adopted in 2014 and are currently under review. The provincial planning department is assisting the municipality in this regard. This process will be finished by end of June 2020.</p>	<p>The response required includes the following:</p> <ul style="list-style-type: none"> • Tabling amendments to Council with draft IDP • Advertise reviewed SDF for 30 days for public comment • Await comments from MEC for 60-day period. • Table final reviewed SDF to Council in August 2020.
--	---

Comprehensive Bulk Infrastructure Plan (CIP)

<p>With the assistance of the DLGH and based on the public tender process, the CKDM appointed BKS(Pty) Ltd (BKS) to compile a Comprehensive Bulk Infrastructure plan (Water and Sanitation) Phase 2 for the CKDM. Thus, this CIP for PAMUN was development. The development of Comprehensive Infrastructure Plans (CIPs) is introduced to identify and quantify backlogs in infrastructure the needs and delivery challenges. The intention is to formulate a delivery programme per municipal area for addressing these needs to strengthen IDPs. In addition to local municipal CIPs, is planning on a district basis as applicable to this assignment, is aimed at establishing the bottlenecks and challenges regarding municipalities meeting set targets at district level.</p> <p>Objective:</p> <ul style="list-style-type: none"> • To support the development of a planning culture in the municipality, to collect information on infrastructure related needs and initiatives, and to develop 	<p>Response required:</p> <p>Priority bulk water infrastructure projects:</p> <ul style="list-style-type: none"> • New 500 kl and 2 500 kl reservoirs & pipeline Prince Albert • New 3.25 MI/day WTW Prince Albert • WDMC project Leeu –Gamka • Development of three boreholes in Leeu Gamka. • Development of two boreholes in Klaarstroom <p>Priority bulk Wastewater infrastructure projects</p> <ul style="list-style-type: none"> • New standby pump unit for sewer outfall pump station Leeu-Gamka • Upgrade/replace main sewer pump station and rising main Klaarstroom • New gravity outfall sewer Prince Albert Road. • New 2.1 kl/day package plant WWTW Prince Albert Road.
---	--

<p>intervention plans towards achieving the Government's stated goals of eradicating service backlogs in the country.</p> <ul style="list-style-type: none"> • Ensuring that the necessary infrastructure assets are provided operated and maintained. • Ensuring that the necessary funding is available. • Ensuring that an institutional model exist for providing the necessary skills, processes and procedures to manage the assets. • Ensuring that the necessary bulk supplies are available. • Ensuring that municipal growth needs are addressed. 	<p>The estimated cost of the priority bulk Water & Waste Water infrastructure projects is summarised in the actual Comprehensive Infrastructure Plan (CIP) (Pages :121-122).</p>

Integrated Transport Plan

<p>Status: Under Review</p> <p>The CKDM appointed CSIR to compile an integrated Transport Plan (ITP) for the District. Thus, this ITP for PAMUN was developed. Local Integrated Transport Plan (LITP) is the responsibility of the Central Karoo District Municipality as Mutually agreed with the Local Municipality.</p> <p>Objective:</p> <p>The transport vision as set in the District Integrated Transport Plan for the CKDM is:</p> <p>An integrated, accessible well-managed and maintained transport system throughout the Central Karoo which makes efficient use of limited resources and is socially just in a way that advances broader developmental aims and objectives and recognises the role played by the N1 corridor in regional development.</p>	<p>Response required</p> <ul style="list-style-type: none"> • The diversity in the Prince Albert area creates a unique variety of challenge needs to be addressed. • The maintenance of the gravel roads is noted in the IDP as being necessary to support that agri-business in the area so that employment can be supported in the turn. <p>Projects identified:</p> <ul style="list-style-type: none"> • Extension of non-motorised transport network (underway) • Public transport infrastructure development in Prince Albert. • Street pavements in Prince Albert (underway) • Roads for the proposed Gap housing development • Maintenance of remainder of TR33/5 between Klaarstroom and Beaufort-West, km 0-55 (N12) • Paving of Primary access roads in Prince Albert and Leeu-Gamka • Upgrade of low-water bridge North End & Rondsmerk (Completed)

Mobility Strategy for the Central Karoo District Municipality

<p>Status: Under Review /Update</p> <p>The CKDM Mobility Strategy was previously developed by the CSIR. The Mobility Strategy is the responsibility of the Central Karoo District Municipality.</p> <p>Objective</p> <p>The Objective of the study is to prepare a Mobility Strategy for CKDM, align it is an integrated Public Transport Network (IPTN), develop a cost model and specifically; provide greater clarity on the responsibility of providing municipal public transport services. The IPTN will be designed to obtain a clearer understanding of:</p> <ul style="list-style-type: none"> • The nature of the future public transport contracting environment • The services that should be provided i.e Routes, service frequencies, vehicle categories, etc. • The fare strategy and fare levels • Service coverage • Infrastructure requirements (Public transport as well as non-motorised transport) and associated cost • Organisational responsibility in term of new legislation • Infrastructure needs and • Estimation of cost of providing the services. 	<p>Type of proposed services:</p> <p>School Service: Merweville to Prince Albert on a weekly to transport learners to the school hostel. Leeu-Gamka to Prince Albert on a daily basis. Klaarstroom to Prince Albert on a daily basis.</p> <p>Rail connections: Laingsburg to Hutchinson via Merweville, Murraysburg link</p> <p>General access:</p> <p>Merweville to Beaufort- West twice monthly Klaarstroom via Prince Albert and Leeu-Gamka to Beaufort- West monthly.</p> <p>Leeu-Gamka to Oudtshoorn via Prince Albert & Klaarstroom twice a month</p> <p>Response required:</p> <p>In the process of being developed.</p> <p>Road safety mitigation on N1 and N12 that includes speed control by local municipal traffic officials.</p> <p>More public transport options.</p>
---	--

Integrated Waste Management Plan (IWMP)

<p>Status : Under Review</p> <p>The integrated Waste Management Plan is a statutory requirement in the Waste Act 59 of 2008 Section 11:</p> <p>The IWMP of Prince Albert Municipality was adopted in 2005 and is currently under review.</p> <p>Often given very little or no priority in most areas, waste management within the PAMUN is displaying distress signals. A concerted effort is being made by the DEA&DP to development 3rd generation integrated Waste Management Plan's (IWMP) in the Municipality that is aligned to National, Provincial, District IWMP'S and Municipal By Laws. Also</p>	<p>Response required:</p> <p>Done in consultation with Department of Environmental Affairs.</p> <p>Improved access control at landfill sites.</p> <p>Encourage waste minimisation and recycling.</p> <p>Projects identified:</p> <p>Waste Separation</p> <p>Waste Minimisation</p> <p>Awareness campaigns</p> <p>Clean up projects</p> <p>Implement findings of Clean Town task team</p>
---	--

<p>licensing existing waste facilities are underway, implementation initiatives will meet Provincial diversion targets and save landfill airspace, and registering of waste facilities and reporting to Provincial Waste information System (IPWIS) are part of the action plan to address the current shortcomings of waste management locally.</p>	
--	--

Air Quality Management Plan (AQMP)

<p>Status: – to be tabled with IDP and review</p> <p>Prince Albert Municipality are working closely with DEA & DP, Directorate: Air Quality & Pollution on the drafting of an Air Quality Plan.</p> <p>Objective</p> <p>An air Quality Management Plan is a tool for the management of air quality in order to protect human health and the environment.</p> <p>The air Quality Management Plan is a statutory requirement in the National Environment Management Air Quality Act 39 of 2004 section 15 (1). The objective of the plan to investigate the state of air quality within the region with respect to the relevant knowledge and capacity.</p> <p>The Air Quality Management Plan is reviewed annually and tabled to Council with the IDP.</p> <p>Management: Air Quality Act 17 the focus of air quality management shifted from source to management of pollutants in the ambient environment through air quality management planning. Exposure to ambient air pollutants can cause a range of significant effects on quality of life such as offensive odours, irritation of eyes, the upper respiratory system and skin and acute and long-term toxic effects. Dirt roads, methane gas from landfill sites, exhaust fumes from the N1 and N12 and open fires are some of the major pollutants identified in the Air Quality Management Plan.</p>	<p>District to develop AQMP. PAMUN to continue with awareness campaigns around AQM.</p>
---	---

Work Place Skills Plan (WSP)

<p>Status: Consulted with Unions, to be tabled in April 2019</p> <p>Prince Albert Municipality (PAMUN) has a skills development plan which is updated and reviewed every financial year in line with the prescripts of the Skills Development Act 1998, the act aims to improve the quality of life of the labour force, to encourage the labour force to be self-employed and to encourage workers to participate in leadership and other programmes. The limited budget available do not cater to the needs of the staff and community.</p>	<p>Response required:</p> <p>Implementation of skills development plan as submitted and provided for in budget.</p>
--	--

Integrated Human Settlement Plan (HSP)

<p>Status: Developed</p> <p>The overriding aim of Human Settlement Plans (HSPs) for a municipality is to create urban and rural settlements that generate meaningful livelihood opportunities for all residents. Their purpose is to create opportunities for quality housing and varying housing options, adequately provided with the full range of utility services, such as electricity and water provision and sewage and storm water disposal. It should aim to increase the value of property as an asset, in particular those owned by poor communities. It places particular emphasis on locating poor communities close to economic activity, employment opportunities, and education opportunities and other public services and facilities. Areas that are prone to flooding, landslides and contamination should be avoided and pleasant settlement environments should be created with adequate landscaping, and passive and active recreational opportunities. Housing delivery should occur within a framework of meaningful participation of the key role players and through a prioritised and accelerated process.</p> <p>Selection Policy:</p> <p>The Municipality has a Selection Policy and has opted to keep this policy till the completion of the Prince Albert Housing Project. As per national</p>	<p>Housing challenges:</p> <ul style="list-style-type: none">• Lack of proper planning• Budgets are not aligned• Lack of capacity, knowledge and experience to deal with the housing delivery challenges.• Lack of adequate funding (Provincial).• The lack of a land audit to assist with the identification of suitable land for housing.• The need for substantial bulk infrastructure in the most towns.
---	--

directive preference is provided to potential beneficiaries over 40 years.	
--	--

Environmental Management & Bio-diversity Plan

<p>Status: In process of been reviewed at District level</p> <p>The CKDM Environmental Management Plan status quo report was adopted.</p> <p>The intention of the EMF is to guide future development and development planning so that it may occur within an environmentally sustainable manner. The objective of this phase of the EMF is to determine the current situation in the CKDM in terms of various features. These include, for example, agriculture, mining, water resources, infrastructure, conservation, tourism, socio-economic factors, heritage, botanical and planning. This EMF is being undertaken in terms of the environmental Management Framework Regulations Government Notice 547 (18 June 2010) of the National Environmental Management Act (NEMA) (Act 107 of 1998).</p>	<p>The Prince Albert Municipality is in a predominantly natural state (89%) which supports biodiversity and the ecological process that maintains biodiversity. The expansion of intensive land uses (mining, cultivation and urbanization) which result in the loss of habitats is sometimes unavoidable but tools such as this EMF help to ensure that sensitive areas, in this case the identified CBAs, are protected from habitat loss.</p> <p>According to the CKDM EMF Status Quo Report the following should be noted:</p> <ul style="list-style-type: none"> • Loss of high potential land to urban expansion is a treat for PAMUN • Incentive for tourism and residential development in Prince Albert, may involve rezoning or development on agricultural land • Guide development away from productive and high potential farm land.
---	--

Electrical Master Plan

<p>Status: To be reviewed</p> <p>The future population will impact on the available Notified Maximum Demand (NMD) from Eskom for each of the towns in the municipal area. Suitable land will have to be identified for future residential housing developments. The household growth up until 2030 indicates an increase of 2.2% per annum, an average of 3.6 people per household and that all future residential developments will be provided at a density of 25 dwelling units per hectare. This SDP shows an increase ± 2 652 houses over the next 14 years within the Prince Albert Municipal area of supply. The amount of new houses can be converted to NMD. The additional supply demand that will be required from Eskom – 2 652 x 2.5 kVA (ADMD) = 6 630 kVA. The additional demand can then be divided between the major towns within the Municipality.</p>	<p>By-law</p> <p>Prince Albert Municipality will be required to amend the current electricity supply by-law to accommodate renewable energy additions to the electricity network. The council should implement the SSEG by-law regulations to guide the consumers on how to safely and effectively employ renewable energy technologies on domestic and commercial level. The proposed amended by-law must provide for the supply of electricity to the residents within the area of jurisdiction of the municipality and provide for procedures, methods and practices to regulate such provision of electricity.</p>
---	---

<p>Numerous transformers need refurbishment with regards to oil leakage, transformer heating up, etc. (See Section 2 in Electrical Master Plan 2016 File) In summary, the following needs to be implemented:</p> <ul style="list-style-type: none"> - Replace/Installation of a new transformer - Refurbishment of mini-sun, pole mounted and ground transformers - Installation of fuses 	
---	--

7.11 Integrated Programmes

7.11.1 Thusong Programme

The Thusong Centre located in Prince Albert, accommodates services such as the Department of Social Development, Department of Home Affairs, Department of Labour, The South African Social Security Agency (SASSA), The Independent Electoral Commission (IEC), a satellite library at Prince Albert, the Emergency Service of the Municipality and the Prince Albert *Dieresorng* offices. The Municipality also see the four Access Centres (two in Leeu Gamka, one in Klaarstroom and one in Prince Albert) as part of the Thusong facilities. The Environmental Education Centre training is another part of the satellite Thusong facilities and provide ample training opportunities in partnership with government and the private sector. Though only one worker is assigned on a 100% basis to the Thusong facilities and there are no Thusong Manager, the Thusong facilities have been incorporated into the operations of the Corporate, Strategic and Community Services Department who oversees the management, Thusong Outreaches, training, public participation, awareness campaigns, management, reporting and cleaning of the facilities.

The extensions of the Thusong facilities are prioritised to include more offices, an upgrade of existing facilities and services as well as parking. Funding to operate these facilities have not been received in the current cycle.

Joint District Approach

The district-based service delivery model will aim to break down the silos between the different spheres of government, in a bid to improve service delivery. This is an important innovation in the implementation of service delivery, that will ensure a coherent planning, budgeting and implementation of service delivery projects in all districts by all three spheres of government — national, provincial and local.

Chapter 8

FINANCIAL MANAGEMENT

Prince Albert Municipality finds it critical to review its financial viability and sustainability, its current financial positions and Medium-Term Revenue and Expenditure Framework.

In terms of the objectives of the Municipal Finance Management Act (No. 56 of 2003) real transparency and accountability can only be achieved where there is a clear link between the strategic objectives agreed with the community, the IDP, budget, SDBIP, in-year reports covering financial and non-financial information, the annual performance report and ultimately the Annual Report of the Municipality.

The Municipality's financial position as on 26 March 2020 is sound with sufficient cash and cash equivalents. The MTREF includes the strategic goals of the current Integrated Development Plan. The revision of the MTREF placed emphasis on the following:

- MSCOA and legislative compliance
- Eskom increase limitations
- Cost saving implementation
- Improved debt collections
- Optimisation of resources

8.2 Operating and capital budget

The operating and capital budget as per mSCOA principles, aligned to the IDP can be seen in the budget attached as annexure D.

8.2.1 Long-term Financial plan

A new Long Term Financial Plan was approved by Council on 30 May 2017. The plan is available on the municipal website for perusal at www.pamun.gov.za The following was recommended:

- Raise loans to fund asset replacements and the rehabilitation of closed Landfill sites. The borrowing program needs will be R14 million during 2018, R11 million during 2019 and R4 million during 2026.
- Explore further avenues to obtain more grants funding (keeping in mind the additional maintenance expenditure that will still be the liability of the municipality even though the additional acquisition is financed from external sources).
- Repairs and maintenance are also considered to be one of the major line items relating to asset management. As it appears from the model that material cash surpluses will realize, it would be meaningful to increase the spending on repairs and maintenance.
- Elevate the tourism marketing and facilitation activities (but avoid an implementation role)
- Put strategies in place for reducing water and electricity distribution losses

- The sale of investment property and/or other assets is necessary to generate cash for future. Weigh up the need for new assets against the need for replacing existing assets
- The condition of asset components should be accurately assessed
- Migrate asset registers to become decision tools for integrated asset management
- Assess quantum and timing of future revenues that an investment in infrastructure can generate before making that investment
- Revisit the rental policy to ensure that actual costs are recovered
- Implement a detail maintenance cost accounting system
- Annually review all financial assumptions relating to financial policies

8.22 COVID-19 IMPACT

Municipalities are in addition to its Constitutional mandate required to perform a variety of functions that falls outside its primary service delivery mandate and have continued to render these services in spite of the fact that funding streams are inadequate or have never followed the functions i.e. Library Services, Licensing, Human Settlements, Environmental Health Services.

With the onset of the pandemic, municipalities have been assigned a variety of responsibilities and have been tasked to perform functions of the Department of Social Development, Department of Health and Law enforcement insofar it applies to the enforcement of the Covid Regulations, municipalities further need to provide quarantine facilities, provide additional burial space, assist in the distribution of humanitarian relief, housing and feed the homeless and destitute to name a few.

The initial unfunded and under-funded mandates as well as the added responsibilities has come with a financial burden to municipalities that have not been provided for in the municipal budgets nor has sufficient funding from Sector Departments found its way to municipal coffers.

The precarious financial position that municipalities found themselves in before the outbreak of the pandemic as a result of the ailing economy, the effect of state capture and the continued electricity crises is further exacerbated by the unintended consequence that the National strategy to contain and prevent the spread of the virus has caused on the economy.

The disposable revenue of business and household alike have begun a downward spiral and the subsequent sharp decline of municipal revenue streams are evident of the effect that the pandemic and measures to contain has caused.

The following are examples thereof:

- No revenue received for municipal resorts, halls, sport grounds and other facilities.
- A significant reduction in traffic fines revenue.
- A reduction in revenue from motor vehicle licenses, license renewals, learners and drivers licenses.
- Reduced revenue from town planning processes, development charges and building plan fees
- Reduced revenue from usage charges such as water electricity and refuse removal, especially in respect of businesses that are unable or prevented from trading.
- Reduced growth in assessment rates revenue as supplementary valuation roll processes cannot be completed and property transfers are held in abeyance.
- Inability of municipal debtors to afford the payment of municipal account.
- The impact of the non-collection of debt on municipal revenue and cash flow predictions.
- Disruption in debt management and credit control processes, through political and social pressure.
- Additional revenue foregone as a result of relief measures implemented to assist the poorest of the poor.
- Loss of revenue due to a close down of a variety of economic sectors.

Apart from the aforementioned examples, the following issues have also been identified and the risk in this respect needs to be managed within the municipal fiscal framework:

- Re-categorization of properties i.e. accommodation establishments and guest houses apply to be re-categorized from business to residential as they can no longer trade as a going concern thereby causing a significant loss in rates revenue in the medium term to certain municipalities.
- Ballooning expenditure in respect of overtime, the cost of PPE for staff members, sanitizing streets and other municipal facilities such as public ablution and taxi ranks.
- The cost of special handling and disposal of solid waste where cases of Corona Virus infection are confirmed.
- The additional cost of IT infrastructure, communication networks, data networks and other resources to enable working from home.
- Direct and indirect labor cost in both the enforcement of the Covid -19 regulations and the performing of the mandate of other spheres of government such as food distribution.

- The risk of reduced fiscal allocations such as Equitable Share, infrastructure grants and other support funding that are not secured.
- The increased cost of compliance and additional reporting requirements in terms of Covid – 19 regulations.
- The risks associated with the functioning of the institution during and past the lockdown in a Covid – 19 risk averting environment.
- Managing the cost drivers, fixed and overhead costs, statutory and contractual obligations within a diminishing revenue base.
- The deployment of municipal staff such as law enforcement in a different capacity than intended under normal operations.
- Training and development efforts grinding to a halt.

1. PROPSALS TO MITIGATE THE FINANCIAL IMPACT OF COVID - 19

1.1. The following proposals were identified as possible options for consideration:

- Resuming of economic activity through the opening up of the economy.
- Review of the municipal capital funding mix Capital Replacement Reserve vs. borrowing.
- Exploring a fifth utility such as provision of telecommunication services using existing infrastructure, cellular, data and internet services (Fibre to the home/Smart City concept)
- Revenue Enhancement Strategies.
- Enhancing of credit control actions through quick wins such as collection of outstanding debt from government departments and employees.
- Reducing the SDL (Skills Development Levy) contribution to SARS, alternatively negotiate with the SETA to increase discretionary grants to municipalities.
- Reducing SALGA membership contributions.
- Audit fees reduction.
- Collective wage agreement – exemption from the general salary adjustment.
- Re-financing long term debt at reduced interest rates.
- Utilising a portion of unspent grants to fund Covid – 19 Support.
- Applying cost containment measures and cost reduction strategies, renegotiate terms of contract, escalation clauses to reduce fees.
- Offering financial assistance to customers through rebates, exemptions and forfeits and other means.

- Organizational redesign and staff rationalization
- Shared services and resources
- Sponsorships
- Financial Recovery plan

8.4 Municipal Standard Charts of Accounting (mSCOA)

The Minister of Finance promulgated the Municipal Regulations on a Standard Chart of Accounts in Government Gazette Notice No. 37577 on 22 April 2014. mSCOA provides a uniform and standardised financial transaction classification framework. Essentially this means that mSCOA prescribes the method (the how) and format (the look) that municipalities and their entities should use to record and classify all expenditure (capital and operating), revenue, assets, liabilities, equity, policy outcomes and legislative reporting. mSCOA is a business reform rather than a mere financial reform and requires multidimensional recording and reporting of every transaction across the following 7 segments:

Project	Function	Municipal Standard Classification Item	Item
Costing	Fund	Regional	

In summary, mSCOA compliance in respect of the tabled 2020/21 MTREF and IDP submission means that the data string uploaded to the LG Database portal must meet the following requirements:

No mapping;

- Correct use of all segments;
- Seamless integration of core system with sub-systems (municipalities must ensure the integration of the Debtors, Payroll and Asset sub-systems); and
- Integrated budgeting facility directly linked to the IDP and SDBIP facilities on the system.

Chapter 9: Performance Management

9.1 IDP IMPLEMENTATION (IMAP): Project and programme planning

This section deals with the implementation and monitoring of the IDP projects and programmes aimed at achieving the vision and objectives of Prince Albert Municipality as set out in this document. The IDP and Budget are implemented through a Service Delivery and Budget Implementation Plan (SDBIP).

Furthermore, these development needs, strategies and financial resources are linked with each other in the IMAP which is attached as annexure E in this document to the IDP, thus ensuring alignment between the IDP and the budget.

The IMAP serves as a tool to plan, outline and monitor the implementation of the IDP. The IMAP will be used to annually formulate the service delivery budget implementation plan (SDBIP) and performance indicators for the Municipality, which will be used to monitor the implementation of the municipal strategies (IDP) and budget. The draft Top Layer SDBIP for 2020/21 is attached as annexure C. The 2020/21 final SDBIP will be approved by the Mayor on 26 June 2020.

9.2 Unfunded projects

The following projects are not yet funded, but have been identified as community needs.

Project Name	Ward	Project Description	Estimate Budget
Bulk Infrastructure			
Bulk sanitation	Prince Albert Road	Upgrade of WWTW	R 2 100 000
Water Provision	Prince Albert Road	Boreholes and Mains, including pump station	R 1 570 000
Water Provision	Prince Albert Road	Reservoir, including upgrade of WTW	R 980 000
Bulk sanitation	Prince Albert	Upgrade of WWTW phase 3, air raisin, including intake	R 2 500 000
Water Provision	Prince Albert	Upgrade of WTW, including and larger soda Ash plant, and Filtering, including borehole	R 6 000 000
Bulk water purification	Klaarstroom	Upgrade of WTW	R 2 500 000
Bulk Water	All wards	Telemetric system for WTW & WWTW	R 3 200 000
Sportfield	Prince Albert	Completion of effluent waste water pipeline to Sport fields	
Upgrade of landfill sites	Prince Albert	Material recover system	R4 000 000
Water Provision	Leeu-Gamka	Upgrade mains and water supply lines, upgrading of reticulation of asbestos pipeline	R 3 500 000
Bulk sanitation	Leeu-Gamka	Bulk sanitation connection to previous Spoornet areas	R 4 000 000
Water Provision	Leeu-Gamka	Bulk water connection, including mains and supply line to previous Spoornet area + Welgemoed + Newton Park	R 6 000 000
Bulk sanitation	Leeu-Gamka	Newton Park eradication of buckets with septic tanks	R 3 000 000
Bulk sanitation	Prince Albert	Bulk Sanitation effluent re-use, reservoir pump station and pipeline for irrigation + upgrade of inflow to WWTW, and reticulation pump stations	R 8 000 000
Bulk Sanitation	Leeu-Gamka	Bulk Sanitation, WWTW, chlorination, septic tank, and pump station for irrigation of effluent	R 3 000 000
Storm water Upgrade	Prince Albert & Leeu-Gamka	Storm water upgrade, including drainage and curbing, Adderley Street, North End and Bitterwater	R 5 000 000
Bulk Sanitation	Prince Albert	Internal bulk sanitation, including upgrading of septic tank system to waterborne systems	R 3 340 000
Water provision	Prince Albert	Storage dam	R 15 000 000
Water provision	Prince Albert	Boreholes and Mains + development of borehole field + reservoir	R 10 000 000
Street Lighting	Leeu-Gamka	Community Lighting	R 2 000 000
Public Transport	All wards	Upgrade of municipal roads	R 5 000 000
Public Transport	All Wards	Pavements and Terminus	R 9 000 000
Non-motorized transport projects	All Wards	Bicycle friendly roads	R 600 000
Electricity provision	All Wards	Kiosk and upgrade of Transformers	R 3 200 000

Project Name	Ward	Project Description	Estimate Budget
Electronic water metering	All Wards	Installation of prepaid water meters	R 4 000 000
Renewable energy	All Wards	Replacement of conventional lightning with renewable street lightning	R 25 000 000
Electricity metering system	All Wards	Upgrade of electricity meters + Back office	R 2 000 000
Prince Albert Integrated Environmental Precinct	Prince Albert	Pedestrian walkway and the upgrade of reserve from EE-Centre to town along the furrow. Alongside the pedestrian spline, trees and flowers endemic to the area will be planted. Construction of a 100-seat amphitheatre for community events as well as environmental exhibitions and open-air education and awareness.	R 17 000 000
Sport and recreation	Prince Albert	Sport precinct	R102 000 000
Economic Development	Klaarstroom	Integrated LED & Tourism Plan/ Strategy & Destination Marketing, SMME Tourism Development	R 1 300 000
Economic Development	Prince Albert	Integrated LED & Tourism Plan/ Strategy & Destination Marketing, SMME Tourism Development	R 3 100 000
Working for Water	All Wards	Alien clearing populars, prosopis, satansbos, cactuses	R 1 000 000
Human Settlements Development, 2121 units (backlog)	All Wards	Construction of new houses	R 104 100 000
Early Childhood Development	Leeu-Gamka	Facilitate the Construction of an ECD Centre that's safe & accessibly	R 2 000 000
Development Services	Prince Albert	Multi-purpose centre. ECD, offices for emerging farmers and SMME's	R 12 000 000
Landfill Sites	All Wards	Rehabilitation & Registration of Landfill Sites	R 9 000 000
SMME Development	All Wards	Development of SMME trading Hubs	R 5 000 000
Sector Plan's Development	All Wards	Professional Fees for Socio-economic, Township Plans, Transport Plan, Housing Plan and Poverty Strategy, WSDP, Water safety plan, sewerage plan	R 8 000 000
Neighborhood & Urban Design	All Wards	Settlements Integration	R 5 000 000
Special Projects			
Swartberg Pass Project Phase 2	Prince Albert	proposal serves as motivation for the Swartberg Pass Project, a community-based job creation initiative under the auspices of the Central Karoo's Strategic Framework for Economic Regeneration.	R 7,000,000
Pont over Gamka Dam	Prince Albert	The project aims to develop eco-cultural adventure tourism in the rural areas & link up with other tourism route 66	R 5,000,000
Gamkapoort development	Prince Albert	Develop a resting or eco park, with overnight facilities	R 4 500 000

Project Name	Ward	Project Description	Estimate Budget
2 nd Phase Thusong Service Centre	Prince Albert	The project aims to bring government services closer to the people.	R 5,100,000
Municipal Office	Prince Albert, Leeu Gamka and Klarstroom	Develop new offices, at the Thusong centre, in order to have all government services at one point. Equip and extend satellite offices	R 7 800 000
Community hall	Prince Albert	Establish a centre for community activity	R 3 700 000
Gap Housing & Low Cost Housing	PAM area; Leeu-Gamka Prince Albert Klaarstroom	The project aims to reduce the housing backlog and development of shacks.	R 26,900,000
Vehicle Testing Centre	Prince Albert	To bring services closer to the community & more accessible.	R 2,300,000
10. Alternative Energy (Solar)	Prince Albert	To provide cost effective electricity. Job creation, Viability in terms of energy source.	R 25,000,000
Business Hives	PAM area; Leeu-Gamka Prince Albert Klaarstroom	The project aims to development an environment or space for upcoming entrepreneurs, create employment opportunities & contribute to the economy.	R 8,000,000
Community Tourism Plan	Prince Albert Area	Provide employment opportunities for HDI's guidelines for the development for community tourism opportunities	R 1 000 000
